TCIC/TLETS Operation Manual - Part 1

TCIC/TLETS Training Mission

To protect and preserve the lives and property of the citizens of the state of Texas by providing accessible, accurate and quality training to ensure the proper use of the Texas Law Enforcement Telecommunications System (TLETS) in support of the Texas law enforcement and criminal justice community.

This manual contains instructions designed to guide users in using the National Crime Information Center (NCIC) system and is derived from the NCIC Operating Manual. No system can be expected to produce results unless it is properly used. The standards and procedures set forth should be strictly followed as every exception tends to degrade the system and the integrity of the data stored in the NCIC.

TCIC/TLETS Training Policy

Only personnel employed by law enforcement or criminal justice agency may attend TCIC/TLETS training. Non-sponsored students enrolled in a Basic Peace Officer Course (BPOC) may attend TCIC/TLETS Mobile Access training, TCOLE #4800. These students must pass a criminal background investigation before attending the training. Law enforcement or criminal justice agency employees with access to information through TCIC/TLETS must attend TCIC/TLETS training or receive training through an approved TCOLE academy.

All users accessing information from TCIC/TLETS are required to complete training within six months from the date of their assignment. All users must have a TLETS user ID before attending TCIC/TLETS training. Authorized agencies must have a designated Terminal Agency Coordinator (TAC) who shall request access for users via submission of the TLETS User Request Form (URF). The form is submitted to TLETS Operations at TLETS.URF@dps.texas.gov. The user's access to TCIC/TLETS will determine which corresponding course is required. There is no fee for training provided by the Texas Department of Public Safety, TCIC/TLETS Training.

TCIC/TLETS Training Course Descriptions

TCIC/TLETS Full Access (TCOLE #4802 - 24 hours):

This in-person course is designed for users who perform all TCIC/NCIC functions. TLETS training covers databases such as driver license, vehicle registration, Financial Responsibility Verification Program (FRVP), International Justice and Public Safety Network (Nlets), Canadian Police Information Centre (CPIC), and Interpol. In conjunction with TLETS databases, the training provides law enforcement with the procedural knowledge to query, enter, modify, clear, and cancel records, access Criminal History Record Information (CHRI), confirm hits, and send and receive administrative messages. This course requires the TCIC/TLETS Full Access Manual. Users must recertify every two years.

TCIC/TLETS Less Than Full Access (TCOLE #4801 - 16 hours):

This in-person course is designed for users who perform TCIC/NCIC functions. TLETS training covers databases such as driver license, vehicle registration, Financial Responsibility Verification Program (FRVP), International Justice and Public Safety Network (Nlets), Canadian Police Information Centre (CPIC), and Interpol. In conjunction with TLETS databases, the training provides law enforcement with the procedural knowledge to query records, access Criminal History Record Information (CHRI), confirm hits, and send and receive administrative messages. This course requires the TCIC/TLETS Less Than Full Access Manual. Users must recertify every two years.

TCIC/TLETS Mobile Access (TCOLE #4800 - 8 hours):

This in-person course is designed for users who perform TCIC/NCIC functions. TLETS training covers databases such as driver license, vehicle registration, and Financial Responsibility Verification Program (FRVP). In conjunction with TLETS databases, the training provides law enforcement with the procedural knowledge to query records and access Criminal History Record Information (CHRI). This course requires the TCIC/TLETS Mobile Access Manual. Users must recertify every two years.

TCIC/TLETS Peace Officer Online (No TCOLE Credit): This online course is designed for individuals with non-terminal access who request information and are eligible to receive returns via radio, verbally, hard copy, or electronically following the CJIS Security Policy. TLETS training covers databases such as driver license, vehicle registration, Financial Responsibility Verification Program (FRVP), and International Justice and Public Safety Network (Nlets) registration. In conjunction with TLETS databases, the certification provides law enforcement with the knowledge to access TCIC/NCIC returns and Criminal History Record Information (CHRI). This course requires the TCIC/TLETS Peace Officer Manual. Users must recertify every two years.

TCIC/TLETS Criminal Justice Practitioner Online (No TCOLE Credit): This online course is designed for non-terminal access users present in a facility where criminal justice information is processed or stored with hard copy access only. This role allows access to TCIC/NCIC Criminal History Record Information (CHRI). TLETS training covers databases such as driver license, vehicle registration, Financial Responsibility Verification Program (FRVP), and International Justice and Public Safety Network (Nlets) registration. Jailers will only have hard copy access to Continuity of Care (CCQ) if authorized. This course requires the TCIC/TLETS Criminal Justice Practitioner Manual. Users must recertify every two years.

TCIC/TLETS Terminal Agency Coordinator (TAC) (TCOLE #3814 - 8 hours): This in-person course is designed for personnel designated to function as the Terminal Agency Coordinator (TAC) and anyone that may be assigned to assist the TAC. This course covers recently implemented database files, policy, and procedural compliance, audit, quality control, requesting user access to TCIC/NCIC, and training. It is recommended personnel attend this course within the first six months from the date of appointment or assignment. This course requires the TCIC/TLETS Terminal Agency Coordinator Manual. No recertification required.

TCIC/TLETS Associate Trainer (TCOLE #4804 - 32 hours): This in-person course is designed for personnel who are responsible for TCIC/TLETS classroom instruction (TCOLE 4800, 4801, or 4802). Personnel interested in becoming an Associate Trainer must meet the following requirements:

- A minimum of two years of experience with TCIC/TLETS
- Possess a current TCIC/TLETS Full Access certification (TCOLE #4802)
- Complete Associate Trainer Candidate Packet (located in Launchpad)
- Provide a Letter of Recommendation from the Agency Administrator on letterhead
- Provide a Candidate Letter of Interest

DPS TCIC/TLETS Training recommends all Associate Trainers attend the TCOLE Basic Instructor Certification Course (TCOLE #1014). Contact <https://www.tcole.texas.gov/>

Attending this course does not guarantee becoming a DPS Associate Trainer. Upon successful completion of the TCIC/TLETS Associate Trainer Course (TCOLE #4804), the Associate Trainer shall conduct a minimum of one class per year. This is a TCIC Training requirement to maintain certification as an Associate Trainer. The DPS Trainers will periodically observe an Associate Trainer during any classroom training, with notice. It is encouraged for the Associate Trainer to observe one course taught by a DPS Trainer.

This course requires the TCIC/TLETS Associate Trainer Manual and TCIC/TLETS Full Access Manual. Associate Trainers must recertify by attending the TCIC/TLETS Associate Trainer Recertification Course (TCOLE #4805 – 8 hours) every two years.

TCIC/TLETS Associate Trainer Recertification (TCOLE #4805 - 8 hours): This in-person course is designed for current Associate Trainers. Attendees review current TCIC/NCIC policy and procedures. This course will cover legislative updates, where applicable, and enhancements to new and existing files. This course requires the use of the TCIC/TLETS Associate Trainer Manual. All Associate Trainers must recertify every two years.

Continuity of Care Online: This online course is designed for personnel at agencies with a facility audited by the authority of the Texas Commission on Jail Standards. Agencies must have at least one user with access to the Continuity of Care (CCQ). This online course includes examples of information provided and the dissemination/storage of the return. This course requires the TCIC/TLETS Continuity of Care Manual. Users must recertify every two years.

TXGang (No TCOLE Credit): TXGang serves the criminal justice community by providing access to a computerized index of records. The records contain criminal intelligence information on criminal street gang activity in Texas. The community served includes criminal justice personnel involved in the investigation, prosecution, or punishment for a criminal offense related to a gang. An authorized user who is involved in the submission, query, dissemination, or retention of information supporting a TXGang record must comply with the intelligence guidelines.

Recertification Policy

Recertification testing is completed online through DPS TCIC/TLETS Training Nextest <https://txletstraining.dps.texas.gov/nextest/> with the user's TLETS username and password. The user may also re-attend the appropriate level of classroom training. Failure to complete the recertification test within one year from the date of expiration will require users to re-attend the appropriate classroom training.

All tests are open book. TCIC/TLETS Operation Manuals are available on Nextest Launch Pad CJIS Training with the user's TLETS Username and password. The user has eight hours to complete the test once initiated. The user has three attempts to complete the test with a minimum score of 75%. If the user scores less than 75%, the user must wait one hour before reattempting the test. Users who are unsuccessful after three attempts will be locked out of testing and may be required to re-attend classroom training.

TLETS Access Interruption

Personnel experiencing an interruption in TLETS access, greater than one-year, are required to attend classroom training. Military personnel deployed with the U.S. Armed Forces will be granted six months of access following their return to recertify online.

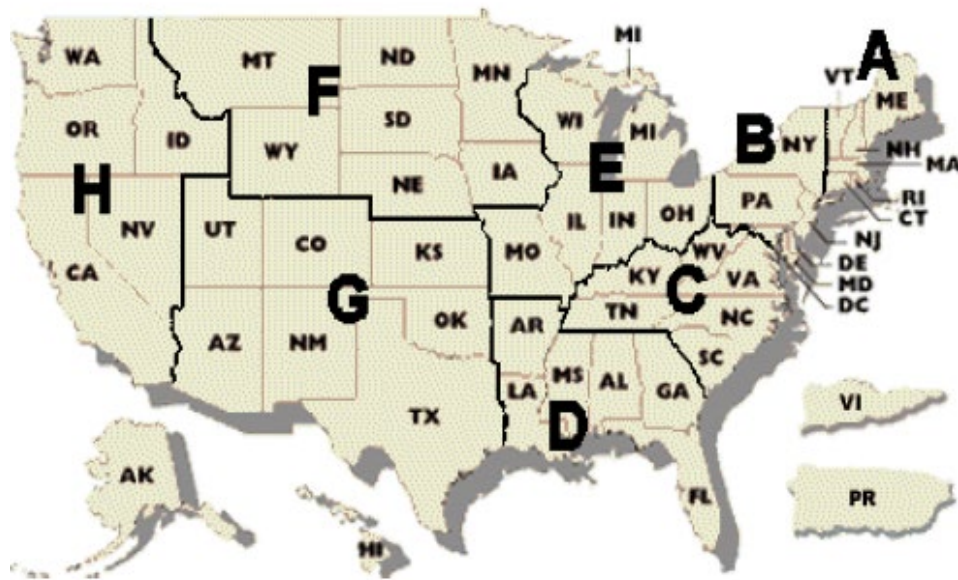

TCOLE Credit

Only personnel providing a valid Personal Identification Number (PID) on the accepted signature roster will receive TCOLE credit for classroom training.

System Definition and Policy

Nlets Description

The [International Justice and Public Safety Network \(Nlets\)](https://www.nlets.org/) <https://www.nlets.org/> is made up of representatives of law enforcement agencies from each of the 50 states, the District of Columbia, Puerto Rico, US Virgin Islands, Guam, Canadian Police Information Centre (CPIC), Interpol and federal law enforcement agencies. Nlets is incorporated under the laws of the state of Delaware and is a non-profit organization whose purpose is to provide interstate communications to law enforcement, criminal justice and other agencies involved in enforcement of laws. As a 501(c) (3) not for profit organization, Nlets is solely funded by membership fees.

Region A (A1)	Region B (B1)	Region C (C1)	Region D (D1)	Region E (E1)	Region F (F1)	Region G (G1)	Region H (H1)
Connecticut Maine New Hampshire Rhode Island Vermont Massachusetts	District of Columbia Delaware Maryland New Jersey New York Pennsylvania	Kentucky North Carolina South Carolina Tennessee Virginia West Virginia	Alabama Arkansas Florida Georgia Louisiana Mississippi Puerto Rico	Indiana Illinois Michigan Missouri Ohio Wisconsin	Iowa Minnesota Montana Nebraska North Dakota South Dakota Wyoming	Arizona Colorado Kansas New Mexico Oklahoma Texas Utah	Alaska California Hawaii Idaho Nevada Oregon Washington

Nlets Administration

Nlets is comprised of eight regions. Each region represents six or seven states and several federal agencies that are grouped together to represent a regional community of interest. The chief executive officer of each Nlets System Agency (NSA) for a state or other member agency will appoint an individual to provide representation in the Nlets organization. The state representative of each region elects a chairman and a vice chairman each year. The chairman represents the region on the Nlets Board of Directors.

Nlets is a secure network and system linking local, state, federal and international agencies together to provide the capability to exchange criminal justice and public safety related information. Nlets links NSAs together. Using an international standardized format, a local agency may transmit and receive data from any other agency in a matter of seconds.

A log of all transactions is kept providing system statistical reports and management information. The Nlets system can receive, store and forward message traffic from and to all its user agencies. Administrative message traffic on the system includes all types of free form criminal justice related data from one point to one or more points. In addition, Nlets supports Query into state motor vehicle, driver license, criminal history and other state, federal and international databases.

Each Nlets member must designate an agency as the Nlets System Agency (NSA). This designated agency is responsible for maintaining operational surveillance over the state end of the line and for providing distribution services in and out of the Nlets network. The NSA is normally addressed by using the two-character state code. The Department of Public Safety – Crime Records Division is the NSA for the state of Texas, using the Point of Entry (POE) code of TX.

Traffic is directed automatically to the destination ORI(s) on the state network. The NSA is responsible for the expeditious delivery of messages to the designated destination ORI. An exception to this rule is the distribution of statewide broadcast messages. Furthermore, no information delivered from Nlets is to be used for any purposes other than that for which it was originally requested. Exceptions to this rule allow:

- The review of message traffic for quality control.
- The usage of traffic for statistical analysis purposes.

TLETS Description

The Texas Law Enforcement Telecommunications System (TLETS) is a statewide telecommunications network composed of computer terminals, interfaces and databases representing municipal, county, state, federal, military law enforcement, and criminal justice agencies in Texas. This network is controlled by a computerized electronic message switching system located at the Texas Department of Public Safety in Austin.

Member agencies have the capability of exchanging administrative messages and, when authorized, have access to various databases enabling them to retrieve and enter computerized data. Additionally, other law enforcement and criminal justice agencies, systems, files, and services are available to TLETS members through the Nlets.

TLETS Network

The Texas Law Enforcement Telecommunications System (TLETS) consists of a software application and secure network services. Every message and transaction generated by a terminal on the TLETS network is initially transmitted to the message broker over a dedicated circuit or satellite wireless connection where it is validated for proper codes and formats. A record of each message or transaction is made on electronic logging devices and then forwarded to its addressed destination. In the event conditions exist that prevent the proper delivery of the message/transaction to its addressed destination, the message switcher will automatically store this message or transaction until such time as delivery is possible or notify the originator it was discarded.

TLETS Administration

The Director of the Texas Department of Public Safety (TXDPS) has the direct responsibility for the administrative control, access, and operation of the Texas Law Enforcement Telecommunications System (TLETS). TLETS operates under a shared management concept. TXDPS Information Technology manages the technical components of the system by design, operation, circuits, and the satellite network (VSAT). The TXDPS Crime Records Division manages the operations of the TLETS system by coordinating new agency membership, creating new/maintaining existing database interfaces, user agreements, system management responsibilities and other administrative matters pertaining to TLETS.

National Crime Information Center

The National Crime Information Center (NCIC) has been called the lifeline of law enforcement—an electronic clearinghouse of crime data that can be tapped into by virtually every criminal justice agency nationwide, 24 hours a day, 365 days a year. It helps criminal justice professionals apprehend fugitives, locate missing persons, recover stolen property, and identify terrorists. It also assists law enforcement officers in performing their duties more safely and provides information necessary to protect the public. <https://www.fbi.gov/services/cjis/ncic>

The National Crime Information Center (NCIC) is a nationwide computerized information system established as a service to all criminal justice agencies – local, state, and federal. The goal of NCIC is to help the criminal justice community perform its duties by providing and maintaining a computerized filing system of accurate and timely documented criminal justice information. For NCIC purposes, criminal justice information is defined as information collected by criminal justice agencies that are needed for the performance of their legally authorized and required functions.

This information includes wanted person information, missing person information, unidentified person information, stolen property information, criminal history information, information compiled during investigation of crimes that are known or believed on reasonable grounds to have occurred, including information on identifiable individuals compiled to anticipate, prevent, or monitor possible criminal activity. Criminal justice information can be electronic (paperless) or hard copy (paper).

The NCIC database can best be described as a computerized filing system of documented criminal justice information concerning crimes and criminals of nationwide interest and a locator file for stolen property, missing and unidentified persons.

Texas Crime Information Center

The Texas Crime Information Center (TCIC) was established in the early 1970's after the inception of the National Crime Information Center (NCIC) in 1967. In 1987, the TCIC Training and Audit sections were added in response to the NCIC's 1984 nationwide audit requiring each state's CJIS Systems Agency (CSA) to establish training and audit programs, located at the TXDPS headquarters in Austin, Texas. TCIC operates under the same policies and goals as NCIC.

In accordance with NCIC policy the Texas Department of Public Safety (TXDPS) has designated the Crime Records Division as the state's CSA and the Chief of the Crime Records Division as the state's CJIS Systems Officer (CSO). TCIC training has established policies that satisfy NCIC mandates and user needs.

TCIC Operations is available 24 hours a day, seven days a week at 1-866-266-TCIC (8242) to assist users with administrative matters and/or provide agency support.

CJIS Systems Agency Concept

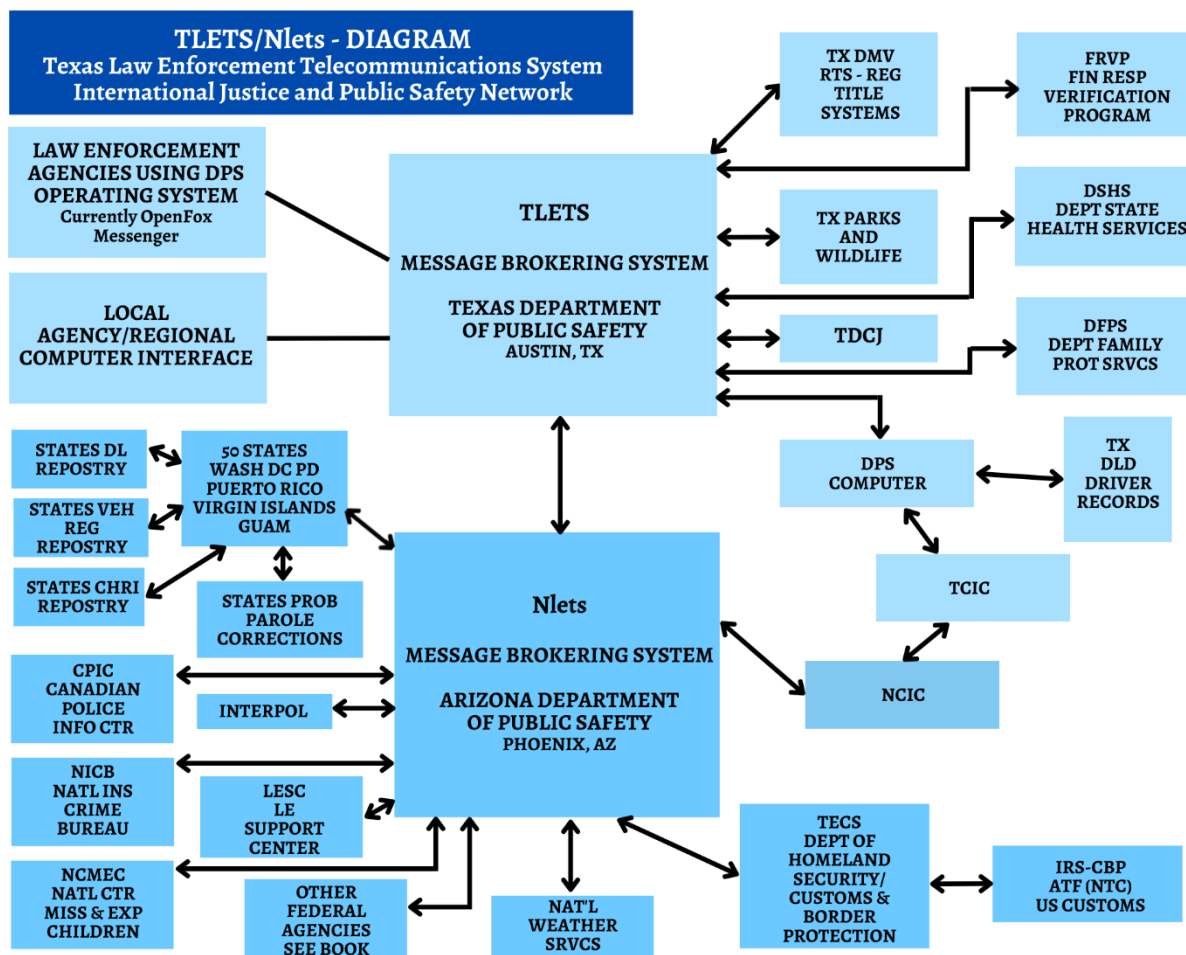

NCIC operates under a shared management concept between the FBI and federal, state, local and tribal criminal justice users. The Criminal Justice Information Services (CJIS) Advisory Policy Board established a goal of having a single state agency assume responsibility as the CJIS Systems Agency (CSA) by which NCIC System users in that state would access the various systems managed by the FBI CJIS Division. The CSA is responsible for planning and providing necessary hardware, software, funding, quality assurance and training for complete access to all CJIS Division data services by all authorized agencies within the state.

The Texas Department of Public Safety (TXDPS) has signed a User's Agreement with the FBI setting out the specific responsibilities, in the same manner as each local agency signs a User's Agreement with DPS. Each local agency will resolve NCIC problems with the CSA and the CSA will resolve statewide problems with the FBI/NCIC.

Terminal Agency Coordinators (TAC)

Terminal agencies are required to designate an individual to function as their primary Terminal Agency Coordinator (TAC). The TAC serves as the point-of-contact at the local agency for matters relating to CJIS information access. The TAC administers CJIS systems programs within the local agency and oversees the agency's compliance with CJIS systems policies. (CJIS Policy 3.2.3)

TLETS/Nlets System Diagram

Local Agency/Regional Computer Interfaces

Several Texas criminal justice agencies have internal computer systems interfaced into the TLETS Switcher and provide TLETS and Nlets telecommunications message switching capabilities to various terminals within that agency. These computer systems could also provide in-house Information Management to their agencies.

Registration and Title System (RTS)

Texas Department of Motor Vehicles (DMV) provides registration information for vehicles titled in Texas from the Registration and Title System database (RTS).

Financial Responsibility Verification Program (FRVP)

The Texas Department of Insurance manages access to TexasSure. This program provides law enforcement officers with potential verification of valid liability insurance for a vehicle.

Texas Department of Parks and Wildlife (TPWD)

The Texas Parks and Wildlife provides boat registration information for boats registered in Texas.

Texas Department of Health and Human Services (HHS)

The Department of Health and Human Services provides for a data exchange to ensure continuity of care for individuals with mental illness who are involved with the criminal justice system and provide post-booking jail diversion opportunities to comply with Texas Commission of Jail Standards.

Texas Department of Criminal Justice (TDCJ)

Texas Department of Criminal Justice provides, Corrections Tracking System, which includes custody data on individuals who are currently or formerly supervised by TDCJ.

Texas Department of Family and Protective Services (DFPS)

The Department of Family and Protective Services provides the Foster Home Member Database.

Driver License System (DLS)

The Texas Department of Public Safety Driver License Division (DLD) is responsible for all driver license records and identification card information issued in Texas. DLS is the repository for driver information, status, and history.

Out-of-State Databases

These databases provide computerized record information on driver license, registration, stolen and wanted information and criminal history record information to authorized users on the TLETS.

- Driver License Information
- Vehicle Registration
- Boat Registration
- Criminal History Record Information
- Probation, Parole and Corrections Information

Canadian Police Information Centre (CPIC)

Nlets supports exchanging criminal justice and criminal justice related information with Canada. A variety of information is available through the Canadian Police Information Center.

International Criminal Police Organization (Interpol)

The International Criminal Police Organization is an inter-governmental organization helps police in member countries to work together to make the world a safer place. To do this, INTERPOL enables them to share and access data on crimes and criminals and offers a range of technical and operational support.

National Insurance Crime Bureau (NICB)

The National Insurance Crime Bureau is a crime prevention organization assisting law enforcement to lead a united effort of insurers, law enforcement agencies and representatives of

the public to prevent and combat insurance fraud and crime through data analytics, investigations, learning and development, government affairs and public affairs.

Law Enforcement Support Center (LESC)

The Law Enforcement Support Center is a national enforcement operations facility administered by U.S. Immigration and Customs Enforcement (ICE), the largest investigative agency in the Department of Homeland Security (DHS). The LESC is a national point of contact that provides timely immigration status, identity information and assistance to local, state, and federal law enforcement agencies on aliens suspected, arrested, or convicted of criminal activity. The center protects and defends the United States by sharing timely and relevant ICE information with our law enforcement partners around the world.

National Center for Missing and Exploited Children

The National Center for Missing & Exploited Children is a non-profit corporation whose mission is to help find missing children, reduce child sexual exploitation, and prevent child victimization. NCMEC works with families, victims, private industry, law enforcement and the public to assist with preventing child abductions, recovering missing children and providing services to deter and combat child sexual exploitation.

NCMEC provides a 24-hour, toll-free Hotline/Cyber Tip Line <https://report.cybertip.org/> accepting reports of missing children as well as lead information on missing and sexually exploited children. Assisting with photograph/poster preparation and distribution, age enhancement, facial reconstruction, imaging/identification services, educational materials, and publications. For additional information contact:

National Center for Missing and Exploited Children
1-800-THE-LOST (800-843-5678)
www.missingkids.org

FAA Aircraft Registration System

The Aircraft Registration System (ACRS) provides information to Nlets users about commercial and private aircraft registered with the Federal Aircraft Association (FAA).

Federal Agency Access

Nlets provides access to various federal agencies through administrative messages.

- US Postal Inspection Service
- US Department of State
- US Department of Interior
- National Park Service
- Bureau of Indian Affairs
- US Park Police
- Veterans Administration Police
- Federal Protection Service
- US Coast Guard
- Department of Army
- Naval Criminal Investigative Service
- Air Force Office of Special Investigations
- US Secret Service
- US Department of Justice
- US Marshals
- Drug Enforcement Administration
- US Court Administration
- US Department of Homeland Security ICE

System Access Policies

TLETS/Nlets Security & Access Policy

Texas Law Enforcement Telecommunications System (TLETS) and the International Justice and Public Safety Network (Nlets) are designed exclusively for use by criminal justice agencies in conducting their lawfully authorized duties within their respective jurisdictions. Data obtained over these systems may only be disseminated to criminal justice agencies as defined by state statute and federal regulations. Each agency must ensure that TLETS terminals and/or terminals on local systems, which have access to TLETS, are secure from unauthorized use.

The terminal site and related infrastructures (including police vehicles if they house equipment which provides access to the CJIS network), must always have adequate physical security to protect against all unauthorized access of computer devices, access devices and printed and stored data. A physically secure location is a criminal justice facility, an area, a room, a group of rooms or a police vehicle that are subject to criminal justice agency management control and which contain hardware, software and/or firmware that provide access to the CJIS network.

Law enforcement and criminal justice sensitive facilities and restricted areas shall be prominently posted and separated from non-sensitive facilities and non-restricted areas by physical barriers that restrict unauthorized access. Every physical access point to sensitive facilities or restricted areas housing information systems that access, process, or display CJIS data shall be controlled during both working and non-working hours.

The agency shall control physical access by authenticating visitors before authorizing escorted access to the physically secure location (except for those areas designated as publicly accessible). The agency shall always escort visitors and monitor visitor activity. (CJIS Security Policy 5.9)

No information delivered from Nlets is to be used for any purposes other than that for which it was originally requested, except to review message traffic for quality control or for statistical analysis purposes.

Criminal Justice Information Service

A criminal justice agency is defined as a court, a government agency or any subunit of a government agency which performs the administration of criminal justice pursuant to a statute or executive order and which allocates a substantial part of its annual budget to the administration of criminal justice. State and federal Inspectors General Offices are included.

The administration of criminal justice is defined as the detection, apprehension, detention, pretrial release, post-trial release, prosecution, adjudication, correctional supervision, or rehabilitation of accused persons or criminal offenders. It also includes criminal identification activities, the collection, storage and dissemination of criminal history record information and criminal justice employment.

Administration of criminal justice includes crime prevention programs to the extent access to criminal history record information is limited to law enforcement agencies for law enforcement programs (e.g., record checks of individuals who participate in Neighborhood Watch or safe house programs) and the result of such checks will not be disseminated outside the law enforcement agency.

Access to criminal history record information (CHRI) is regulated by Title 28, Code of Federal Regulations, Section 20.33(a) (1), which allows dissemination of CHRI to criminal justice agencies for criminal justice purposes. Off-duty officers are not prohibited from accessing CHRI, but it becomes a question regarding whether the off-duty officer will be “switching hats” from off-duty officer/civilian to an active on-duty police officer. The fact they are a commissioned peace officer does not authorize an individual to make inquiries into the system. Access to the TCIC/TLETS is granted to law enforcement agencies for the purpose of performing the administration of criminal justice. Therefore, access will depend upon whether that individual is functioning, at the time of inquiry, in the capacity of a law enforcement officer, performing a criminal justice function.

Violations could result in the termination of access of a user or service to the agency. Individuals, businesses, organizations, government entities and criminal defense functions are not defined as criminal justice agencies, to include code enforcement (parking and animal control), tax, county, or municipal offices, and are not authorized to access under the above regulations. Non-criminal justice entities may obtain certain information and data directly from the agencies responsible for information such as vehicle and boat registration or driver license data.

5.12.1 Personnel Screening Requirements for Individuals Requiring Unescorted Access to Unencrypted CJI

1. To verify identification, state of residency and national fingerprint-based record checks shall be conducted prior to granting access to CJI for all personnel who have unescorted access to unencrypted CJI or unescorted access to physically secure locations or controlled areas (during times of CJI processing). However, if the person resides in a different state than that of the assigned agency, the agency shall conduct state (of the agency) and national fingerprint-based record checks and execute a NLETS CHRI IQ/FQ/AQ query using purpose code C, E, or J depending on the circumstances. When appropriate, the screening shall be consistent with:
 - a. 5 CFR 731.106; and/or
 - b. Office of Personnel Management policy, regulations, and guidance; and/or
 - c. agency policy, regulations, and guidance.

Supplemental Guidance:

- d. Federal entities bypassing state repositories in compliance with federal law may not be required to conduct a state fingerprint-based record check.
- e. See Appendix J for applicable guidance regarding noncriminal justice agencies performing adjudication of civil fingerprint submissions.
- f. Fingerprint-based record checks may not be required for all cloud provider personnel depending upon the type of service offering and access to encryption keys.

- g. See Appendix G.3 for guidance on personnel screening requirements specific to cloud environments.
- 2. All requests for access shall be made as specified by the CSO. The CSO, or their designee, is authorized to approve access to CJI. All CSO designees shall be from an authorized criminal justice agency.
- 3. If a record of any kind exists, access to CJI shall not be granted until the CSO or his/her designee reviews the matter to determine if access is appropriate.
 - a. If a felony conviction of any kind exists, the Interface Agency shall deny access to CJI. However, the Interface Agency may ask for a review by the CSO in extenuating circumstances where the severity of the offense and the time that has passed would support a possible variance.
 - b. Applicants with a record of misdemeanor offense(s) may be granted access if the CSO, or his or her designee, determines the nature or severity of the misdemeanor offense(s) do not warrant disqualification. The Interface Agency may request the CSO review a denial of access determination. This same procedure applies if the person is found to be a fugitive or has an arrest history without conviction.
 - c. If a record of any kind is found on a contractor, the Criminal Government Agency (CGA) shall be formally notified, and system access shall be delayed pending review of the criminal history record information. The CGA shall in turn notify the contractor's security officer.
- 4. If the person appears to be a fugitive or has an arrest history without conviction, the CSO or his/her designee shall review the matter to determine if access to CJI is appropriate.
- 5. If the person already has access to CJI and is subsequently arrested and or convicted, continued access to CJI shall be determined by the CSO. This does not implicitly grant hiring/firing authority with the CSA, only the authority to grant access to CJI. For offenses other than felonies, the CSO has the latitude to delegate continued access determinations to his or her designee.
- 6. If the CSO or his/her designee determines that access to CJI by the person would not be in the public interest, access shall be denied, and the person's appointing authority shall be notified in writing of the access denial.
- 7. The granting agency shall maintain a list of personnel who have been authorized unescorted access to unencrypted CJI and shall, upon request, provide a current copy of the access list to the CSO.

It is recommended individual background re-investigations be conducted every five years unless Rap Back is implemented.

Texas CJIS System Access for Applicants or Employees

The CJIS System Access Policy applies to commissioned peace officers, terminal operators, and others with network access to CJIS systems as well as an employee who may have access to an area where this information is received, maintained, or stored either manually or electronically. To establish a practical process for screening in Texas that is consistent with the CJIS Security Policy requirements, TXDPS is applying the criminal history background screening requirements within the Texas Commission on Law Enforcement (TCOLE) licensing rules to persons requesting access to the Texas and national CJIS systems.

Offense	Original Application for Access	Person Who Already has Access
Felony Conviction	Permanent Disqualifier	Permanent Revocation of Access
Felony Deferred Adjudication	Permanent Disqualifier	Suspension of Access for 20 years
Class A Misdemeanor Conviction	Permanent Disqualifier	Suspension of Access for 10 years
Class A Misdemeanor Deferred Adjudication	Permanent Disqualifier	Suspension of Access for Term of Deferral
Class B Misdemeanor Conviction	Disqualifier for 10 years	Suspension of Access for 10 years
Class B Misdemeanor Deferred Adjudication	Disqualifier for 10 years	Suspension of Access for Term of Deferral
Open Arrest for Any Criminal Offense (Felony or Misdemeanor)	Disqualifier until Disposition	Maintain Access Pending Court Disposition
Family Violence Conviction	Permanent Disqualifier	Permanent Revocation of Access

The TXDPS does not need to review every applicant. Local agency administrators may authorize or deny access to the Texas and FBI systems. When the local criminal justice agency is reviewing an individual's criminal history record information, the TXDPS considers a deferred adjudication as though it was a conviction for screening purposes. In instances where there are any questions, please contact the Manager of the Crime Information Bureau.

Both Class A and B convictions/deferred adjudications can receive an agency sponsored waiver after five years from final disposition. If approved, agency sponsored waivers are only valid at that agency and cannot transfer with the individual. Offenses that were committed while the individual was a juvenile will receive the same consideration and will be held to the same standard as adult offenses. Agencies may apply for an agency sponsored waiver for the individual within five years from the final disposition regardless of the level of the offense (felony or misdemeanor), unless the individual was tried as an adult.

The agency head must articulate in writing that mitigating circumstances existed with the case and must attest to the value of the individual to the criminal justice community. The request shall also include a statement that the public interest would be served by reducing the denial period. These requests may be sent to tlets@dps.texas.gov or mailed to the following address:

Texas Department of Public Safety - Crime Records Service – MSC 0233
Attn: Manager, Crime Information Bureau
P.O. Box 4143, Austin, Texas 78765-4143

TCOLE Licensed Personnel

TXDPS will allow access to the Texas and FBI systems when a peace officer, communications officer or corrections officer has a valid active license from the Texas Commission on Law Enforcement (TCOLE). The officer's access will not be revoked if the TCOLE license remains valid and active regardless of any criminal history background.

Dissemination Policies

NCIC Dissemination Policies

The data stored in the NCIC system, and the Interstate Identification Index (III) files are documented criminal justice information and must be protected to ensure correct, legal, and efficient dissemination and use. It is incumbent upon every agency operating an NCIC terminal to implement the necessary procedures to make that terminal secure from any unauthorized use. Departure from this responsibility warrants the removal of the offending terminal from further NCIC participation.

Information can be obtained from NCIC and the III files both directly and indirectly. Direct access is terminal access and dissemination within that terminal agency. Indirect access is non-terminal access outside of an agency with direct access. The individual receiving a request for criminal justice information must ensure the person requesting the information is authorized to receive the data. Unauthorized request or receipt of NCIC material could result in administrative or criminal proceedings brought against the agencies and/or the individuals involved.

Motor Vehicle Record Dissemination Policies

Texas Transportation Code Section §730.004

Prohibition on Disclosure and Use of Personal Information from Motor Vehicle Records

Notwithstanding any other provision of law to the contrary, including Chapter 522, Government Code, except as provided by Sections 730.005-730.007, an agency may not disclose personal information about any person obtained by the agency in connection with a motor vehicle record.

Driver Privacy Protection 18 U.S.C. Article §2721

Prohibition on Release and Use of Certain Personal Information from State Motor Vehicle Records

- a) In General. A state department of motor vehicles and any officer, employee, or contractor thereof, shall not knowingly disclose or otherwise make available to any person or entity:
 - 1) personal information, as defined in 18 U.S.C. 2725(3), about any individual obtained by the department in connection with a motor vehicle record, except as provided in subsection (b) of this section; or
 - 2) highly restricted personal information, as defined in 18 U.S.C. §2725(4), about any individual obtained by the department in connection with a motor vehicle record, without the express consent of the person to whom such information applies, except uses permitted in subsections (b)(1), (b)(4), (b)(6) and (b)(9): *Provided*, that subsection (a)(2) shall not in any way affect the use of organ donation information on an individual's driver's license or affect the administration of organ donation initiatives in the states.

18 U.S. Code §2725. Definitions

- 1) "Motor Vehicle Record" means any record that pertains to a motor vehicle operator's permit, motor vehicle title, motor vehicle registration or identification card issued by a department of motor vehicles.
- 2) "Person" means an individual, organization or entity, but does not include a State or agency thereof.
- 3) "Personal Information" means information that identifies an individual, including an individual's photograph, social security number, driver identification number, name, address (but not the 5-digit zip code), telephone number and medical or disability information, but does not include information on vehicular accidents, driving violations and driver's status.¹
- 4) "Highly Restricted Personal Information" means an individual's photograph or image, social security number, medical or disability information; and
- 5) "Express Consent" means consent in writing, including consent conveyed electronically that bears an electronic signature as defined in section 106(5) of Public Law 106–229.

Texas Transportation Code Section §521.060

Emergency Contact and Medical Information Databases

- a) The department shall maintain in its files a record of the name, address, and telephone number of everyone identified by the holder of a driver's license or personal identification certificate as an individual the holder authorizes to be contacted in the event that the holder is injured or dies in or as a result of a vehicular accident or another emergency situation. In addition, the department shall maintain in its files a record of any medical information described by Section 521.125(a) that is provided to the department under Subsection (c) or any health condition information that is voluntarily provided to the department under Section 521.142(h).

- b) A record maintained by the department under Subsection (a) is confidential and, on request, may be disclosed:
- 1) only to a peace officer in this or another state.
 - 2) only if the peace officer is otherwise authorized to obtain information in the driver's license or personal identification certificate files of the department; and
 - 3) only for the purpose, as applicable, of contacting a named individual to report the injury to or death of the holder of the driver's license or personal identification certificate, learning the nature of any medical information reported by the person who holds the driver's license or identification certificate or learning whether the person who holds the driver's license or identification certificate has a health condition that may impede communications with the peace officer.

Non-Law Enforcement Access to TXDMV

The [Texas Department of Motor Vehicles](#) allows individuals or companies to establish a motor vehicle Query account allowing access through a secure website for: City/county code enforcement, auto dealers, auto auction, wrecker services, salvage yards, insurance companies, bank, credit unions, title services and collection agencies, university, colleges and private investigators. Vehicle Registration information obtained through TLETS may not be released to private citizens for any reason.

To request personal information, citizens complete a Request for Texas Motor Vehicle Information (VTR-275) form and certify the information will be used for a lawful, permitted purpose. Information can be found on the DMV website - <http://www.txdmv.gov>

Non-Law Enforcement Access to Driver License Records

It is a TLETS violation for an agency to run a driver license record for non-law enforcement purposes, including insurance on those who operate city or county vehicles. A municipal or county tax office, code enforcement or other non-criminal justice agencies may obtain driver license information from DPS E-Commerce section at: E.Commerce@dps.texas.gov or 512-424-2032. TXDPS DLD will respond to eligible non-law enforcement requests for information stored in the driver license record database. TXDPS does not support requests for out-of-state Driver License information for non-law enforcement purposes.

For a step-by-step guide on requesting information, click on the Information box on the Contractor Driver Records URL Address:

www.texasonline.state.tx.us/NASApp/txdps/TXDPSContractorManager

Criminal History Record Information (CHRI) Dissemination Policies

The Privacy Act of 1974 requires the FBI's CJIS Division to maintain an audit trail of the purpose for each disclosure of a criminal history record and the recipient of each record. Therefore, all III query and record request messages must include the purpose for which the subject's record information is to be used. In addition to the purpose code requirement for each III transaction, all users are required to provide the reason for all III transactions upon request by the NCIC System managers/representatives, CSA representatives and local agency administrators. While the purpose code provides some lead information, it only provides a minimal audit trail. Requiring the reason for all III inquiries will assist in ensuring that III transactions are run for authorized purposes and that purpose codes are correctly used.

Automated Logging of Criminal History Record Information

Automated logging occurs when an operator completes the ORI, Operator, Requestor, Attention, the reason requested and identifiers fields in QH/QR inquiries.

Secondary Dissemination of CHRI

Secondary dissemination is the release of CJI from an agency to an authorized recipient agency that has not been previously identified in a formal information exchange agreement. If CHRI is released to another authorized agency, that is not part of the agency's primary information exchange agreement(s), the releasing agency must log such dissemination (Per CJIS Security Policy 5.1.3).

A secondary dissemination log shall be maintained for a minimum of one year on all CHRI transactions. The log shall clearly identify the operator, the authorized receiving agency, and the secondary recipient.

Michael Morton Act

Morton was convicted in 1987 and sentenced to life in prison for the murder of his wife. He was exonerated in 2011 after DNA testing connected another man to the brutal crime. In their investigation, Morton's lawyers discovered the prosecutor in the original case had withheld critical evidence pointing to the real killer which would have spared Morton the quarter-century he spent behind bars. Since his exoneration, Morton has lobbied lawmakers to pass legislation preventing others from suffering the same fate.

Under Texas Code of Criminal Procedure Article §39.14 Discovery, prosecutors are required to turn over evidence to defendants accused of crimes and to keep a record of the evidence they disclose. The landmark 1963 U.S. Supreme Court ruling in *Brady v. Maryland* already requires prosecutors to give defendants information material either to guilt or to punishment. The Morton Act requires disclosure of evidence regardless of its materiality to guilt or punishment. A court order must be granted for the defense to view the criminal history record information.

Texas Code of Criminal Procedure Article 39.14. DISCOVERY.

(a) Subject to the restrictions provided by Section 264.408, Family Code, and Article 39.15 of this code, as soon as practicable after receiving a timely request from the defendant the state shall produce and permit the inspection and the electronic duplication, copying, and photographing, by or on behalf of the defendant, of any offense reports, any designated documents, papers, written or recorded statements of the defendant or a witness, including witness statements of law enforcement officers but not including the work product of counsel for the state in the case and their investigators and their notes or report, or any designated books, accounts, letters, photographs, or objects or other tangible things not otherwise privileged that constitute or contain evidence material to any matter involved in the action and that are in the possession, custody, or control of the state or any person under contract with the state. The state may provide to the defendant electronic duplicates of any documents or other information described by this article. The rights granted to the defendant under this article do not extend to written communications between the state and an agent, representative, or employee of the state. This article does not authorize the removal of the documents, items, or information from the possession of the state, and any inspection shall be in the presence of a representative of the state.

Storage and Destruction of CHRI

When CHRI is stored, agencies shall establish appropriate administrative, technical, and physical safeguards to ensure the security and confidentiality of the information. These records shall be stored for extended periods only when they are key elements for the integrity and/or utility of case files and/or criminal record files (Per CJIS Security Policy 4.2.4).

CHRI shall be securely disposed of when no longer required, using formal procedures. Formal procedures for the secure disposal or destruction of physical media shall minimize the risk of sensitive information compromise by unauthorized individuals. Physical media shall be destroyed by shredding or incineration. Agencies shall ensure the disposal or destruction is witnessed or carried out by authorized personnel (Per CJIS Security Policy 5.8).

CHRI Related Laws

Access to Certain Information by Public

Texas Government Code Section §411.135

- a) Any person is entitled to obtain from the department:
 - 1) any information described as public information under Chapter [62](#), Code of Criminal Procedure, including, to the extent available, a recent photograph of each person subject to registration under that chapter; and
 - 2) criminal history record information maintained by the department that relates to the conviction of or a grant of deferred adjudication to a person for any criminal offense, including arrest information that relates to the conviction or grant of deferred adjudication.
- b) The department by rule shall design and implement a system to respond to electronic inquiries and other inquiries for information described by Subsection (a).
- c) A person who obtains information from the department under Subsection (a) may:
 - 1) use the information for any purpose; or
 - 2) release the information to any other person.

The public may obtain Texas conviction and/or deferred adjudication records of an offender directly from the DPS Public Site <https://publicsite.dps.texas.gov/ConvictionNameSearch/>. For further information, contact the Criminal History Inquiry Unit at 512-424-5079.

Dissemination of Criminal History Record Information

Texas Government Code Section §411.083

- a. Criminal history record information is confidential information for the use of the department and, except as provided by this subchapter or Subchapter E-1, may not be disseminated by the department.
- b. The department shall grant access to criminal history record information to:
 - 1. criminal justice agencies.
 - 2. noncriminal justice agencies authorized by federal statute or executive order or by state statute to receive criminal history record information.
 - 3. the person who is the subject of the criminal history record information.

DPS Crime Records Division disseminates criminal history information to the person who is the subject of the criminal history record information. Agencies receiving such requests from citizens should direct them to the Crime Records Service Criminal History Inquiry Unit at (512) 424-5079. There is a fee charged for this service.

Unauthorized Obtaining Use or Disclosure of Criminal History Record Information; Penalty.

Texas Government Code Section §411.085

1. A person commits an offense if the person knowingly or intentionally:
 - a. obtains criminal history record information in an unauthorized manner, uses the information for an unauthorized purpose or discloses the information to a person who is not entitled to the information; or
 - b. violates a rule of the department adopted under this subchapter.
2. An offense under Subsection (a) is a Class B misdemeanor, except as provided by Subsection (c).
3. An offense under Subsection (a) is a felony of the second degree if the person:
 - a. obtains, uses, or discloses criminal history record information for remuneration or for the promise of remuneration; or
 - b. employs another person to obtain, use or disclose criminal history record information for remuneration or for the promise of remuneration.
4. The department shall provide a copy of this section to:
 - a. each person who applies for access to criminal history record information maintained by the department; and
 - b. each private entity purchasing criminal history record information from the department.

Sanctions for System Misuse

The TLETS Agency/Equipment Agreement outlines the duties and responsibilities of the Department of Public Safety and your agency. This agreement is executed by the agency administrator (chief, sheriff, or agency administrator) and the director of TXDPS.

TCIC/TLETS violations must be reported to TCIC Audit. Violations of the TLETS rules, regulations, policies and procedures or any other misuse of the system will result in a formal notification to the agency administrator. The agency is responsible for determining disciplinary actions to include termination or criminal prosecution. The Department of Public Safety reserves the right to immediately suspend service to an agency when applicable policies are violated.

Vehicle Registration

Registration information for vehicles titled in Texas is available through TLETS from the Texas Department of Motor Vehicles (TXDMV) Registration and Title System (RTS). Registration for vehicles registered in other states is available through Nlets. Vehicle registration information obtained from the TLETS and Nlets systems is to be used for criminal justice and law enforcement purposes only and shall not be disseminated to the public. It is not to be used in the collection of parking tickets or taxes.

Texas Vehicle Registration

TLETS users are allowed a maximum of five (5) inquiries in a single transmission.

Samuel Allen Law

Effective September 1st, 2019, the Samuel Allen Law allows anyone diagnosed with a communication impediment the option for disclosure when registering their vehicle with the Texas Department of Motor Vehicles. Common diagnoses include autism, mild intellectual disability, deafness/hard of hearing, cerebral palsy, speech and language disorders, Down syndrome, brain injury and Parkinson's disease.

Texas REG transaction returns with a positive communication impediment indicator, COMM IMPED: Y, will display the following banner at the top of the TLETS return:

Texas Vehicle Registration Return Information

The Registration and Title System (RTS) responds with different information in the returns to include stolen verify TCIC by VIN, personalized license plates, plate with owner, dealer plates, temporary e-TAG, voided plate, and disabled person placard. RTS responses often include brief remarks with additional information about the vehicle registration.

STOLEN VERIFY TCIC BY VIN

In Texas registration returns, most comments pertain to titling and licensing, however TLETS users should pay special attention to the comment: **** STOLEN**** VERIFY TCIC BY VIN. The DMV database on vehicles entered as stolen in TCIC is not updated on a 24/7 basis. After a vehicle is recovered, it may take several days before the stolen vehicle remark is removed.

When receiving the comment **** STOLEN**** VERIFY TCIC BY VIN, operators should inquire into TCIC using the stolen vehicle Query (QV) to verify the status of the vehicle before acting. If the remark remains on the record for more than five days after the record has been cleared from the TCIC/NCIC, an AM should be sent to TCIC Operations at CRDP.

License Plate with Owner

Vehicle dealers are required to remove license plates and registration stickers from passenger cars and trucks purchased or received in trade. By keeping the license plate assigned to an individual, law enforcement and homeland security can trace the authorized owner(s). In private sales, the seller has the option of removing the vehicle license plate from the vehicle being sold and a temporary tag can be placed on the vehicle. DMV encourages the seller to retain the plates of their vehicle and transfer them to another vehicle or destroy the license plates. In Texas registration returns, LICENSE PLATE STATUS: PLATE WITH OWNER indicates whether the plate has been reassigned to another vehicle or not successfully reassigned to another vehicle.

Temporary eTAG

Temporary eTAG are to be placed on all new or used vehicles and trailers sold until the license plate is received. The owner is required to carry the buyer's receipt when a vehicle is displaying temporary eTAG until it is registered and titled in their name. Temporary eTAG are encompassing of Buyer, Dealer (vehicle specific & agent specific) and Converter tags.

On July 1, 2025, a [new law*](#) requires all licensed Texas dealers to use the TxDMV webDEALER system to electronically process title and registration for vehicle sales. Dealers without webDEALER accounts will not be able to complete sales transactions beginning July 1, 2025. The webDEALER|eTAG system is designed to make processing dealer tags fast and easy for dealerships throughout the state while making temporary tag information available in almost real-time to law enforcement. *<https://www.txdmv.gov/hb718>

No Record Response

A RESPONSE--NO RECORD IN RTS DATABASE will be returned when TXDMV has searched all possible data sources and there is no matching information for the search criteria used. The National Insurance Crime Bureau (NICB) database can be used to obtain additional information.
<https://www.nicb.org/>

Manual Vehicle Registration Check

Query registration using the Enhanced Complete registration type before requesting a manual check. Send an administrative message to 67X1, DPS AUSTIN Communications ATTN: DMV. Include the specific reason for the request. Information is available Monday-Friday 8am-5pm.

Disabled Person Placard

The TXDMV Disabled Person Identification Placard information is available through the Electronic Placard Database (EPD). The temporary disabled person placard is red, and the first character will be R followed by eight numbers and ending with P. Example: R12345678P. The permanent disabled person placard is blue, and the first character will be B followed by eight numbers and ending with P.

Disabled Person Placard information can be made by querying the REG transaction form using the Placard (PLCD) field or the RQ transactions using the License Plate (LIC) field. When using the LIC field, TXDMV will check RTS database and will perform a cross search into the Placard database for a possible match. The return will contain information on the person with the disability or an institution licensed to transport persons with disabilities defined under Texas Transportation Code Chapter 681.

TexasSure - Financial Responsibility Verification Program (FRVP)

TexasSure is a database matching personal vehicle currently registered in Texas with personal insurance policies in Texas to verify financial responsibility. Vehicles with expired registration for over 18-months or vehicles registered in Texas but insured out-of-state will not be included in the TexasSure database. More information is available at: www.texassure.com or by contacting TexasSure@tdi.texas.gov.

Passenger vehicles insured under a commercial fleet or business vehicle policy may not be included in the database and may return an UNCONFIRMED response. Some commercial vehicle companies voluntarily report to TexasSure, but most policies do not have the information required for the match process.

This tool is available to law enforcement personnel, but it does not provide real-time verification of insurance. It is updated on a weekly basis; however, it may take one to three weeks for new information to be available in the database. It is designed to incorporate a grace period allowing insurance policy changes without penalizing the driver.

Policy changes can occur any time or at expiration, so two grace periods exist:

- Expired Policy – 21-day grace period to renew coverage. If the last matched policy is more than 21 days expired and a new policy has not matched to the vehicle, the response will change to Unconfirmed.
- Policy Change – 45-day grace period to change insurance companies. If a policy is no longer being reported and a new policy has not matched to the vehicle, the response will change to Unconfirmed on day 46.

The TexasSure database is only for vehicle registration class codes requiring financial responsibility. The following are excluded registration class codes:

- | | |
|---|--------------------------------------|
| • 5-Yr Rental Trailer | • Log Loader (commercial class code) |
| • 5-Yr Token Trailer | • 5-Yr Apportioned Trailer |
| • Golf Cart | • Foreign Organization |
| • ATV | • 5-Yr Heavy Rental Trailer |
| • Disaster Relief (commercial class code) | • Disaster Relief Trailer |
| • Driver's Education | • Personalized Dealer |
| • Farm Trailer | • Personalized Dealer Motorcycle |
| • Machinery (commercial class code) | • Exempt Moped |
| • Oil Well Permit (commercial class code) | • Annual Permit Trailer Plate |
| • Soil Conservation Trailer | • Recreational Off-Road Vehicle |
| • Token Trailer | • Title Only |
| • Trailer | • Token Trailer Fleet |
| • Travel Trailer | • Fleet Token Trailer (5-Yr) |
| • Exempt | • Fleet Trailer |
| | • Antique Trailer |

Texas Transportation Code Section 601.053. Evidence of Financial Responsibility

(c) Subsection (b) does not apply if the peace officer determines through use of the verification program established under Subchapter N that financial responsibility has been established for the vehicle. A peace officer may not issue a citation for an offense under Section 601.191 unless the officer attempts to verify through the verification program that financial responsibility has been established for the vehicle and is unable to make that verification.

DPS does not consider the information provided to be adequate probable cause to stop a vehicle. Drivers are still required to carry proof of insurance. The database can only be used as a tool to verify insurance once a stop has taken place.

While some local jurisdictions have ordinances allowing vehicles without insurance to be impounded, responses of Unconfirmed, Verify Manually or Multiple does not provide authority to impound the vehicle based on the Texas Transportation Code. Officers should verify insurance through existing methods before taking any action.

Financial Responsibility Verification Program Returns

Possible responses to a query submitted to the Financial Responsibility Verification Program:

- Confirmed
- Unconfirmed
- Verify Manually
- Multiple

Confirmed Responses

A Confirmed response indicates the vehicle was in the database and may indicate one of the following:

- Vehicle has valid insurance.
- The insurance expired less than 21 days ago.
- The policy was canceled, but it has been less than 45 days since the insurer stopped reporting the policy to TexasSure.
- The wrong policy is incorrectly matched to the vehicle.

Routine Return – Record is Confirmed

Texas License Plate Reader Query

License Plate Reader (LPR) or Automated License Plate Reader (ALPR) technology provides Texas law enforcement with automated detection of a vehicle's license plate as they pass the reader. The LPR system is programmed to check all vehicles in the same manner and is an objective non-discriminatory public safety tool. TXDPS has created a License Plate Reader (LPR) data-sharing program accessed via TLETS. The QLP file remains in TCIC for three years from the date of collection.

Nlets Vehicle Registration Transactions

Vehicle registration information is available through Nlets for all 50 states, as well as the Diplomatic, General Service Administration and Mexican Carrier and Authorization License Plate files. In addition, inquiries can be made into the NICB Border Crossing and National Vehicles Services License Plate Reader files. A single inquiry may be made with up to five destinations.

To access information, use destination code:

US	Diplomatic Vehicles
GS	General Service Administration (GSA) Vehicles
MX	Mexican Commercial Vehicles
NA	NCIC Border Crossing
VS	National Vehicle Service
LP	License Plate Readers

Query Registration by LIC or VIN Number (RQ)

Financial Responsibility Type (FRT)

Out-of-State Vehicle Registration

Vehicle registration information is available from all 50 states by using the State or Region Code in the Destination field. Selecting a Region Code will submit the inquiry to each of the states within that region. Vehicle registration inquiries to Missouri (MO) by VIN require the vehicle make and year.

Responses are not standardized and will vary substantially in format from state to state. Typical abbreviations used in responses are:

Abbreviations	Description
LIC	License Plate Number
LIT	License Plate Type
LIY	License Plate Year
VIN	Vehicle Identification Number
VYR	Vehicle Year
VMA	Vehicle Make
VMO	Vehicle Model
VST	Vehicle Style
VCO	Vehicle Color

Tribal License Plates

Many Indian Nations issue license plates. Each transaction will return two responses: one from the state and one from the Indian Nation. Contact the Indian Nation for vehicle registration if No Record response is returned.

Tribal Institute (links to Tribal Police): www.tribal-institute.org/lists/enforcement.htm

Bureau of Indian Affairs: www.bia.gov

Diplomatic License Plate File

The U.S. Department of State, Office of Foreign Missions maintains vehicle registration information on diplomatic license plates issued to diplomats, counsels, and staff of foreign missions. Inquiries into the Diplomatic License Plate file can be made using the destination code of US.

Government License Plate File

The General Services Administration (GSA) maintains government license plate records. Inquiries on government license plates can be made using the destination code of GS. When inquiring into a government agency plate, the License Plate (LIC) must begin with the appropriate agency code.

Mexico Commercial License Plate File

Inquiries to the destination code of MX will cause a query into the Mexico Commercial License Plate File. The Mexico Commercial License Plate File is housed in Mexico City and is provided to Nlets through the Federal Motor Carriers Safety Administration. All commercial vehicles in Mexico that cross Mexican state boundaries and into the United States are required to be federally registered and included in this file. If the vehicle is commercial and you receive a "not on file", it is not registered and is in violation of US-DOT operating authority. Queries can be run by license plate only.

More information may be obtained by emailing FMCSASupport@TechAnax.com

National License Plate Reader Sharing Program

Inquiries in the License Plate Recognition and Reader (LPR) Systems can be accessed with the following destination codes:

NA	US Customs and Border Protection/National Insurance Crime Bureau Database
VS	National Vehicle Service Database
LP	Both the USCBP/NICB and the NVS Databases

US Customs and Border Protection

License Plate Readers were initially installed by the United States Custom and Border Protection (CBP) to develop and track movement of vehicles as they crossed through the ports of entry along the southwest border between the United States and Mexico and the northern border between the United States and Canada. One of the benefits of the LPR is their effectiveness relating to vehicle theft initiatives regarding stolen vehicles entering and exiting the United States. Because of their benefits of providing investigative information regarding stolen vehicles, CBP agreed to provide NICB the raw LPR data as a tool in its efforts to prevent and investigate vehicle theft and insurance fraud. The NICB in cooperation with the US CBP and Nlets, allows an RQ transaction sent to destination NA to initiate query to NICB LPR file.

The CBP/NICB response includes the direction of the crossing (inbound or outbound), the location of the border crossing camera, the crossing date and time, the license plate number, the state, and country of the crossing. The CBP/NICB response could return multiple messages when a vehicle has multiple trips across the border. Typically, a message will contain up to seven crossings arranged in chronological order.

USCBP LPR Return

ACTION.

National Vehicle Service

The National Vehicle Service (NVS) is a not-for-profit corporation that is the only worldwide organization providing unique vehicle related theft/fraud and vehicle related data and technological assistance free to the law enforcement community. They also provide assistance to vehicle finance, insurance, and rental car companies for a reasonable fee . NVS has a repository of license plate reader data gathered from towing, repossession companies, parking lots, garages, and toll way systems available to the law enforcement through Nlets. This repository is primarily for use in investigations where the NVS proactively searched the database against the stolen vehicle file provided by the FBI.

To retrieve possible vehicle location information from the NVS data repository, use RQ transaction with the destination code of VS. If there is a positive match, the return may or may not contain the location. If the location is not included, this may indicate the vehicle was parked on private property and not at an intersection. After registering their ORI, agencies can then access the NVS website at www.nvslens.org to obtain full details on the vehicle, including a map of the location and a photo of the vehicle.

NVS LPR Return

NCIC Vehicle File

For NCIC purposes, a vehicle is any motor-driven conveyance (except a boat) designed to carry its operator. In addition to conveyances meeting this definition, aircraft and trailers are also to be entered in the Vehicle File.

The **Vehicle File** contains records for stolen vehicles, vehicles used in the commission of a felony or vehicles seized based on a federally issued court order. Records for felony vehicles and vehicles subject to seizure remain active for 90 days from the date of entry. Records for stolen vehicles remain active for the balance of the year of entry plus four years.

The **License Plate File** contains records for stolen passenger automobile plates and special plates such as antique, bus, commercial, farm vehicle, motorcycle, trailer, truck, and U.S. Government vehicles. License plate records remain active for the balance of the year of entry plus four years.

The **Vehicle/Boat Part File** contains records for any serially numbered component from a vehicle or boat and ownership documentation for a vehicle or boat. Part records remain active for the balance of the year of entry plus four years.

The **Stored/Abandoned Vehicle File** contains records for vehicles stored on police property or in a licensed storage facility. Stored/Abandoned vehicle records remain in TCIC for one year from the date of entry.

Query Vehicle Requirements

Inquiries can be made using the NIC only or LIC, VIN and OAN either separately or in combinations, such as VIN and OAN or LIC and VIN, etc. A query of this type will search the VIN, SER and OAN Fields of all Vehicle and Vehicle/Boat Part File records, as well as the VIN Field of all person records. The LIS and VMA are not required for a vehicle query but should be included.

When inquiring by LIC, including the LIS will limit the search to records on file containing matching LIS information and prevent unnecessary \$.H. administrative messages from being generated. NCIC does not limit the search of felony vehicle records by LIS information but runs by using LIC only.

Related Search Hit (RSH)

Regional Database Information

Regional Database (RDB1)

Regional Database (RDB2)

Query by LIC

If a LIC is more than eight characters, the NCIC LIC search method uses the leftmost eight characters of the LIC. Complete LICs should be used for query whenever available. A caveat will appear to warn agencies which receive a positive vehicle response that any match(s) is not exact as to all LIC characters. The following will appear at the beginning of the message immediately before the message key translation:

RECORD NIC/V123456789 IS BASED ON A PARTIAL LIC SEARCH - VERIFY ALL DATA BEFORE TAKING ACTION BASED ON THIS RESPONSE

Query by VIN

If a VIN is more than eight characters, the NCIC VIN search method uses the rightmost eight characters of the VIN. Complete VINs should be used for query whenever available. A caveat will appear to warn agencies which receive a positive vehicle response that any match(s) is not exact as to all VIN characters. The following will appear at the beginning of the record immediately before the message key translation:

RECORD NIC/V123456789 IS BASED ON PARTIAL VIN SEARCH - VERIFY ALL DATA BEFORE TAKING FURTHER ACTION BASED ON THIS RECORD

Related Search Hit

Inquiries may also contain an RSH Field. If the RSH is Y, secondary hit responses will be returned for all linked records. The NCIC System links records when: 1) ORI/OCA (Agency Identifier/Case Number) matches the primary hit response and the dates of entry for those records are within 30 days of each other and 2) the LKI/LKA (Linkage Agency/Linkage Agency Case Number) are the same as ORI/OCA contained in the primary hit response.

Regional Database Information

TLETS hosts four regional databases for the entry of local records not meeting NCIC criteria. For regional database contact information, email TLETS@dps.texas.gov.

- AMR (Amarillo Regional System)
- DTJ (City of Dallas)
- SET (Harris County/JIMS)
- TCS (Travis County)

Nlets LoJack Transaction

LoJack is a Stolen Vehicle Recovery System currently operational in 26 states. The LoJack system components include computer systems interfaced to Law Enforcement agencies in such a way that the entry of a stolen vehicle report by law enforcement will result in the activation of a LoJack Unit in the stolen vehicle so the police can quickly find and recover the stolen vehicle.

When the stolen vehicle is activated, police vehicles equipped with LoJack tracking devices receive signal strength, direction and a five-character Reply Code from the stolen vehicle. When the five-character reply code is queried, the law enforcement system returns the stolen vehicle report so they can identify and recover the stolen vehicle. When the stolen vehicle report is canceled or cleared, the stolen vehicle signal is automatically de-activated.

Information on law enforcement access to LoJack can be found at <https://lojack.com/for-law-enforcement/>.

Nlets Hazardous Material File

The purpose of this file is to provide Nlets users with online information on hazardous materials. The query will be made on a four digit internationally recognized code called a UN Number. This number is normally found on a placard on the vehicle and will relate directly to the hazardous material.

Query Hazardous Material (MQ)

*** Indicates Mandatory Field**

Header Information

Originating Agency Code (ORI)

Control Field (CTL)

Operator Information

***United Nations Number (UNN)**

The response will indicate a variety of information including:

- Chemical name
- Personal safety precautions
- General handling procedures
- Disposal methods
- Degree of hazard to public health
- Availability of countermeasure materials
- Administering first aid

The base file and updates are provided to Nlets by the Department of Transportation (DOT) and, with a few minor exceptions, will mirror the Department of Transportation's Emergency Response Guide.

The National Response Center is staffed 24/7/365 by qualified people who can assist you with hazardous materials. Each guide delivered by Nlets will refer to the National Response Center which can be reached by calling 800-424-8802.

NCIC Boat File

For NCIC purposes, a boat is defined as a vessel for transport by water, constructed to provide buoyancy by excluding water and shaped to give stability and permit propulsion.

Stolen boat records which contain a BHN, CGD or an OAN are retained in file for the balance of the year entered plus four years. If a record remains on file 90 days and it does not contain a BHN, CGD or OAN, the record is retired. The Abandoned/Stored Boat file contains records for boats stored on police property or in a licensed storage facility.

The **Stored/Abandoned Boat File** contains records for boats stored on police property or in a licensed storage facility. Stored/Abandoned boat records remain in TCIC for one year from the date of entry.

Query Boat Requirements

Inquiries can be made by using the REG and/or BHN. The complete registration number should be used although if it exceeds eight characters, NCIC will only search using the first eight characters. The state of registration cannot be used in a query. The complete boat hull number should be used if it does not exceed 20 characters. If the boat hull number exceeds 20 characters, the first 20 should be used.

Nlets Boat Registration

Boat registration information is managed by the [Texas Parks and Wildlife Department \(TPWD\)](#) for boats registered in Texas. Out-of-state boat registration information is managed by each state. Boat registration information is available through a Nlets Boat Registration query (BQ) to each state by boat registration (or document) number, boat hull number or owner name and date of birth. Each boat registration query can be sent to up to five state codes and/or regions. A destination code of Z1 will result in the query being directed to all states.

The United States Coast Guard Vehicle Identification System (VIS) consists of registration and ownership data from participating VIS states as well as those registered only through the USCG National Vessel Documentation Center and can be accessed with the destination code of CG.

NCIC Gun File

For NCIC purposes, a gun is defined as any weapon, including a starter gun, which is designed to or may be readily converted to expel a projectile by air, carbon dioxide or the action of an explosive. Included in this definition are antique guns, cannons, machine guns, pistols, rifles, shotguns, the frame, or receiver of any such weapon, any firearm muffler or firearm silencer, destructive devices such as grenades, mines, missiles and rockets and disguised guns such as knife guns, pen guns, belt buckles and cane guns. BB guns are excluded and should be entered in the Article File because the manufacturers of BB guns are not bound by the same statutes as are the manufacturers of the above-mentioned weapons.

A recovered gun is defined as an abandoned, seized or found weapon for which no stolen or lost report is on file. A record for a lost or missing gun might be traceable to a crime and may assist in the identification of a recovered gun. A record may be entered for a weapon believed to have been used in the commission of a felony if documented in the case file and the location of the weapon is unknown. Records for stolen, lost or felony guns remain on file indefinitely. Recovered gun records remain active for the balance of the year of entry plus two years.

Query Gun Requirements

Inquiries into the NCIC Gun File can be made by using SER, MAK and CAL, SER and MAK, SER and CAL or SER only. Query by SER and MAK is preferred as this type of query may limit the search and minimize the number of false positive responses. Inquiries may include the MOD Field but will not limit the response. It is essential that all identifying data in a positive response be compared with the weapon in question before further action is taken.

Serial Number

If more than one number appears on a weapon, the number on the frame should be inquired on first. If the response is negative, the agency should query the remaining numbers. If the serial number exceeds 20 characters, the rightmost 20 characters should be inquired upon first. If the response is negative, the leftmost characters should be queried.

Alphabetic characters appearing between numeric characters (embedded alphabetic characters) in a serial number are not considered for matching purposes since some agencies formerly placed records on file after deleting the embedded alphabetic characters. Thus, a search of serial number 369J257 would retrieve records with serial numbers 369257, 369M257 and 369J257. Letters appearing as a prefix or suffix to the numeric in a serial number are considered in the matching process and, therefore, are not affected by the rule applicable to embedded alphabetic characters.

If a gun SER is more than 20 characters, the NCIC gun SER search method uses the rightmost 11 characters of the gun SER. Complete gun SERs should be used for query whenever available. A caveat will appear to warn agencies that receive a positive gun response that any match(s) is not exact as to all SER characters. The following will appear at the beginning of the record immediately before the message key translation:

RECORD NIC/G123456789 IS BASED ON PARTIAL SER SEARCH - VERIFY
ALL DATA BEFORE TAKING FURTHER ACTION BASED ON THIS RESPONSE

Make

A query that contains serial number only or serial number and caliber will retrieve any record on file with a matching serial number. A query that contains make, serial number and CAL/45 will retrieve any record on file with a matching serial number regardless of the MAK field code or CAL code.

A query that contains serial number, a make other than CLT, REM, SW, or WIN, with a caliber other than 45 or without caliber, will retrieve any record on file with a make other than CLT, REM, SW or WIN and a matching serial number.

Any query that contains serial number, with caliber other than 45 or without caliber and MAK/CLT, REM, SW or WIN will retrieve any record on file with a matching serial number and the same make (CLT, REM, SW, or WIN) or MAK/US or USA.

- No Record

NCIC Securities File

For NCIC purposes, securities are identified as currency, e.g., Federal Reserve Notes, Silver Certificates, U. S. Notes, Canadian Notes and other foreign currency, etc., those documents or certificates that are generally considered to be evidence of debt (Treasury-issued bills, bonds and notes, municipal and corporate bonds, debentures, other non-personal notes, etc.) or ownership of property (common or preferred stock), excluding vehicle and boat ownership documents, documents which represent subscription rights (stock warrants, stock rights), other types traded in securities exchanges in the United States, except for commodities futures, postal and other types of money orders, traveler's checks, warehouse receipts, savings certificates and interest coupons on stocks and bonds.

Items which do not meet the definition for entry in any NCIC file are personal notes, bank drafts, cashier's checks, bank officer's checks, certified checks, personal checks, company checks, U.S. Treasury checks and other types of government checks (state and local), lost or stolen credit cards, gold or silver coins, gift certificates and savings and checking account passbooks. Serialized food coupons (stamps and books), ingots, lottery tickets and medals do not qualify as securities for NCIC purposes but may be entered in the NCIC Article File.

Serially numbered identifiable securities that have been stolen, embezzled, used for ransom, or counterfeited may be entered into the file if a theft report has been made. Records for ransom securities have unlimited retention. Stolen, embezzled, or counterfeited securities records, except traveler's checks and money orders, are retained in the NCIC Securities File for the balance of the year entered plus an additional 4 years. Traveler's checks and money orders are retained in file for the balance of the year entered plus 2 years.

Query Securities Requirements

A query of the Securities File should include TYP, SER and DEN. ISS should be included for securities other than U.S. Treasury issues and currency. A query may also be made by OWN, OWN and TYP, OWN and OCA, OWN and SOC or SOC only. Inquiries may be made using the NIC only, if available.

Denomination

A query containing BLANK in the DEN will pull only records that are entered with the word BLANK in the DEN. A query containing a face value (e.g., 50 or 28-75) in the DEN could pull records that have a matching DEN or DEN/BLANK.

Type

A query containing TYP data will limit the search to those security entries having a matching type of code or a type of code of AO (All other). Use of AO pulls any record having a matching SER and DEN regardless of the TYP code in the record. Furthermore, if the TYP is MO or PM, an NCIC search will return hits of both TYP/MO and TYP/PM records.

If TYP is PM (Postal Money Order), the SER Field must be ten characters. (Using the first ten digits of the serial number).

NCIC Article File

An article is defined as any item with a theft report if one of the following criteria is met:

- A record for any item in the theft report which is valued at \$500 or more and has a unique manufacturer-assigned serial number and/or an owner-applied number may be entered. Office equipment, television sets and bicycles may be entered regardless of value.
- If the aggregate value of property taken in one theft exceeds \$5,000, a record for any item in the theft report, regardless of value, having a unique manufacturer-assigned serial number and/or an owner-applied number may be entered.
- A record for any item in the theft report, regardless of value, having a unique manufacturer-assigned serial number and/or an owner-applied number may be entered if:
 - The circumstances of the theft indicate that there is a probability of interstate movement.
 - The seriousness of the crime dictates that an entry should be made for investigative purposes.

Stolen or lost credit cards, bank drafts, Automated Teller Machine (ATM) cards and checks, including cashier, certified, company, government (local, state, and federal), bank officer, personal and U. S. Treasury, are not to be entered in the NCIC Article File or any other NCIC file.

A record for a lost Public Safety, Homeland Security or Critical Infrastructure item of identification (category Q) or equipment (category Z) may be entered in NCIC if the entering agency has supporting documentation. Category code of T is available for the entry of stolen toxic, hazardous article records. Category code Z is used for the entry of stolen or lost Public Safety, Homeland Security, or Critical Infrastructure equipment or toxic or hazardous article records. Category code of Q is used for the entry of stolen or lost non-Public Safety, Homeland Security, or Critical Infrastructure equipment or toxic or hazardous article records.

Query Article Requirements

A query of the NCIC Article File must include type of article (TYP) plus Serial Number (SER) and/or Owner Applied Number (OAN). The numbers inquired upon will be searched as both a SER and an OAN. A query can be made using the NIC only.

NCIC Wanted Person File

NCIC defines a wanted person as an individual (including a juvenile who will be tried as an adult) with an outstanding warrant on file meeting the following criteria: federal warrant, felony, or serious misdemeanor warrant class B or above or a probation or parole violator for a federal, felony or serious misdemeanor crime. Wanted person records can be entered for lower offenses if the entering agency is willing to extradite or transport within the state.

Juveniles may be entered if they meet the following criteria: charged with the commission of a delinquent act considered a crime if committed by an adult and who has fled from the state where the act was committed or adjudged delinquent and has escaped from an institution or agency with the legal custody or supervision of such juvenile or who has absconded while on probation or parole. Juvenile status is determined by the laws of the state of residence of the parent, guardian or agency entitled to legal custody of such juvenile.

Wanted person records have an indefinite retention period.

Temporary Felony Want

A temporary felony want record, may be entered to establish a "want" entry when a law enforcement agency needs to take prompt action to apprehend a person (including a juvenile) who has committed, or the officer has reasonable grounds to believe has committed, a felony. This individual may seek refuge by fleeing across jurisdictional boundaries while circumstances prevent the immediate acquisition of a warrant.

A temporary felony want record must be specifically identified as such. The warrant for the arrest of the individual must be obtained as soon as possible and thereafter, the temporary felony want record must be either canceled and a permanent wanted person record must be entered or the record must be modified to the permanent wanted person record. A temporary felony want record will be retired at the end of 48 hours, and a \$.P. administrative message will be sent to the originating agency.

Query Wanted Requirements

The MKEs QW, QWA, QWE, QWF, QWS and ZW are used for Wanted Person File inquiries. Record responses will be filtered based on each individual MKE used at the time of query.

MKE	Description of Return Limitations
QW	Limits responses to possible extraditable misdemeanor records and felony records regardless of extradition (Excludes all non-extraditable misdemeanors records)
QWA	Returns all felony and misdemeanor records regardless of extradition
QWE	Limits responses to felony and misdemeanor records that are possibly extraditable from the inquiring agency's location
QWF	Limits responses to only felony records regardless of extradition
QWS	Serves states that use NCIC in lieu of a state warrant database
QW-X	Returns on the Exact Name and Date of Birth

Name Matching

The technique used to match the name in a query with the name in a record on file in NCIC is called the New York State Identification and Intelligence System (NYSIIS). NYSIIS coding is used in the Name (NAM), Alias (AKA), Person with Information Alias (PAK), Person with Information Name (PIN) and Protected Person Name (PPN) Fields of the person files and the Owner (OWN) Field of the Securities File where the owner is an individual. When the query includes both NAM and DOB, primary hits are determined by using a phonetic encoding of the last name and an exact match on the input month, day, and year of birth. An extended NYSIIS algorithm is used.

- If the input last name corresponds to a name within a list of common surnames, the primary hit is further qualified by comparing the first character of the input given name to the first character of a given name on a person's record.
- If the input given name corresponds to a list of NCIC nicknames, it is replaced by a corresponding proper name specified in the nickname for search purposes. For example, Bill is replaced with William and Betty is replaced with Elizabeth.
- If the input last name contains a hyphen (-), primary hits are determined by using each hyphenated name part as a last name as well as all combinations of the hyphenated name parts. For example, a surname of Saenz-Parada-Lopez will be searched as Saenz-Parada-Lopez, Saenz-Lopez-Parada, Lopez-Parada-Saenz, Lopez-Saenz-Parada, Parada-Lopez-Saenz, Parada-Saenz-Lopez, Saenz, Parada and Lopez.

Expanded Name Search

If the input value of ENS is the character Y and NAM and DOB are specified, primary hits are determined using each input name part as a last name, interchanging the remaining name parts as given names. For example, Bryan, Morgan Lee Bryan, Lee Morgan or Morgan, Lee Bryan or Morgan, Bryan Lee or Lee, Morgan Bryan or and Lee, Bryan Morgan.

Date of Birth

A query containing a DOB will search on the exact date of birth, therefore, additional inquiries may be made varying the year.

Expanded Date of Birth Search

If the input value of the EBS Field is the numeric 1, primary hits are determined by NCIC searching the exact month and day and a range of plus or minus one year of the input date of birth. If the input value of the EBS Field is the numeric 2, primary hits are determined by an NCIC search of records with the exact year and month and day of the input date of birth transposed.

If the input value of the EBS Field is the numeric 3, primary hits are determined by an NCIC search of records with the exact month and day, plus or minus one year and records with the month and day of the input date of birth transposed. If the EBS Field is not included or is blank, primary hits are determined by an NCIC search of records with the exact date of birth.

Sex and Race

Sex and race should be included to minimize multiple hits by limiting the scope of the name search. Including sex will cause NCIC to search only those records containing the same SEX code as the SEX code in the query. Also, the inclusion of race in a query can limit the search made by NCIC. Race codes will be searched when each is included in a query.

Race Code in Query		Race Codes Searched
A	Asian or Pacific Islander	All
I	American Indian or Alaskan Native	All
B	Black	All except White
W	White	All except Black
U	Unknown	All

Image Indicator (IND)

If the IND is Y, image data related to a primary hit response would be a mugshot, if available.

Files Cross-Searched in a Wanted Persons Query

The NCIC and TCIC systems cross-search the following files in response to a Person query.

NCIC/TCIC Wanted Person	NCIC Protective Interest
NCIC/TCIC Temporary Felony Want	NCIC Gang/TXGang
NCIC/TCIC Identity Theft	NCIC Registered Sexual Offender
NCIC/TCIC Violent Person	TCIC Handgun License
TCIC Threat Against Peace Officer Alert	NICS Denied Transaction
NCIC/TCIC Protection Order	NCIC Immigration Violator
NCIC Extreme Risk Protection Order	NCIC Foreign Fugitive
TCIC Conditions of Bond	NCIC Threat Screening Center
TCIC Child Safety Check Alert List	TCIC Guardianship Subject
NCIC/TCIC Missing Person	NCIC Article of Identification
NCIC Supervised Release	NCIC Securities

Wanted Person File inquiries will also cause an automatic cross-search of the Foreign Fugitive, Extreme Risk Protection Order, Missing Person, Gang, Threat Screening Center, Violent Person, National Sex Offender Registry, Supervised Release, Immigration Violator, Protection Order, Identity Theft, Protective Interest File, and NICS Denied Transaction Files. If vehicle identifiers are included in the inquiry, the Vehicle, Boat, Vehicle/Boat Part, and License Plate Files will also be searched. If MNU, SOC, or OLN is included in the inquiry, the Article File personal identifier records will also be searched.

If vehicle identifiers are included in the query, the Article, Boat, License Plate, Vehicle and Vehicle/Boat Part Files will be searched as well.

NCIC Image File

The NCIC Image file is associated with existing NCIC records to assist in identifying a person or property in the record. The types of images that can be stored for a person are mugshot, signature and identifying images. Identifying images can also be stored to help identify property. Articles, guns, parts, boats, and vehicles can be associated with an identifying image. Images stored as references are referred to as generic images. Securities File does not have image capability.

When a query for an image is received, information from the linked person or property record is returned as is the image record. Image Indicator must be set to Y for the image data (IMG) is returned. When the Image Indicator set to N, the image data is not returned.

In the case of the query specifying the NIC of a base record, all images associated with the base record would be returned in the same hit response.

File	IMT	Description	Maximum

NCIC Identity Theft File

The Identity Theft File will serve as a means for law enforcement to flag stolen identities and identify the imposter when encountered by law enforcement. In accordance with Texas Government Code §411.0421, a procedure has been established to assist law enforcement agencies in verifying an individual's identification has been used by another person.

This file is automatically cross searched with a Wanted Person query and can also be queried directly. The officer will receive a response listing the victim profile, including the password, thereby providing the officer with the information necessary to verify that the person encountered is the victim or that the person may be using a false identity.

The officer should be aware the individual should not be arrested or detained based solely upon the information provided in the positive response from the Identity Theft File. The response should be considered along with additional information or circumstances surrounding the encounter before the officer takes action. Information on deceased persons may also be entered into the Identity Theft File. If a police officer becomes aware of a deceased person's identity being stolen, that information can be entered into the file noting that the person is deceased.

NCIC Violent Person File

The Violent Person File (VPF) was designed to alert law enforcement officers that an individual they are encountering may have a tendency for violence against law enforcement, with at least one of the following criteria has been met:

1. Offender has been convicted for assault or murder/homicide of a law enforcement officer, fleeing, resisting arrest or any such statute which involves violence against law enforcement.
2. Offender has been convicted of a violent offense against a person to include homicide and attempted homicide.
3. Offender has been convicted of a violent offense against a person where a firearm or weapon was used.
4. A law enforcement agency, based on its official investigatory duties, reasonably believes the individual has seriously expressed his or her intent to commit an act of unlawful violence against a member of the law enforcement or criminal justice community.

This file is automatically cross searched with a Wanted Person query.

Positive Return - Does Not Require Hit Confirmation

WARNING-THE SUBJECT IN THIS RECORD HAS BEEN IDENTIFIED AS A VIOLENT OFFENDER. THE SUBJECT HAS A CRIMINAL HISTORY OF ASSAULTING LAW ENFORCEMENT OFFICERS. USE CAUTION IN APPROACHING THIS INDIVIDUAL. DO NOT ARREST OR DETAIN BASED SOLELY ON THIS INFORMATION.

TCIC Threat Against Peace Officer and Detention Officer Alert File

This file was created under Texas Government Code §411.048 (b) to establish, collect, and disseminate information relating to an individual's expression of intent to inflict serious bodily injury or death on a peace officer or Detention Officer and alert a peace officer of an expression of intent to inflict serious bodily injury or death on the officer.

Texas Government Code §411.048

(d) Before entering information collected under this section into the information system, a criminal justice agency must determine that the report described by Subsection (c): is not from an anonymous source; and consists of an expression of intent to inflict serious bodily injury or death on a peace officer or detention officer.

This file is automatically cross searched with a Wanted Person query and can also be queried directly.

NCIC Protection Order File

The Protection Order File (POF) contains court orders issued to prevent acts of domestic violence against a person or to prevent a person from stalking, intimidating, or harassing another person, as outlined in Texas Family Code Chapter 85. Orders are issued by both civil and criminal state courts. The types of protection orders issued, and the information contained in them vary from state to state.

Protection orders include any injunction, restraining order or any other order issued by a civil or criminal court for the purpose of preventing violent or threatening acts or harassment against, sexual violence or contact or communication with or physical proximity to another person including any temporary and final orders issued by civil or criminal courts whether obtained by filing an independent action or as a *pendente lite* order in another proceeding so long as any civil order was issued in response to a complaint, petition or motion filed by or on behalf of a person seeking protection and any support, child custody or visitation provisions, orders, remedies or relief issued as part of a protection order, restraining order or stay away injunction pursuant to local, state, tribal or territorial law authorizing the issuance of protection orders, restraining orders or injunctions for the protection of victims of domestic violence, dating violence, sexual assault or stalking.

Pendente Lite--During the proceeding or litigation, in a manner contingent on the outcome of litigation. (Black's Law Dictionary, 8th ed. 2004)

Additionally, reasonable notice and opportunity to be heard must be given to the person against whom the order is sought or, in the case of *ex parte* orders, notice and opportunity to be heard must be provided within the time required by state laws and in any event within reasonable time after the order is issued, sufficient to protect the respondent's due process rights.

Ex Parte--Done or made at the instance and for the benefit of one party only and without notice to or argument by, any person adversely interested, of or relating to court action taken by one party without notice to the other, usu. for temporary or emergency relief. (Black's Law Dictionary, 8th ed. 2004) *Ex Parte* orders would be entered as **temporary** protection order records.

Military Protection Order

A Military Protective Order (MPO) that serves the same general purpose of a court-issued protection order issued in a civilian court qualifies for entry. An MPO is issued by a commissioned officer as a lawful order under Title 10, United States Code (U.S.C.), Article 90, Assaulting or willfully disobeying superior commissioned officer, of the Uniform Code of Military Justice (UCMJ 10 [U.S.C. Chapter 47]).

When an agency enters a POF record with a Military Protective Order, PCO of 08 will be used with the following mandatory caveat in the MIS Field: THIS IS A MILITARY PROTECTIVE ORDER AND MAY NOT BE ENFORCEABLE BY NON-MILITARY AUTHORITIES. IF SUBJECT IS IN POSSIBLE VIOLATION OF THE ORDER, ADVISE THE ENTERING AGENCY (MILITARY LAW ENFORCEMENT).

For military protection orders, hit confirmation would not be required, as NCIC policy only requires hit confirmation when taking official action based on the order. However, local, state, federal and tribal authorities would be aware of the military protective order which would enhance officer safety and could then notify the entering agency (military law enforcement) that would take appropriate action.

This file is automatically cross searched with a Wanted Person query and will respond with active records only. It can also be queried directly and will respond with active, as well as expired records for up to five years beyond their expiration date.

Brady Record Indicator

Protection orders meeting certain criteria disqualify an individual from possessing, purchasing, or receiving a firearm per Federal Law 18, USC §922. An order that restrains an individual from harassing, stalking, threatening, or engaging in other conduct that would place an intimate partner in reasonable fear of bodily injury to the partner or a child of the partner disqualifies that individual from possessing, purchasing, or receiving a firearm.

If the criteria are met and the subject is considered Brady disqualified, Y would be returned in the BRD Field. This will cause a caveat to be generated as part of a response to an NCIC inquiry. Emergency or temporary orders issued ex parte do not meet the criteria specified by law, and, therefore, N would be returned in the field.

NCIC Extreme Risk Protection Order

The Extreme Risk Protection Order (ERPO) File contains orders issued by a criminal or civil court for temporarily restricting an individual from purchasing or possessing a firearm, ammunition, or other related items, based on a finding that they may pose a significant danger of personal injury to themselves or others. The types of ERPOs and the information contained in them vary from state to state. This file is automatically cross searched with a Wanted Person query.

TCIC Conditions of Bond

Bond conditions are court-imposed requirements that a defendant (adult or juvenile) on pre-trial release must follow until their case is resolved. A judge signs an order setting conditions of bond for release. Additional records may be into Condition of Bond file for the same offender if there are separate case numbers for each record entered.

This file is automatically cross searched with a Wanted Person query and can also be queried directly.

Bond Condition Examples:

1. Ignition Interlock Device
2. GPS Monitor
3. Alcohol Monitor
4. Curfew (See Bond Condition Remarks)
5. Home Confinement
6. No Communication with Protected Person
7. Prohibited from Protected Person/Child Residence, School, Day-Care Facility (See Bond Condition Remarks)
8. Supervised Access to Victim (See Bond Condition Remarks)
9. No Family Violence or Assault
10. No Direct or Indirect Threatening or Harassment of Protected Person, Family or Pets
11. No Contact Except through Attorney or Court-Appointed Person
12. No Firearm Possession
13. Stay Away (See Bond Condition Remarks)
14. Other (See Bond Condition Remarks)

TCIC Child Safety Check Alert List

The Child Safety Check Alert List was created to help the Department of Family and Protective Services (DFPS) locate a family for purposes of investigating a report of child abuse or neglect in accordance with Texas Family Code §261.3022 and CCP §2.272. If DFPS is unable to locate the family and has exhausted all means available for locating the family, DFPS may seek assistance from law enforcement. At the request of DFPS, TXDPS shall place the alleged offender and victim into the TCIC Child Safety Check Alert List.

Law Enforcement Response to Child Safety Check Alert

When a law enforcement agency receives a TCIC return regarding the Child Safety Check Alert List, the officer must determine if the subject is the child victim or alleged offender described in the response.

Texas Family Code Sec. §261.3023. LAW ENFORCEMENT RESPONSE TO CHILD SAFETY CHECK ALERT.

If a law enforcement officer encounters a child or other person listed on the Texas Crime Information Center's child safety check alert list, the law enforcement officer shall follow the procedures described by Article 2.272, Code of Criminal Procedure.

Texas Code of Criminal Procedure Art. §2.272. LAW ENFORCEMENT RESPONSE TO CHILD SAFETY CHECK ALERT.

- a) If a peace officer locates a child or other person listed on the Texas Crime Information Center's child safety check alert list established under Section 261.3022, Family Code, the officer shall: immediately contact the Department of Family and Protective Services on the department's dedicated law-enforcement telephone number for statewide intake; request information from the department regarding the circumstances of the case involving the child or other person; and request information from the child and the other person regarding the child's safety, well-being and current residence.
- b) The peace officer may temporarily detain the child or other person to ensure the safety and well-being of the child.
- c) If the peace officer determines that the circumstances described by Section 262.104, Family Code, exist, the officer may take temporary possession of the child without a court order as provided by Section 262.104, Family Code. If the peace officer does not take temporary possession of the child, the officer shall obtain the child's current address and any other relevant information and report that information to the Department of Family and Protective Services.
- d) A peace officer who locates a child or other person listed on the Texas Crime Information Center's child safety check alert list and who reports the child's or other person's current address and other relevant information to the Department of Family and Protective Services shall report to the Texas Crime Information Center that the child or other person has been located and to whom the child was released, as applicable.

NCIC Missing Person File

The NCIC Missing Person File is retained indefinitely, until the individual is located, or the record is canceled by the entering agency. The Missing Person File contains records for individuals reported missing who have been entered as:

- Disabled
- Endangered
- Involuntary
- Juvenile
- Catastrophe Victim
- Other

Query Missing Person Requirements

The Missing Person file searches the approximate age of the individual may be one or two numeric characters representing the age in years. The age must fall within a range of 0 to 99. The age in the query, plus or minus 1 year, will be searched. If the age is 100 years or older, an offline search should be requested. Approximate height in the query, plus or minus 3 inches, will be searched. Approximate weight in the query, plus or minus 10 pounds, will be searched.

This file is automatically cross searched with a Wanted Person query and can also be queried directly.

Missing Juvenile - High Risk Factor

The High-Risk Factor field (HRF) was established by Texas Code of Criminal Procedure Chapter 63.0091 for juveniles under 18 years of age who are reported:

- Missing four or more times in a 24-month period
- Missing two or more times in a 24-month period and in the foster care system
- At risk of human trafficking, sexual assault, exploitation, abuse, or neglectful supervision including:
 - Disappeared while in a dangerous environment
 - Mental or behavioral health needs, signs of mental illness, intellectual or development disability
 - Known to have been last seen or in communication with an adult unknown to the child's family or legal guardian.

NCIC Person with Information

The PWI capability may only be used when the following rules and conditions have been fully and strictly met, particularly in cases where the PWI is a parent, custodian, or legal guardian. Person with Information (PWI) data may be appended to a Missing Person File (MPF) record entered using MKE/EME (Endangered) or EMI (Involuntary).

- The missing person was last seen under circumstances that pose a risk to the safety of that person.
- There is a substantial likelihood that the PWI has relevant information that could result in the recovery of the missing person.
- Entering identifying information concerning the PWI into the MPF record could assist the appropriate law enforcement agency to identify and interview the PWI and that the resulting information could assist in the recovery of the missing person.

This file is automatically cross searched with a Wanted Person query.

Positive Response (with supplemental PWI records):

State Conservatorship

Conservatorship is when a judge grants the Department of Family and Protective Services (DFPS) temporary custody of a child. This court order is valid from the time the judge signs it, regardless of whether the parents/custodians have been served. When DFPS gets conservatorship of a child and they are unable to locate the child, they will contact the local law enforcement agency who has jurisdiction and request the child or children be entered as missing persons. The parents may be added as persons with information.

The agency should request a copy of the court order for the entry's supporting documentation and the missing person and person with information entries should be treated like any other missing person entry.

Positive Return – State Conservatorship

NCIC Supervised Release File

Local, state, and federal supervision officers may enter records in NCIC for subjects who are put under specific restrictions during their probation, parole, supervised release sentence, or pre-trial sentencing. The court shall order as an explicit condition of a sentence of probation or supervised release "that the defendant not commit another local, state, or federal crime during the term of supervision" (Title 28, U.S.C., Sections 3563 and 3583).

Supervised Release File records are removed once records meet the date in the Date of Probation/Parole Expiration (DPE) Field. NONEXP may be entered in the DPE Field for subjects with non-expiring dates of supervision. This file is automatically cross searched with a Wanted Person query.

NCIC Protective Interest File

The Protective Interest File has been designed to aid law enforcement agencies in their protective mission. Only law enforcement agencies with a protective mission as specified within municipal, state, or federal statutes, regulations or other appropriate legal authority may enter and update records. Record returns will assist agencies in determining the threatener's location and may provide the record owner with information related to the threatener's criminal activity.

This file is automatically cross searched with a Wanted Person query.

NCIC Gang File

The National Crime Information Center (NCIC) Gang File has been designed to provide identifying information about violent criminal gangs and members of those gangs to law enforcement personnel. This information serves to warn law enforcement officers of the potential danger posed by violent individuals and to promote the exchange of information about gangs and members to facilitate criminal investigations.

Because the Gang File information is based, in part, on investigative information not previously subject to independent judicial review, strict adherence to policy on the security, use and dissemination of Gang File information is necessary.

Security

Gang File information is exclusively for the use of criminal justice agencies for criminal justice purposes. In no case should Gang File information be disseminated to any noncriminal justice agency. The security measures to be accorded criminal history record information as set out in the *CJIS Security Policy* should be followed with respect to the Gang File and the information contained therein.

Group Member Capability

The Group Member Capability provides information in a format like Wanted Person File records about individual members of gangs. This file is automatically cross searched with a Wanted Person query and can also be queried directly.

Entry Criteria (ECR)

The defining NCIC criteria used to enter the gang member ranges from self-confession or judicial finding, to tattoos and dress.

Code	Description
A	Self-admitted gang membership at time of arrest or incarceration
B	Identified as a gang member by a reliable informant or individual
C	Corroborated identification as a gang member by an informant or individual of unknown reliability
D	Frequents a documented gang's area, associates with known group members, and/or affects group dress, hand signals, tattoos, or symbols
E	Has been arrested with known gang members for offenses consistent with gang activity
F	Self-admitted gang membership (at any time other than arrest or incarceration)
I	Has been identified as a gang member by an authorized penal organization

Group Reference Capability

Inquiries may be made using Group Name (GNG) only, Subgroup Name (SGP) only. When inquiring using GNG and/or SGP, NCIC will return records based on exact character match.

The response can contain supplemental data on identifying tattoos, dress, hand signals, graffiti, and image data. All supplemental fields will be sorted by special character, alphabetically, then numerically. Image data will be sorted by IMN.

TXGang File

TXGang operates in accordance with the provisions of the Texas Code of Criminal Procedure Chapter 67 which requires criminal justice agencies to compile information into an intelligence database for the purpose of investigating or prosecuting the criminal activities of street gangs.

Agencies meeting the following criteria are required to submit criminal gang information to TXGang:

- Municipalities with a population of 50,000 or more
- Counties with a population greater than 100,000

TXGang member records who meet the NCIC Gang file criteria are automatically uploaded to the NCIC Gang File. Only a portion of the TXGang file is uploaded. A positive return is not probable cause to arrest, search or detain. Agencies needing further information about the return may access TXGang or contact the entering agency directly with information provided in the NCIC return.

Each agency with access to the TXGang database must submit an agency agreement with each user submitting an individual application. Any questions or concerns about the database or requests for access should be directed to: txgang@dps.texas.gov.

Positive Return – Does Not Require Hit Confirmation

Some gangs are subgroups of others, although due to NCIC Gang file structure this will always be listed as SEE MIS FIELD*SWTX

NCIC National Sex Offender Registry File

The National Sex Offender Registry records are based on documented criminal history information and can only be disseminated in accordance with Title 28, USC, Section 534, or other federal statutes. Information in the NSOR should not be disclosed to the public. Publicly available information is accessible on the jurisdictions' websites or by searching the Dru Sjodin National Sex Offender Public Website at www.nsopw.gov.

Texas Code of Criminal Procedure §62.005 requires TXDPS to maintain a computerized central database of sex offender registration information. Persons convicted of a reportable offense occurring on or after September 1, 1970, are required to register as a sex offender. Texas agencies requesting access to the secure Sex Offender Registry website should contact the Sex Offender Registration unit at <https://securesite.dps.texas.gov/SexOffenderRegistry> or 512-424-2800. Public information is available at <https://publicsite.dps.texas.gov/SexOffenderRegistry>

This file is automatically cross searched with a Wanted Person query and will respond with active records only. It can also be queried directly and will respond with active, as well as inactive and expired records.

NICS Denied Transaction File

The NICS Denied Transaction File (NDTF) in NCIC is designed to share information regarding individuals who, having been determined to be prohibited persons according to the Brady Handgun Violence Prevention Act of 1993 (Brady Act), have been denied because of a National Instant Criminal Background Check System (NICS) background check. The data in the NDTF will enhance officer and public safety and provide investigative assistance.

Denial notifications will be delivered to the appropriate law enforcement agency based on the city, state, county and zip code combination of the federal firearms licensee location and the city, state, county, and zip code combination of the attempted transferee's home address when different. Denial notifications will be delivered via an NCIC \$.H.NDN unsolicited message.

If the status of a NICS denied transaction is subsequently changed, such as the result of a successful appeal, then the corresponding NDTF record will be removed from NCIC. To ensure that NICS deny transactions which have subsequently incurred a status change are not stored in NCIC, in accordance with the purge requirements of the Brady Act as defined by the United States Congress and federal regulation, NDTF information will not be maintained on the NCIC system logs.

This file is automatically cross searched with a Wanted Person query and will return all NDTF records where the date of NICS denial is less than 180 days. It can also be queried directly and is not restricted by the date of denial.

NCIC Immigration Violator File

The Immigration Violator File contains records on criminal aliens who have been deported for drug trafficking, firearms trafficking or serious violent crimes and on foreign-born individuals who have violated some section of the Immigration and Nationality Act. Criminal aliens who have been deported and reenter the United States without permission or remain in the United States after being ordered removed or excluded are in violation of Title 8, USC, Section §1326.

The U.S. Department of Homeland Security's Bureau of Immigration and Customs Enforcement (ICE) is the only agency authorized to enter and maintain records in the Immigration Violator File. Documentation (electronic or hard copy) must be on file to support an immigration violator entry. The ICE's Law Enforcement Support Center will enter data regarding immigration violators into one of three categories: Deported Felon Category, Absconder Category or National Security Entry-Exit Registration System (NSEERS) Category.

This file is automatically cross searched with a Wanted Person query.

Deported Felon Category:

The Deported Felon Category contains records of previously deported felons who have been convicted and deported for drug trafficking, firearms trafficking or serious violent crimes.

Positive Return - Deported Felon Category

***MESSAGE KEY QW SEARCHES WANTED PERSON FILE FELONY RECORDS REGARDLESS OF EXTRADITION AND MISDEMEANOR RECORDS INDICATING POSSIBLE INTERSTATE EXTRADITION FROM THE INQUIRING AGENCY'S LOCATION. ALL OTHER NCIC PERSONS FILES ARE SEARCHED WITHOUT LIMITATIONS.

Procedures for Handling a Hit

If the query is made on an individual (i.e., traffic stop) and the encountering agency has no other reason for detaining the subject, appropriate procedures will depend upon whether state or local laws permit detainment and/or arrest.

When an agency receives a record in response to an NCIC query and 1) the whereabouts of the person inquired upon is known and 2) the person inquired upon appears to be identical with the subject of an ICE record, the agency must confirm the alien's status with the ICE at (877) 999-5372. After confirmation, the ICE will provide direction regarding the arrest/detention of the subject. When an agency receives a record in response to an NCIC query and the whereabouts of the person inquired upon is not known, confirmation is not required by the ICE.

When an agency receives a record response to an NCIC query containing investigative interest information, the inquiring agency is not required to notify the investigative interest agency(s).

NCIC Foreign Fugitive File

The Foreign Fugitive File, established July 1, 1987, contains information on persons wanted in connection with offenses committed outside the United States.

INTERPOL records contain information entered for foreign countries by the United States National Central Bureau (USNCB) of INTERPOL, which is housed in the U.S. Department of Justice. The National Central Bureau of any country may issue a wanted flyer, known as a Red Notice, for a fugitive wanted within its respective country. The Red Notice requests the arrest of the fugitive with the intention that extradition will occur. In addition to the fugitive's physical description, the Red Notice contains details of the charge(s), warrant information and prior criminal history information. Red Notices are distributed to the National Central Bureaus in all INTERPOL member countries. Upon receipt of a Red Notice, the USNCB reviews the information and enters an NCIC Foreign Fugitive File record if the entry criteria are met.

This file is automatically cross searched with a Wanted Person query.

Any agency making an inquiry on a foreign fugitive will be advised that the fugitive cannot be arrested solely upon the NCIC Foreign Fugitive File record and to contact the USNCB/INTERPOL. The USNCB is responsible for confirming that the foreign arrest warrant is still outstanding, determining whether the foreign country will proceed with extradition and notifying other U.S. Department of Justice officials to have a U.S. arrest warrant issued.

NCIC Threat Screening Center File

Based upon Homeland Security Presidential Directive-6 signed in September 2003, the Threat Screening Center (TSC) was established to consolidate the Federal Government's approach to terrorism screening and to provide for the appropriate and lawful use of terrorist information in the overall screening process. The TSC is the only agency authorized to enter and maintain records for an individual who is a known or suspected terrorist subject.

When a positive TSC File response is received, the inquiring agency must NOT advise the individual that they may be on a terrorist watch list. The unauthorized disclosure of terrorist watch list information is prohibited. Information that an individual may be on a terrorist watch list is the property of the TSC and is a federal record provided to the inquiring agency that may not be disclosed, disseminated, or used in any proceeding without the advance authorization of the TSC.

There are five different Handling Codes utilized by the TSC File records. Based upon the Handling Code in the hit response, the receiving agency should adhere to the information and direction within the caveat. The following caveat examples do not include the correct telephone number for the TSC. The correct telephone number will be in the caveat and the hit response.

This file is automatically cross searched with a Wanted Person query.

TCIC Guardianship Subject File

The Guardianship Subject File is for determining whether an adult has a guardian and for obtaining a guardian's contact information. The scope of a guardian's authority is determined by court order, and a guardian should not be presumed to have the authority to act for or on behalf of a ward until the extent of the guardian's authority is verified by the court with jurisdiction over the guardianship. A law enforcement agency that receives the information must maintain the confidentiality of the information and may not disclose the information.

This file is automatically cross searched with a Wanted Person query.

Texas Code of Criminal Procedure Article §14.055

As soon as practicable, but not later than the first working day after the date a peace officer detains or arrests a person who is a ward, the peace officer or the person having custody of the ward shall notify the court having jurisdiction over the ward's guardianship of the ward's detention or arrest.

The Guardianship Subject Database will return the following information:

- the name, sex, and date of birth of a ward
- the name, telephone number, and address of the guardian of a ward
- the name of the court with jurisdiction over the guardianship

INFORMATION OBTAINED FROM THE REGISTRY IS FOR LAW ENFORCEMENT PURPOSES ONLY. THE SCOPE OF A GUARDIAN'S AUTHORITY IS DETERMINED BY COURT ORDER, AND A GUARDIAN SHOULD NOT BE PRESUMED TO HAVE THE AUTHORITY TO ACT FOR OR ON BEHALF OF A WARD UNTIL THE EXTENT OF THE GUARDIAN'S AUTHORITY IS VERIFIED BY THE COURT WITH JURISDICTION OVER THE GUARDIANSHIP.

NCIC Unidentified Person File

Unidentified Person File records will remain on file indefinitely or until action is taken by the originating agency to clear or cancel the record. An agency which recovers a partial unidentified body should transmit a query and in the Body Part Status (BPS) Field and identify all body parts which have and have not been recovered. A query using BPS requires that at least one body part be missing, but that not all are missing. The Unidentified Person File contains records in the following categories:

- Deceased
- Living
- Catastrophe

TCIC Foster Home Member Database

Texas Code of Criminal Procedure §5.04: DUTIES OF PEACE OFFICERS. (a) The primary duties of a peace officer who investigates a family violence allegation or who responds to a disturbance call that may involve family violence are to protect any potential victim of family violence, enforce the law of this state, enforce a protective order from another jurisdiction as provided by Chapter 88, Family Code, and make lawful arrests of violators.

(a-1) A peace officer who investigates a family violence allegation or who responds to a disturbance call that may involve family violence shall determine whether the address of the persons involved in the allegation or call matches the address of a current licensed foster home or verified agency foster home listed in the Texas Crime Information Center.

(b) A peace officer who investigates a family violence allegation or who responds to a disturbance call that may involve family violence shall advise any possible adult victim of all reasonable means to prevent further family violence, including giving written notice of a victim's legal rights and remedies and of the availability of shelter or other community services for family violence victims.

Law Enforcement Response to Foster Home Member Disturbance

CCP §5.05. REPORTS AND RECORDS. (a) A peace officer who investigates a family violence incident or who responds to a disturbance call that may involve family violence shall make a written report, including but not limited to:

- (1) the names of the suspect and complainant.
- (2) the date, time, and location of the incident.
- (3) any visible or reported injuries.
- (4) a description of the incident and a statement of its disposition; and
- (5) whether the suspect is a member of the state military forces or is serving in the armed forces of the United States in an active-duty status.

(a-1) In addition to the written report required under Subsection (a), a peace officer who investigates a family violence incident or who responds to a disturbance call that may involve family violence shall make a report to the Department of Family and Protective Services if the location of the incident or call, or the known address of a person involved in the incident or call, matches the address of a current licensed foster home or a verified agency foster home as listed in the Texas Crime Information Center. The report under this subsection may be made orally or electronically and must:

- (1) include the information required by Subsection (a); and
- (2) be filed with the Department of Family and Protective Services within 24 hours of the beginning of the investigation or receipt of the disturbance call.

Concealed Weapons Permit Information

Concealed Weapons Permit Information query (CWQ) provides a standardized, secure, and efficient method for states that have automated concealed weapon permit systems to respond automatically to requests from other states over Nlets. Those states without automated systems should respond manually or notify Nlets of their inability to participate. In these cases, Nlets will return a standard not available response.

An agency may request out-of-state concealed information by submitting a query to the state of record. A response will be returned with the notification that a permit does or does not exist, its status and a physical description of the owner.

Driver License

Driver license information is available through TLETS from the Texas Department of Public Safety (TXDPS) Driver License Division (DLD) through Driver License System (DLS) and from other states using the Nlets network.

Texas Driver License

There are two types of Texas driver license inquiries: Routine Driver License Check (RDL) and Complete Driver License Check (CPL). Texas Identification Card information is included.

The Routine Driver License Check (RDL) provides basic information regarding the subject: name, physical description, date of birth, most recent address, mailing address, record status, operator license number, card type, license class, expiration date, restrictions, endorsements, and administrative status. Other fields will be displayed when applicable: organ donor, VISA expiration date and the hazardous materials endorsement assessment.

The Complete Driver License Check (CPL) provides basic driver information, plus other fields will be displayed when applicable: sex offender, communication impediment and driver history, including enforcement actions, convictions, crash/accidents, and medical information (CDL only).

Texas Driver License Search Criteria

- The name must match the exact spelling and separated by a comma in the form LASTNAME,FIRSTNAME.
- Records with no FIRSTNAME must be run by OLN.
- The query may include a MIDDLENAME, but it will not narrow the search.
- Names containing a hyphen (-) maybe run as LAST-LAST,FIRST or LAST LAST,FIRST or LASTLAST,FIRST.
- Name search alone will return a list of up to 50 possible matches including the full name, the date of birth (DOB), the card number and the city of residence.
- Names containing more than 30 characters is not supported by TLETS. Contact DPS Communications or the Texas Fusion Center at 512-424-7981 for assistance.
- A search using Date of Birth (DOB) matches the exact DOB in the driver license record.
- A search into the DLS will yield results for both driver licenses and identification cards.

Lawful Presence Requirement

Applicants who are not United States citizens or permanent residents of the US must present proof of lawful presence before being issued an original, renewal or duplicate Texas driver license or ID card. Once acceptable identification has been obtained, the individual will be issued a temporary visitor designation and status date on the face of the card.

Communication Impediment

Complete Texas DL transaction returns with a positive communication impediment indicator, COMM IMPED: Y, will display the following banner at the top of the TLETS return:

THE FOLLOWING RECORD INDICATES THE DRIVER OR OWNER OF THE VEHICLE
MAY HAVE A HEALTH CONDITION OR DISABILITY THAT IMPEDES EFFECTIVE
COMMUNICATION.

This will only affect the return message key KR for complete driver license returns from the CPL (complete DL history) and KQ (Nlets Query Driver History) transactions. This banner will not display for any DR returns from RDL (regular DL query) and DQ (Nlets Query Driver License) transactions as they do not return COMM IMPED indicators.

Driver License Photos

Driver license photos are not available by name only. The minimum information needed to obtain the driver photo is NAM and DOB or OLN along with the image request (IMQ), a reason code (RSN) and the email (EML) address of the Requestor. Law enforcement agencies have the capability to obtain Texas driver license photos. This includes agencies in Texas as well as agencies out-of-state requesting DL photos through Nlets.

Driver license photos are considered personal information and protected by both state and federal laws (Texas Transportation Code Section §730.004 and Driver Privacy Protection 18 U.S.C. Act §2721). Photos may be used for criminal justice purposes and only be disseminated to authorized personnel according to CJIS policy. Driver License inquiries requesting photos must contain Image Request (IMG), Reason (RSN) and Email (EML) of the Requestor. The email (EML) field is used as an identifier for the requestor and should be completed with their law enforcement email address. The DL photo will be received as part of the TLETS return.

The Reason (RSN) field is used for indicating the purpose of requesting the photo.

- Criminal Justice (C)
- Criminal Justice Employment (J)
- Domestic Violence and Stalking (D)
- Firearm Sales and Returns (F)

There are additional reasons included in the dropdown menu that have restricted use.

Manual Driver License Requests

Manual driver license requests are available when online information is unavailable, not clear or contains errors. Requests are available Monday through Friday from 8:00 am to 5:00 pm. Routine manual search requests are usually processed within two hours. To request a manual driver license check, send an administrative message to mnemonic LIVI addressed to DPS Austin Attention: DLD.

DLD Alternate Service I Manual Services assists with misdemeanor investigations by providing driver license photos and other documentation such as original DL applications. Contact 512-424-2234 for additional information. Fax requests to 512-424-5982. Indicate on agency letterhead the following information:

- Reason for Request
- Agency Letter Head
- Agency Name and ORI
- Requestor's Name, Title, ID, or Badge Number
- Subject's Name, DOB, OLN, SOC
- Classification: Misdemeanor, Felony, Identification Only
- Method of Returning Results: Mail, Email, FAX

The TXDPS Fusion Center provides information to law enforcement agencies via email or phone. They can assist with both misdemeanor and felony investigations by providing photos and other documentation. Requests should be sent to TXFC@dps.texas.gov or 512-424-7981 with the following information:

- Requestor Name, Agency, Title, Badge Number
- Type of investigation
- Case Number
- Subject's Name, DOB, OLN, SOC

Mexican Commercial Driver License

The Licencia Federal Information System (eLicencia) responds to Nlets driver license query (DQ). Users can inquire in the eLicencia to obtain license and status information about federally issued Mexican commercial driver licenses, just as such driver license query (DQ) can be made to U.S. state driver license files for any U.S. issued license.

- A license status query to the eLicencia is made by addressing a driver license query message to the destination address of MX.
- All inquiries and responses are in a fixed format.
- The eLicencia only supports requests using the operator license number (OLN).

Diplomatic Driver License

Diplomatic driver license returns include information on members of the Foreign Mission Community, who are required to obtain a driver license from the U. S. Department of State's Office of Foreign Missions (OFM). Foreign mission members who obtain or maintain a driver license from one of the 50 states, the District of Columbia or any territory governed by the United States must prove their ability to operate a motor vehicle.

OFM maintains the driving records of all individuals who are licensed by the Department and this information is available through a Nlets Driver query transaction with the Destination Code US. Individual driving records contain the following information:

- The Individual's Name
- DOS License Number
- Class of License and Restrictions if any
- Status of The License
- Previous U.S. License, if any
- Previous Foreign License if any
- A list of moving violations, if any, to include violations recorded against a previous license issued by one of the 50 states or the District of Columbia
- Accident involvement, if any, to include accident involvement recorded against a previous license issued by one of the 50 states or the District of Columbia

The driving record of any individual licensed by OFM's Diplomatic Motor Vehicle Office will be provided to concerned insurance carriers or missions. Requests for driving records must be submitted electronically via an official e-mail address to OFMDMVMVR@state.gov.

Criminal History Record Information

Criminal history record information (CHRI) includes information from:

- Texas Computerized Criminal History files (CCH)
- FBI Interstate Identification Index files (NCIC III)
- Individual State Repositories using IQ, FQ, and AQ

Authorized personnel may not conduct III record inquiries without a specific purpose. It is prohibited to conduct III record inquiries on family, friends, or oneself. Such misuse is subject to sanctions against the state, as well as civil and/or criminal penalties to the person misusing the system. (III Manual 1.1.4)

Texas Computerized Criminal History

Texas Computerized Criminal History (CCH) files are records of Texas arrests stored at Crime Record Division (CRD) of TXDPS. CCH records are compiled from arrest fingerprint cards, prosecution and disposition information from courts, probation and parole reports and Texas Department of Criminal Justice (TDCJ) receiving reports. Texas CCH records remain active until the subject reaches 125 years of age.

- All Texas CCH record are based on information submitted to CRD by Texas agencies.
- Updates are performed 24 hours a day seven days a week by CRD.

The accuracy, timeliness and completeness of the records are dependent upon the accuracy, timeliness, and completeness of its contributors. Errors found on CCH records must be reported to the Error Resolution Unit (Assistance Line) at (512) 424-7256 or email error.resolution@dps.texas.gov. Questions concerning the Texas CCH records can be referred to TCIC Operations at the Mnemonic address of CRDP or 512-424-2088 or 866-266-TCIC (8242).

Criminal history inquiries on juveniles can be made using the same query formats (QH or QR) as used for adult record inquiries. Juvenile records are available through the Juvenile Justice Information System (JJIS), a statewide database comprised of custody, pre-adjudication, and post-adjudication events. The policy governing dissemination of JJIS records is the same as adult records.

NCIC Interstate Identification Index

The Interstate Identification Index (III) Program provides for the interstate exchange of Identity History Summary (IdHS) records and functions as part of the FBI Criminal Justice Information Services (CJIS) Division's Next Generation Identification (NGI) System. Currently, all 50 states and the District of Columbia participate in the III Program.

The III provides a means of conducting national record searches for criminal justice and other purposes as specified by existing local, state and/or federal laws. Any authorized criminal or noncriminal justice agency may access the III. The III processes name check query transactions to determine if a matching record, indexed by a unique FBI Universal Control Number (UCN), is on file. If a match is found, an agency may request the subject's record by transmitting an additional query using an FBI UCN or state identification (SID Number) assigned to the subject's record.

Generally, records are provided to requestors within seconds over the FBI telecommunications network to the III.

Each IdHS record is supported by a fingerprint submission and is assigned a unique FBI UCN. In the 54 sole source participating states/territories, the arresting agency submits fingerprint images to the State Identification Bureau (SIB) for processing and assignment of a SID Number. The SIB updates its state file and sends the arrest information to the FBI. If no prior FBI record is on file, the FBI establishes a new record in the III, assigns an FBI UCN and creates an index of the subject's descriptors. A message is sent back to the state containing this FBI UCN. The state repository must then enter the FBI UCN into the state system at the central repository to ensure an accurate and complete III response for future record requests.

When the FBI receives an online request for a record supported by an III participating state, the III automatically sends a message through the NCIC System to the participating state's computer system. The state responds directly to the requesting agency over the International Justice and Public Safety Information Sharing Network (Nlets). The FBI's CJIS Division responds to requests for records of federal and foreign offenders, for persons arrested in non-III states, the District of Columbia, and U.S. Territories, and for criminal arrests III states are unable to support.

The Privacy Act of 1974 requires the FBI's CJIS Division to maintain an audit trail of the purpose for each disclosure of a criminal history record and the recipient of each record. Therefore, all III query and record request messages must include the purpose for which the subject's record information is to be used. In addition to the purpose code requirement for each III transaction, all users are required to provide the reason for all III transactions upon request by the NCIC System managers/representatives, CSA representatives and local agency administrators. While the purpose code provides some lead information, it only provides a minimal audit trail. Requiring the reason for all III inquiries will assist in ensuring that III transactions are run for authorized purposes and that purpose codes are correctly used.

III Query Transaction - QH

The NCIC Criminal History (QH) searches the III using an individual's personal identifiers, (NAM, SEX, RAC, and DOB), assigned SID Number or assigned FBI UCN. The QH query is used to determine if a criminal history record is indexed in the III.

CHRI Purpose Codes

Purpose Code C

Authorized staff must use Purpose Code C when an III message is for official duties in connection with the administration of criminal justice. Title 28, *Code of Federal Regulations* (CFR), Section 20.3(b) defines the term administration of criminal justice as:

Administration of criminal justice means performance of any of the following activities: detection, apprehension, detention, pretrial release, post-trial release, prosecution, adjudication, correctional supervision, or rehabilitation of accused persons or criminal offenders. The administration of criminal justice shall include criminal identification activities and the collection, storage, and dissemination of criminal history record information.

The following examples provide clarification of authorized uses of Purpose Code C in situations that are not part of a criminal justice investigation but are duties of the agency where a record check is necessary to accomplish the agency's mission. However, these examples are not all-encompassing. Some of the authorized uses of Purpose Code C in relation to the security of the criminal justice facility include:

- Vendors or contractors at the criminal justice agency who are not involved with the actual administration of criminal justice at the criminal justice agency, e.g., carpet cleaners, individuals responsible for maintaining vending machines, janitors, cooks, etc.
- Volunteers at criminal justice agencies who are not involved with the actual administration of criminal justice at the criminal justice agency, e.g., participants in community ride-along programs, volunteers at a confinement facility who are providing social or community services rather than rehabilitative services, etc.
- Confinement facility visitors
- Inmates of a confinement facility
- Inmate mail - a prisoner's list of names and addresses of those wishing to correspond with the prisoner. Criminal history may be used when there is a reason to believe that criminal activity is occurring or has occurred.
- Jury members in a criminal court who have received a jury summons.

In limited situations, the CJIS Advisory Policy Board (APB) has determined that site security is an administration of criminal justice function as defined under Title 28, *Code of Federal Regulations*, and Section 20.3(b). In addition to the site security for a criminal justice agency, the CJIS APB recommended, and the FBI Director approved, using the III for:

- Site security for federal facilities, limited to contractor personnel (requires a follow-up fingerprint submission)
- Off-site protection of very important persons
- Visitors to federal or state military facilities
- Firearms training events sponsored by law enforcement

In addition to these situations, a law enforcement agency may conduct an III criminal history record check when investigating a criminal incident or when an agency/officer has a reasonable suspicion a person is acting in a suspicious manner while taking pictures or loitering at a critical infrastructure facility. Terminal operators should use Purpose Code C to conduct III inquiries for site security purposes. The result of the III query cannot be disseminated for other purposes.

Courts should use Purpose Code C for jury pool members in criminal court cases. Purpose Code C can also be used in a domestic violence investigation conducted by a law enforcement agency. (This III query is in reference to agency use only. Purpose Code D below provides information on court-related inquiries).

Governmental social service agencies with child protection responsibilities and the National Center for Missing and Exploited Children must use Purpose Code C to access national crime information databases (as defined in Section 534 of Title 28, U.S.C.) under Section 151 of the Adam Walsh Child Protection and Safety Act of 2006 (Public Law 109-248). An NCIC Originating Agency Identifier (ORI) ending in the alpha character F has been established for Section 151 access.

Purpose Code J

Authorized staff must use Purpose Code J when the III message involves employment with a criminal justice agency or the screening of employees of other agencies over which the criminal justice agency is required to have management control. Such screening may include the use of III on friends, relatives and associates of the employee or applicant, unless restricted or prohibited by state statute, state common law or local ordinance. Criminal justice employment (Purpose Code J) has been separated from other criminal justice purposes (Purpose Code C) due to the varying requirements of some state agencies participating in the III.

Purpose Code J may also be used to initiate background checks on:

- Vendors or contractors at the criminal justice agency who are involved with the actual administration of criminal justice at the criminal justice agency, e.g., personnel involved with maintenance of computer systems, upgrading records systems, data entry clerks, etc.
- Volunteers at the criminal justice agency who are involved with the actual administration of criminal justice at the criminal justice agency, e.g., volunteer dispatchers, volunteer data entry clerks, volunteers at a confinement facility who are providing inmate rehabilitation, etc.

Purpose Code D

Authorized officials of civil or criminal courts must use Purpose Code D when the III message is accessed by officials of civil or criminal courts in domestic violence or stalking cases. At the discretion of the appropriate state CJIS Systems Officer (CSO) and the FBI's CJIS Division, civil courts may be issued ORIs containing a D in the ninth position of the ORI. Those ORIs ending in D are limited to QH query and QR record request messages for Purpose Code D.

Purpose Code D is used by:

- Civil or criminal courts involved in domestic violence or stalking cases (civil courts are issued D ORIs.)
- Law enforcement agencies providing an III record to a criminal or civil court for a domestic violence hearing. This III query is in reference to court use only. Purpose Code C above provides information on inquiries by law enforcement agencies.

Purpose Code F

Criminal justice agencies must use Purpose Code F to (a) issue firearms-related permits and explosives permits pursuant to state law, regulation, or local ordinance, (b) return firearms to their lawful owners, and (c) enforce federal and state laws prohibiting certain persons with criminal records from possessing firearms in circumstances in which firearms have been pawned.

There are additional purpose codes included in the dropdown menu that have restricted use.

Attention, Requestor and Operator Fields

Attention, Requestor, and Operator fields must be unique for the named person and specific to the person for one year. The agency must be able to easily determine the transaction, its purpose, and the requestor. If the operator is requesting CHRI to pack the record, then the operator must identify themselves in the Requestor/Attention fields, as well as the Operator field.

The Requestor/Attention/Operator field should indicate the title, first and last name of the person. If the name is common or not unique within the agency, additional information would be appropriate, such as, a badge, radio, or employee number.

Examples:

REQ: TAC JANE DOE

ATN: TAC JANE DOE

REQ: Deputy JOHN DOE #11111

ATN: Deputy JOHN DOE #11111

REQ: Trooper Jim DOE , THP

ATN: Trooper Jim DOE , THP

Reason for Inquiry

The Reason for Inquiry (RFI) field is mandatory for Texas users. The RFI allows 75 free text characters to describe the purpose for the query. Best practice would include details plus a numerical reference.

Examples of CHRI reason(s) for query:

- Booking Classification
- Burglary Investigation
- DL Fraud Investigation
- Homicide Investigation
- Warrant Arrest, Entry or Validation
- Traffic Stop (indicate investigation details, DUI, Narcotics, etc.)
- Job Title or Number (when running purpose code J)
- Missing Person Investigation, Entry or Validation
- Protective Orders Entry or Validation
- TLETS Security Review

Additionally, a numerical reference should be included to support and validate the CHRI query.

Examples include:

- Arrest Number
- Case Number
- Protective Order Number
- Call-for-Service Number
- CAD (Computer Aided Dispatch) Sequence Number

CHRI Person Data

The NCIC query QH searches the III and Texas CCH using an individual's personal identifiers (NAM, SEX, RAC, and DOB) and assigned SOC, MNU, SID and FBI. The QH is used to determine if an index record for a person's criminal history record is in the III or Texas CCH. When running a Criminal History query 'QH' the following criteria apply:

	NCIC SEARCH	TCIC SEARCH
NAME	Complete name	Complete name
DOB	Date of birth (+/- 3 years)	Searches year of birth
SEX	Searches same sex only	Searches same sex only
RACE	Searches all races (A, B, I, W, U)	White searches all except Black Black searches all except White

Subject Name Field

QH query messages should contain a last name, a first name and a middle name or initial. If a query contains only a last name and a first initial or only a last name and a first and middle initial, insufficient comparisons may prevent the selection of matching records if the name is common. The requestor should use the first initial only if the person does not have a given first name. For matching purposes, the III compares the name included in a QH query message with the master names and aliases contained in the III. In the event an individual has a single name as his/her entire name, the requesting agency must enter the name in the query with the single name as the last name, comma and XX as the first name/initial.

The III name search uses a surname and a combination of a first name and middle initial. The III identifies nicknames and converts them to their true name before the search process begins, e.g., Bill equals William, Betty equals Elizabeth, etc. The III compares names in the III database using a computer-coded phonetic technique that treats vowels (A, E, I, O and U) equally and eliminates double consonants to provide hits on records with names that are not spelled exactly alike. Names are grouped according to the resulting phonetic code beginning with the first character of the coded name. A common surname will result in a wider search based on a combination of the first name and a generic middle initial.

Date of Birth

When a complete date of birth is used in a QH query message, the search will provide records that score sufficiently high based on matching name, sex, race and one of the following:

- Exact date of birth (for example, 19731230 is the subject's true date of birth).
- Same month and day of birth and plus or minus three years on the year of birth (for example, 19701230, 19711230, 19721230, 19741230, 19751230 or 19761230).

The III will reject a QH query message with an incomplete date of birth (e.g., 19600000, 19200006, 19601200 or 19600030).

Sex

A match on this value enhances the possibility of finding the correct candidate. This is more crucial in cases where the NAM and DOB are not exact matches. The valid sex codes are:

Code	Sex
M	Male
F	Female
X	Unknown

Race

A match on this value enhances the possibility of finding the correct candidate. This is more crucial in cases where the NAM and DOB are not exact matches. Records for Hispanics should be entered with the race code most closely representing the individual. The valid race codes are:

Code Race	Description
A	Asian or Pacific Islander - a person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands.
B	Black - a person having origins in any of the black racial groups of Africa.
I	American Indian or Alaskan Native - a person having origins in any of the original peoples of the Americas and who maintains cultural identification through tribal affiliations or community recognition.
U	Unknown.
W	White - a person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

IDENTIFICATION DATA UPDATED 1984/04/24
THE CRIMINAL HISTORY RECORD IS MAINTAINED AND AVAILABLE FROM THE
FOLLOWING:
MICHIGAN - STATE ID/MI111111
END - LAST NCIC III RECORD FOR MULTIPLE RESPONSE
THE RECORD(S) CAN BE OBTAINED THROUGH THE INTERSTATE
IDENTIFICATION INDEX BY USING THE APPROPRIATE NCIC TRANSACTION.

NCIC Responses to QH

The III uses an interface with the NCIC Wanted Person file to provide wanted person data. When this is present, the operator should use transaction QWA to obtain the complete wanted person record. Records can be deleted either permanently (record established in error or subject reached 110 years of age) or temporarily (internal corrections needed, and record will be reentered). These records will indicate RECORD NO LONGER ON FILE. Contact the FBI III Help Line at 304-625-3652.

No Record Response

The III “no record” response does not mean that there is no criminal history record on the individual. The FBI maintains criminal fingerprints of individuals with an FBI record and certain fugitives and repeat offenders. In addition, there may be records at the local or state level for which arrest fingerprint submissions are not on file with the FBI.

Record Return – No Record Found

NL01HEADERXXXX01234

VAVSP0000

NO IDENTIFIABLE RECORD IN THE NCIC INTERSTATE IDENTIFICATION
INDEX (III) FOR NAM/DOE, JOHN.SEX/M.RAC/W.DOB/19760125.PUR/C.

Individual State Repositories

Each state maintains a criminal history repository. Nlets CHRI inquiries are used to retrieve criminal history records that are not presently available on NCIC's III system. The IQ and FQ inquiries should never be used as a substitute for the III system, but rather as a secondary query after the user has:

- Inquired on the III system and received a no record.
- Received a record but feels that there may be additional data on the state file.

III Query Transaction - QR

To obtain a specific record via the III, a requestor must use a criminal history record request (QR) message containing either the subject's FBI UCN or SID Number. The FBI UCN or SID Number used in the record request may be obtained from a QH query message, matching fingerprints or from other sources available to the inquiring agency (e.g., local investigative file).

Upon receipt of a QR record request message, the III responds to the requesting agency with either a positive response (indicating that a record is available via the III) or a negative response (indicating that a record may exist but is not indexed in the III). The positive response advises the requestor which database(s) will respond with the criminal history record.

The III automatically notifies each state's database with enough information to enable the state to respond to the requestor. A record maintained by the FBI's CJIS Division and/or one or more III states will be provided immediately via the Nlets. For state-maintained records, which are not provided immediately, an acknowledgement will be sent via Nlets advising when the record will be provided. A requestor will receive multiple record responses when the record is maintained by more than one database.

Combined III and QWA Transactions

In addition to the QH and QR inquiry messages, the National Crime Information Center (NCIC) provides a QWI (Query Wanted Person) inquiry message that accesses the NCIC and the III simultaneously. NCIC and III will return positive and/or negative responses independently. The NCIC treats a QWI inquiry message as a QWA, which produces an inquiry of all person files in the NCIC except the Unidentified Person File.

Hit Confirmation

When a query is made into TCIC/NCIC, and a potential match is made to indicate that identifiers used on the query form match a record on file, this is called a hit. This could be in response to a query about a missing person, a wanted person, or a piece of property.

Hit confirmation procedures have been established to provide uniformity and an understanding of documentation for all agencies utilizing NCIC. These procedures ensure the integrity of the process should it be called into question later. An NCIC hit alone is not probable cause to arrest, but indicates that a stolen property report, missing person report, or warrant, may have been filed. A hit is only one element contributing to sufficient legal grounds for probable cause in:

- Arresting a Wanted Person
- Detaining a Missing Person
- Seizing Stolen Property

TCIC/TLETS Offline Search

An off-line search is technique used to get information from the NCIC/TCIC which cannot be obtained with an online query. Some examples would be partial numeric identifiers, manual name checks or inquiries using personal descriptors or vehicle make/model information.

Reasons for an Offline Search:

- System Misuse
- Determine if any agency made a query on an individual or item of property
- Substantiate or discredit an alibi
- Place an individual near the scene of a crime or across the country
- Track the route of an individual (Example: suspects, witnesses, runaways)
- Determine if a record for a person or item of property was previously entered into NCIC and subsequently removed.

This capability provides a powerful investigative tool for law enforcement officials in dealing with possible misuse of TLETS, official misconduct and criminal investigations.

All offline requests should be submitted to TCIC.Operations@dps.texas.gov unless it's for system Misuse then TCIC.Audit@dps.texas.gov should be contacted first.

Possible Dealer Plate Status

Remark	Description
APA-Active	The license plate is valid and current. Per Texas Government Code 2001.054, if a license holder files a timely and sufficient application for renewal of a license, the license remains active and valid until the renewal application is finally determined by the agency. An APA-Active plate's expiration date may have passed, but the license plate remains active under TX statute until the TxDMV grants or denies the pending renewal application.
Cancelled	The dealer requested the TxDMV cancel the plate. The plate should not be in use.
Closed	The license plate is no longer valid. It has either expired, or the dealer has voluntarily closed the associated license.
Current	The license plate is valid and has not expired. It is currently an active plate associated with a current dealer license.
Damaged	The plate was reported to the TXDMV as damaged by the dealer and therefore unusable. The plate should not be in use.
Inactive	The license plate expired. The dealer has an expired dealer license and could be in the process of renewal.
Inactive-Expired	Inactive-Expired - The license plate is no longer valid. It has expired.
Lost	The license plate has been reported to the TxDMV as lost. The plate should not be in use.
Returned	Returned – The plate issued was returned to the TxDMV. The plate should not be in use.
Stolen	The license plate has been reported to the TxDMV as stolen by the dealer.

RTS Remarks

The RTS return often includes brief remarks, sometimes including a date the remark became applicable. The following table is not comprehensive and is being provided as a reference. It should be noted some remarks have special relevance to law enforcement.

Remark	Description
ABANDONED MOTOR VEHICLE	The vehicle has been deemed abandoned in accordance with Chapter 683 of the Transaction Code. This vehicle cannot be transferred.
ACTUAL MILEAGE	The mileage indicated on the vehicle's odometer at the time of title transfer or application filing was the actual distance in miles the vehicle had been driven.
ADDITIONAL LIEN RECORDED	More than one lien is listed on the motor vehicle record.

Remark	Description
ADDITIONAL RTS REGISTRATION AVAILABLE	More information can be obtained on the vehicle by inquiring by VIN.
BONDED TITLE	Title secured by the posting of a certificate of title surety bond.
BONDED TITLE SUSPENDED	The bonded title transaction has been suspended.
BONDED TITLE WAITING FOR REMOVAL	Three-year bond period has ended.
CCO ISSUED (DATE)	A certified copy of the original title was issued in the specified month and year.
COA ISSUED (DATE)	A certificate of Authority to Demolish a Motor Vehicle has been issued.
COUNTY SCOFF LAW	This remark indicates the vehicle owner owes the county a fine, fee or tax
CREDIT VOUCHER ISSUED	The vehicle was destroyed in a wreck, fire or by some other means; and a registration refund could not be authorized since the vehicle had been operated on the highway.
DATE OF ASSIGNMENT	The date the title was signed by the seller transferring ownership to the buyer and is used by the VTR to calculate late title transfer fees, if applicable.
DIESEL	The vehicle is powered by a diesel motor. It also ensures an additional 11 % of registration fee is included in the fee calculations on all subsequent renewal notices on applicable vehicles.
DMV RECORD NOT UPDATED	License receipt has not been received from county tax office for updating.
DMVS STANDARDS PROOF REQUIRED	Indicates proof of compliance with US Department of Motor Vehicles (DMV) safety regulations is required before title can be issued. In the case of an RPO record, the registration cannot be renewed.
DPS-EMISSIONS PRGM NON-COMPLIANCE	The vehicle was detected on Dallas, Tarrant, Harris, or El Paso County roadways as a potential gross polluter and has not complied by passing an emissions DOE .

Remark	Description
DPS SAFETY SUSPENSION	The Department of Public Safety has placed a suspension on the motor vehicle record for the owner's failure to maintain financial responsibility. The vehicle registration has been suspended by DPS. Contact the DPS Driver Improvement and Compliance Bureau at SRBZ before taking any action. A person shall give proof of ability to respond to damages for liability on account of accidents. This remark is placed at the request of the Texas Department of Public Safety (DPS) against a vehicle which was involved in an accident. Statutory Authority: Texas Transportation Code Chapter 601.152 and 601.376.
EVIDENCE SURRENDERED BY OWNER	The department has received the title or some other valid evidence of ownership on this vehicle from the owner of the vehicle. The title record has been canceled.
EVIDENCE SURRENDERED BY SALVAGE YARD	The department has received the title or some other valid evidence of ownership on this vehicle from a salvage vehicle dealer or salvage yard. The title record is updated to also include Junked.
EXEMPT	The vehicle is owned by or loaned to an agency of the state, city, county, or federal government, and displays license plates embossed with the legend EXEMPT along with six numbers.
FIXED WEIGHT	A commercial vehicle has been registered for the actual weight of the empty vehicle plus the weight of the permanently mounted machinery or equipment which must cover at least two-thirds (2/3) of the bed.
FLOOD DAMAGE	The vehicle has been damaged by flood and rendered a total loss by insurance company.
HEAVY VEHICLE USE TAX VERIFIED	Indicates the clerk verified proof of payment of the Federal Heavy Vehicle Use Tax or the vehicle is exempt from payment.
HOT CHECK (ETC.)	A check in payment of title or registration related fees was not honored by the bank on which it was drawn, and such check was returned to the payee unpaid.

Remark	Description
JUNKED	The vehicle described on the motor vehicle record is salvage, scrapped, destroyed, or dismantled in such a manner it loses its character as a motor vehicle and TXDMV has been advised the vehicle is junked.
JUNK.0196INV 1840060FA	In January 1996, an auto salvage yard (identified by the salvage yard number assigned by the VTR Regional office 1840060fa) Surrendered with its inventory list the Texas Certificate of Title and the unexpired license plates, if applicable on the vehicle to the department for cancellation.
JUNK.02/96 INV 1840060FA LIEN NOT RELEASED	In February 1996, the salvage yard (Indicated by the salvage yard inventory number assigned by the Fort Worth/Arlington Regional office 1840060FA), surrendered with its inventory list the Texas Certificate of Title and the unexpired license plates, if applicable, on the vehicle to the department for cancellation. However, upon examination of the surrendered Texas Certificate of Title, it was found not released.
JUNK.1195CERT OF AUTHORITY TO DEMOLISH 0196INV 1700024BT	The automobile salvage dealer, indicated by the salvage yard inventory number assigned by the Beaumont Regional office (1700024BT), obtained a Certificate of Authority to dispose of a motor vehicle to a demolisher for demolition, wrecking or dismantling only, Form 71-3, issued by the department in November 1995. In January 1996, the salvage yard surrendered with its inventory list the Certificate of Authority to demolish such vehicle to the department for cancellation.
JUNK.AUCTION SALES RECPT INV 1020521HO	The vehicle described in the Motor Vehicle record has been determined a junked vehicle, because the Auction Sales Receipt was surrendered to the department by the salvage yard.
JUNK.REG PURPOSES ONLY.0196 LA TITLES INV 1020521HO	In January 1996 the salvage yard (indicated by the salvage yard inventory number assigned by the Houston Regional office-1020521HO) surrendered with its inventory list the Louisiana Certificate of Title and the unexpired Texas license plates, if applicable, on the vehicle to the department for cancellation.
LEGAL RESTRAINT CONTACT TXDMV	This remark includes a file number used to reference documentation associated with an owner-retained vehicle, restraining order, or other administrative stops.
LIEN NOT RELEASED FIRST	The first lien was not released.

Remark	Description
LIEN NOT RELEASED SECOND	The second lien was not released.
LIEN NOT RELEASED THIRD	The third lien was not released.
MAIL RETURNED	The registration renewal mailed to the vehicle owner or registered owners original or duplicate title (if issued prior to 9-01-01) was returned by the post office to the VTR as being undeliverable. This remark prevents next year's renewal notice from being printed and mailed to the incorrect address.
MAJOR COLOR	The primary color covers most, if not all, of the vehicle.
MILAGE EXCEEDS MECHANICAL LIMITS	The odometer reading has exceeded the mechanical limits of the odometer. For example, if the mechanical limitations of an odometer are a 5-digit reading, it cannot record more than 99,999 miles.
MINOR COLOR	The secondary color, if present, covers less of the vehicle (e.g., standard two-toned vehicles, custom paint job, camouflaged, etc.).
NO REG/TTL GC	No registration or title can be issued because this is a golf cart. Beginning September 1, 2009, golf carts are no longer titled or registered.
NONREPAIABLE CERTIFICATE OF TITLE ISSUED	Indicates a Non-repairable Certificate of Title (NRCOT) was issued on the motor vehicle because the estimated cost of repair was 95% or more of the vehicle's pre-damaged actual cash value.
NOT ACTUAL MILAGE	The mileage indicated on the vehicle's odometer at the time of title transfer or application filing was not the actual distance in miles the vehicle had been driven.
OFF-HIGHWAY USE ONLY	Non street legal motorcycles including 3- and 4-wheel all-terrain vehicles are required to be titled but cannot pass the State Safety Inspection requirements unless modified and cannot, therefore, be registered.
ON LOAN TO EXEMPT AGENCY	The vehicle is not owned by the user, such as a Driver Education vehicle and is registered by the user with Exempt License Plates not required to be titled.

Remark	Description
OPT-OUT-COMMERCIAL REQUEST	This remark restricts the release of information on the motor vehicle record for commercial (bulk) record requests. (NOTE: On 12-1-00 this remark was replaced with the RELEASE OF PERSONAL INFORMATION RESTRICTED remark).
OPT-OUT INDIVIDUAL REQUEST	This remark restricts the release of information on the noted record without the owner's release authority to the individual requesting the information. (NOTE: On 12-1-00, this remark was replaced with the RELEASE OF PERSONAL INFORMATION RESTRICTED remark).
OPT-OUT-INDIVIDUAL & COMMERCIAL REQ	This remark restricts the release of information on the noted record for both Individual and commercial requests. (NOTE: On 12-1-00, this remark was replaced with the RELEASE OF PERSONAL INFORMATION RESTRICTED remark).
OWNED BY US GOVERNMENT	The vehicle is leased from the U.S. Government and shall be registered with regular registration and an RPO receipt shall be issued in the name of the lessee.
PERMIT REQUIRED TO MOVE	The vehicle information selected on the Class/Plate/Sticker screen qualifies this vehicle as a Park Model Trailer.
PLATE AGE	Reflects the number of years the license plates have been assigned for display on the vehicle for which the plates were originally issued. This will vary from the word ANNUAL to a numeric character.
PLATE SEIZED	Law enforcement has removed the license plates.
PRIOR CCO ISSUED	A Certified Copy of An Original Texas Certificate of Title (CCO) was used to file for a corrected title with no change of ownership. This remark will show on the vehicle record, but it will not print on the title document.
REBUILT SALVAGE-LOSS UNKNOWN	The title transaction was support by a Texas Salvage Certificate.
REBUILT SALVAGE - DAMAGE	The title transaction was supported by a Texas Salvage Certificate of Title or was carried forward from the previous Texas motor vehicle record.
REBUILT SALVAGE 95% PLUS LOSS	The title transaction was supported by a Texas Non-repairable Certificate of Title or was carried forward from previous Texas motor vehicle record.

Remark	Description
REBUILT SALVAGE ISSUED BY (STATE NAME ABBREVIATION)	This remark includes the 2-letter abbreviation for the other state or county which issued a salvage certificate/certificate of title and supported the title transaction or was carried forward from the previous Texas motor vehicle record.
RECONDITIONED	The vehicle was damaged by collision, fire, hail, or other types of damage (other than by flood) and rendered a total loss by an insurance company. If the vehicle is later placed in an operable condition, the salvage document would be surrendered when an application for title was filed. A valid Texas title would be issued, and the remark Reconditioned reflected on the new title and carried forward on all Texas titles issued thereafter. (NOTE: This remark was replaced with a REBUILT SALVAGE remark for Texas title issued on and after 8-1-97. On and after this date, the remark will carry forward as Rebuilt Salvage- Loss Unknown.)
RECONSTRUCTED	The vehicle has been converted in such a manner it no longer resembles the vehicle as originally manufactured.
REFUND PENDING	A refund has been authorized Regional Office but has not been claimed by the owner of record. (The vehicle cannot be transferred unless the vehicle is re-registered, or the refund is voided).
REGISTERED BY	This remark is used for the name of an individual or business other than the owner, who is registering the vehicle.
REGISTRATION INVALID	The registration is not valid. Example: After a refund is processed, registration is invalid.
REGISTRATION PURPOSES ONLY	Texas issued registration only. The negotiable title for this vehicle was issued by another state and remains the negotiable evidence of ownership. Implemented on 9-1-01.
RELEASE OF PERSONAL INFO RESTRICTED	A remark on the Query screen advises all-personal information (names and addresses) in the motor vehicle record is restricted under the federal Drivers Privacy Protection Act. Except for certain exceptions. Implemented on 12-1-00.
REPLICA	An established make of a previous year model vehicle has been assembled as a new vehicle or built by a motor vehicle manufacturer.

Remark	Description
SALVAGE CERTIFICATE ISSUED	Indicates a salvage certificate was issued on the motor vehicle.
SALVAGE CERTIFICATE OF TITLE ISSUED	Indicates a Salvage Certificate of Title (SCOT) was issued on the motor vehicle because the estimated cost of repair was 75% or more of the vehicle pre-damaged actual cash value.
SB829 (CITY) OR OUTSTANDING TRAFFIC WARRANT	SB829, referred to as the Scoff Law Bill, provides cities with a population of 380,000 or more may contract with their local county and this department to refuse to register a vehicle owned by a person for whom an arrest warrant is outstanding for failure to pay a fine for a traffic violation.
SOLID TIRES	The vehicle is equipped with solid, rubber tires.
STICKER SEIZED	The county was notified by law enforcement the plates and sticker have been seized.
STOLEN	The department of Public Safety has notified VTR the vehicle has been reported stolen.
SURVIVORSHIP RIGHTS	A survivorship agreement signed by two or more eligible persons indicating the vehicle is held jointly was filed with the title transaction.
TNRCC-EMISSION PRGM NON- COMPLIANCE	The vehicle is registered in Dallas, Tarrant, Harris, or El Paso County, is gasoline powered, 2 through 24 years old and subject to vehicle emissions testing and in the previous 12 months, the vehicle did not pass an emission test .
TITLE APPLICATION AWAITING RELEASE	A title transaction is in process.
TITLE HELD AWAITING DPS OK	A title transaction is awaiting confirmation from the department of public safety the vehicle is not a stolen vehicle.
TITLE IN PROCESS	This remark indicates a Texas titled vehicle has been sold and an application for a new title by the new owner has been received by the VTR and is in the process of being issued.
TITLE REVOKED	The title document number shown on the motor vehicle record has been revoked because of fraudulent evidence, false information, a stolen or converted vehicle, failure to provide proper evidence or ownership and documentation, revoked ownership and documentation or revoked registration.

Remark	Description
TITLE SUPERSEDED	A title transaction is in process on this motor vehicle record and is no longer a valid record and a new transaction (record) has taken the place of the previous record.
TITLE SUSPENDED	The certificate of title number shown on the motor vehicle record has been suspended.
TITLE SURRENDERED TO (STATE NAME ABBREVIATED)	A Texas-titled vehicle has been taken to another state and its ex-Texas owner (or a new owner) applied for a title in the new state. The new state returned the Texas title to the Texas VTR with a surrendered notice.
TITLE WAITING TO PRINT	A title transaction is in process.
TITLE WAITING TO PRINT (REPRINT)	A title transaction is in process.
TNRCC-EMISSION PROGRAM NON-COMPLIANCE	The vehicle is registered in Dallas, Tarrant, Harris, or El Paso County, is gasoline powered 2 through 24 years old and subject to vehicle emissions testing and in the previous 12 months, the vehicle did not pass emissions test.
TOLL SCOFFLAW	A maximum of three toll violations in ascending chronological date (oldest to newest).
TRAFFIC WARRANT	Registration renewal may be denied because of an outstanding traffic warrant.
VEHICLE TRANSFERRED	The record owner notified TXDMV on a specific month and year the vehicle was sold or traded.

Remark	Description
****STOLEN**** VERIFY TCIC BY VIN	This remark means check with reporting police agency who placed the remark in the NCIC-TCIC (National Crime Information Center-Texas Crime Information Center) files to see if this vehicle is still stolen or if a recovery notice was received within the past few days. The placing and removal of stolen remarks in the VTR database is done weekly by the Texas Department of Public Safety. Because the update occurs weekly, a VTR record may indicate a vehicle is stolen when it is not. TLETS operators should inquire into TCIC/NCIC to determine stolen status and follow standard hit confirmation procedures before police action is taken. If the VTR record contains this remark for 5 days following the removal of a TCIC stolen record, notification should be sent by administrative message to mnemonic address CRDP. Use the language: The stolen remark continues to be reflected on the VTR database response after the TCIC record was removed on <date>. Also, state whether the notifying agency is the entering agency or not.
VIN CERTIFICATION WAIVED	The vehicle identification number certification was waived. This remark is used to caution the tax collectors to require VIN certification form in the event an application for negotiable Texas title is filed in the future. Also applies to Title Only transaction supported by out-of-state evidence of ownership.
VIN IN ERROR	The vehicle identification number (VIN) is in error, or the year model is 1980 or older and the VIN is not a 17-digit VIN.

TCIC/TLETS Operation Manual – Part 2

Hit Confirmation

Any agency, which receives a record in response to an NCIC inquiry, where a potential match is made must confirm the hit with the entering agency prior to taking any official actions such as:

- arresting the wanted person
- detaining the missing person
- seizing the stolen property
- charging the subject with violating a protection order
- denying the subject, the purchase of a firearm
- denying the subject access to explosives as regulated under the Safe Explosives Act.

An exception occurs when the agency finding the wanted person is outside the geographic area of extradition or pick up indicated in the NCIC wanted person record. These records need not be confirmed, and the record **should not be located**.

Additionally, an agency detaining an individual on local charges where the individual appears identical to the subject of the wanted person record and is within the geographical area of extradition must confirm the hit.

Confirming a hit requires that the entering agency be contacted to:

- ensure that the person or property inquired upon is identical to the person or property identified in the record.
- ensure that the warrant, missing person report, protection order, or theft report is still outstanding; and
- obtain a decision regarding:
 - the extradition of a wanted person when applicable
 - information regarding the return of the missing person to the appropriate authorities
 - information regarding the return of stolen property to its rightful owner
 - information regarding the terms, conditions, and service of a protection order.
- determine if the entering agency wants the record to be located when the missing person was identified by partial body parts.

Hit Confirmation Request

When an agency receives a response from NCIC indicating a possible match of identifiers, the inquiring agency must send a request to the entering agency for confirmation using the YQ form. All records must be entered using the agency's primary ORI.

Remarks Section (REM)

Priority Level

Hit confirmation procedure are based on two levels of priority: Urgent and Routine.

Priority 1: Urgent

The hit must be confirmed within 10 minutes. In the instance a hit is the only basis for detaining a suspect or the nature of a case requires urgent confirmation of a hit, priority 1 should be specified.

Priority 2: Routine

The hit must be confirmed within 1 hour. Generally, this priority will be used when the person is being held on local charges, property has been located under circumstances where immediate action is not necessary, or an urgent confirmation is not required.

Request Number

Upon receipt of a hit confirmation request, the entering agency must furnish a substantive response within the designated timeframe, i.e., a positive or negative confirmation or notice of the specific amount of time necessary to confirm or reject.

If the requesting agency does not receive a substantive (reasonable) response within the designated timeframe, the agency should generate a second request with a copy to its CSA (TCIC Operations for Texas) and to the CSA of the entering agency. The CSA of the entering agency will initiate appropriate action to ensure proper response to a hit confirmation request and to comply with system standards.

The requesting agency still fails to receive a response, the agency should then notify the NCIC Quality Control staff by a third message with a copy to the CSAs involved.

NCIC Number

The NCIC Number (NIC) must be included on any out-of-state hit confirmation requests or responses.

Remarks Section

The Remarks section of the transaction form is for communicating between agencies during the hit process, such as:

- Some agencies must transport to the county jail which takes some time, and the inquiring agency will not place a locate on the record until the person is booked into jail.
- To indicate where the person is being transported, some agencies are close enough to transport to the entering agency's jail facility and eliminates the decision of pick up, or the person could be transported to the hospital first before booking.
- To include the location of the vehicle storage facility and contact information for the owner.
- To indicate the location of the missing juvenile and who is allowed to claim them.

It is recommended that agencies utilizing administrative messages during the hit confirmation process should retain those messages for documentation purposes.

Phone Confirmation

NLETS is the recommended network for hit confirmation. Even if the initial confirmation is handled via phone, NLETS must be used for documentation. Nlets has created an inquiry (YQ) and a response (YR) format for hit confirmation. However, if the entering agency confirms via the phone, a second request may not be sent. Responsibilities for the hit confirmation process are shared between the inquiring agency and the agency that entered the record.

Hit Confirmation Response

The entering agency is responsible for sending a YR response for a hit confirmation.

Confirmation Status

Code	Confirmation Status Fields
Y	Yes
N	No
P	In Process of Being Confirmed
E	Valid but Awaiting a Decision on Extradition

Every agency upon taking a person into custody, identifying a missing person, or acquiring property, after confirming the hit, must place a locate on the corresponding NCIC record(s). Exception: If the missing person has been positively identified by body parts, the locating agency to be located. The record may remain in NCIC for future positive identification in the event additional body parts are recovered.

Agencies are encouraged to maintain copies (electronic or hard copy) of hit confirmation information, to include YQ and YR messages, to assist if the agency needs to validate the actions it has taken pertaining to a hit confirmation.

Retention of Terminal-Produced Printout

When an operational inquiry on an individual or property yields a valid positive response (hit), the terminal-produced printout showing the inquiry message transmitted and the record(s) on file in NCIC must be retained for use in documenting probable cause. This document must be retained for the detention of the missing person, arrest of the wanted person, or seizure of the property. The printout may also prove valuable in a civil suit alleging a false arrest, a false imprisonment, a civil rights violation, or an illegal seizure of property. If two-part paper is used, either the original or the legible copy is admissible in federal court. Whether a state court will accept the legible copy or whether only the original will suffice depends on the state's rules of evidence.

When an NCIC inquiry yields a hit, the terminal employee making the inquiry should note on the terminal-produced printout precisely how, when, and to whom the information was given, initial and date this notation, and forward the printout to the inquiring officer or agency for retention in the case file. This procedure establishes the chain of evidence for the communication should the arresting officer need to substantiate actions in a judicial proceeding.

The printout must be retained for as long as there remains any possibility that the defendant will challenge the arrest, search, or other law enforcement action taken because of the information contained on the printout. The printout must be retained until all possible levels of appeal are exhausted or the possibility of a civil suit is no longer anticipated.

Locate Message and Procedure

The purpose of a locate transaction is to indicate the subject of the record (person or property) has been apprehended or located. The locate message must be sent when an agency other than the entering agency:

- finds the missing person.
- apprehends the wanted person.
- recovers the property on file in NCIC.

The only exceptions to placing a locate message occur when the hit contains a no extradition indication or an extradition limitation indication and the agency finding the person is outside the geographical area of extradition. In such a case, the record should not be located.

If the locating agency intends to hold the wanted person on local charges, the locate transaction must indicate detention by placing DETN in the Extradition Field. All records on file for the found missing person, apprehended wanted person, or recovered property must be located to ensure they are in the correct status.

A locate message cannot be used by the agency entering the record in NCIC unless the locating agency incorrectly places a locate or fails to place a locate on a wanted person record. In that case, the entering agency may place a locate on its own record with the requirement that a detainer is placed on the record.

Extradition

EXTR indicates that the subject will be returned to the wanting agency and must be included in the locate message when:

- the agency that entered the record advises that the apprehended/located person will be extradited or picked up intrastate.
- the person is wanted by a federal agency and has been apprehended/located by federal or local authorities.

NOEX indicates that the subject will not be returned to the wanting agency and must be included in the locate message when:

- the agency that entered the record advises that the apprehended/located person will not be extradited or picked up intrastate based on circumstances at the time of apprehension/location.
- the apprehending/locating agency has received no information concerning an extradition decision after making a concerted effort to obtain such information.

When a record has been previously located with NOEX and a second locate with NOEX is placed against the record, the complete wanted person record, including all supplemental data, is automatically retired. The locate acknowledgment will indicate that the record is being retired.

For example:

1L01HEADER

DCFBIWA00

2ND LOCATE NAM/DILBERT, ROBERT OCA/213233 RECORD BEING CANCELED

DETN indicates that the subject is being detained by the locating agency, will be returned to entering agency upon release and must be included in the locate message when:

- the locating agency intends to hold the subject on local charges.
- the wanted person has been found in a government holding facility, such as in prison.

\$.L. Locate Notification

A \$.L. administrative message is transmitted to the agency that entered an NCIC record when a locate is placed by any agency, including the ORI of record, to indicate that an item(s) of stolen or lost property was recovered or that an individual was apprehended or located.

The following is an example of a \$.L. administrative message:

IMMED CONFIRM WARRANT AND EXTRADITION WITH ORI

Detained Wanted Person

Detainer information may be appended only to the NCIC Wanted Person record in located status. When an inquiring agency receives a positive response, confirms that the subject is identical, the warrant is outstanding and extradition is authorized, the inquiring agency must place the record in located status. If the locating agency intends to hold the individual on local charges, the locate transaction should indicate detention by placing DETN in the Extradition field. The entering agency should append any detainer information to the record within 5 days of the locate transaction. A detainer will allow the record to remain in NCIC until extradition can occur.

Sentence Expiration Date

Place of Incarceration

Notification of Detainer (\$.O)

Upon entry of detainer information, an unsolicited message, \$.O, Incarcerating Agency Notification, is sent to the incarcerating agency. In addition, upon modification of detainer information, an unsolicited message, \$.O.MDW, Modify Detainer Notification is sent to the incarcerating agency.

Sentence Expiration Notification (\$.P)

Five days prior to the date of sentence expiration (date shown in the DSE), the ORI of record will receive a \$.P message. This unsolicited message from NCIC is a reminder to the agency of the subject's pending release and the need to contact the incarcerating agency to arrange extradition.

An inquiry should be made prior to the release of a person who is in custody or has been incarcerated.

Positive Return - Containing Detainer Information

When To Use a Clear Message

Clearance of a record is restricted to the agency that entered the record. A clear message is transmitted when:

- the agency apprehending the wanted person is the agency that entered the record, or
- the agency that entered the record is officially advised that the wanted person is in custody of another agency unless the individual is being detained.

The use of a clear transaction results in the immediate removal of the subject record and all associated identifiers.

Clear Procedure If Wanted Person Apprehended by Agency That Entered Record

- If the agency that entered the record apprehends the wanted person, only the date of clear must be entered following the two record identifiers.

Clear Procedures If Wanted Person Apprehended by An Agency Other Than ORI

- If an agency other than the ORI of the record apprehends the wanted person, use of the following procedures will ensure that the cleared record contains complete apprehension data (date of clear, recovering agency identifier, and recovering agency case number).
- If the record being cleared is in a located status, only the date of clear must be entered following the two record identifiers.
- If the record being cleared is in an active status, the date of clear followed by the recovering agency identifier and the recovering agency case number, in that order, without message field codes, must be entered after the two record identifiers. The recovering agency must provide this information to the originating agency for it to be included in the clear message.
- Even though the record may be cleared without this data, inclusion of the recovering agency identifier and recovering agency case number makes an historical record complete.

When the NCIC Wanted Person record contains code 5 or E (EXTRADITION ARRANGEMENTS PENDING SEE MIS FIELD) in the EXL Field, the Wanted Person record should be cleared by the entering agency once the subject has been extradited.

Additional Guidelines for Clear

Following the recovering agency information (RRI and RCA), users are expected to include benefits and effectiveness data. These fields include RPS, PAR, HIT, NPA, NPF, VNP, VOR, and VRC. The entry of benefits and effectiveness data is not MFC-dependent. Additional information on benefits and effectiveness data can be found in the Introduction chapter of this manual. When clearing a record in the NCIC System, the user is expected to enter benefits and effectiveness data. The RPS Field is entered directly after the RCA Field. For a clear message, the RPS value will be either OTHER MEANS, or PREVIOUSLY IDENTIFIED.

Files That Do Not Require a Hit Confirmation

NCIC allows for the entry of certain file categories that do not require a confirmation. The purpose of these files is to give officers as much information as possible when encountering a person and to protect the lives of officers and members of the community, therefore do not arrest based on these returns.

Offline Searches

The TXDPS logs and archives all messages, database inquiries, and other transactions sent over the TLETS network. Data sent and/or received via the TLETS system since 01/01/2012 is stored in logs that TLETS and TCIC Operations can search. This capability provides law enforcement officials with a powerful investigative tool when dealing with criminal investigations, potential TLETS misuse, or official misconduct. Offline requests will only be processed when the request concerns ongoing criminal investigations or to provide documentation on an allegation of misuse of the TLETS system.

Conducting offline searches requires a significant investment in both man-hours and DPS resources. Due to the sheer volume of information available from the databases, requesters are asked to limit their search criteria to parameters that will provide a manageable and relevant result. Requests must be in written form to DPS.

Your request must include:

- the nature of the investigation, including the specific offense involved.
(Major felonies will take priority over lesser offenses).
- a specified timeframe to be searched (DPS reserves the right to shorten the time frame requested if the request could negatively impact DPS resources).
- point of contact information of whom to provide the offline results
- must have acceptable searchable elements that include as much information as possible such as:
 - full name and date of birth,
 - driver's license or ID card numbers
 - vehicle license plate numbers or VIN numbers
 - serial numbers, owner-applied identification numbers, NIC numbers, etc.

All offline requests should be submitted to TCIC.Operations@dps.texas.gov unless it's for system misuse then TCIC.Audit@dps.texas.gov should be contacted first.

Please note, any request searching prior to 01/01/2012 will require a longer processing timeframe.

Control Field

The Control Field is an additional field and up to ten characters in length. In this field, the operator's information can be placed as reference for identification purposes of the requestor.

Nlets recommends using alphabetic and numeric characters. Additionally, special characters such as: &, \$, /, + are allowed. When inquiries are sent to Canada, the control field follows the above rules, but may not contain special characters such as: \, &, \$ or CQCU as the first four characters.

Delayed Query Notification

A \$.H, Delayed Query Hit Notification, which is another administrative message that is sent to both the ORI entering agency or modifying a record and the ORI modifying agency of a query transaction which resulted in a hit response made within the last 5 days.

Combination Forms

Combination forms allow a user to enter data into a single form. The data will be automatically re-formatted to the specific forms required for the desired stolen/wanted and/or registration/driver license check.

Registration/Stolen/Driver License/Wanted Check (RSDW)

Registration/Stolen/Driver License with Wanted Check (RSDW) form allows users to run vehicle registration and stolen checks and/or driver license and wanted person (QWA) checks by name (NAM) both in-state and/or out-of-state in a single transaction. This form cannot be used for states with unique query requirements, like the KQ needing ATN and PUR fields to request driving history.

Nlets ORION Directory

The Nlets ORION directory allows TLETS member agencies to obtain agency contact information from all Nlets users, including Canadian agencies. There are three types of inquiries that one may use to access the ORION file.

Query	Response
Retrieve specific records by ORI.	The response will provide the complete text of all records on file for the ORI unless there are more than three. If there are more than three, summary records will be returned.
A file search by location, limited if desired to an agency type.	The response to a query by location will usually comprise summaries of all matching records. However, if there are three or fewer matches, complete records for the matches are returned.
A file search by Federal agency ID, limited if desired, to a location	The response to a query by Federal agency ID will usually comprise summaries of all matching records. However, if there are three or fewer matches, complete records for the matches are returned.

National Insurance Crime Bureau

The National Insurance Crime Bureau (NICB) is a crime prevention organization assisting law enforcement in the prevention, detection, and prosecution of the financial crimes of theft, fraud and arson relating to personal property. <https://www.nicb.org/>

NICB resources include a staff of strategically located special agents available to assist law enforcement in matters related to theft, fraud, and arson. Each special agent is always on call to aid law enforcement in the identification of vehicles under investigation. Special agents are highly qualified investigators and experts in identifying vehicles on which identifying numbers have been removed, changed, altered, or obliterated. Special agents participate in training programs for law enforcement officers charged with the responsibility of theft, fraud, and arson investigations.

Niambi Tillman, Southwest Region Director of Operations
1560 East Southlake Blvd., Suite 100
Southlake, TX 76092
ntillman@nicb.org
817-659-3397
847-544-7212 FAX

NICB maintains a rapidly expanding national and international index of more than 250 million records related to vehicles including manufacturer's shipping and assembly, vehicles imported and exported, thefts, impounds, salvage, auction, pre-inspection, vehicle claim, rental, theft, theft (recovery) and NCIC/CPIC canceled records. The database is designed to include vehicle liability, physical damage, and related homeowner claims, to track a motor vehicle's complete life cycle from birth to death. NICB files include data on passenger vehicles, multipurpose vehicles, trucks, trailers, motorcycles, snowmobiles, construction and farm equipment, boats, and uniquely identifiable parts.

Impound/Export File Query (NIQ)

Impound responses indicate that the vehicle has been impounded but does not tell whether the vehicle was claimed or remains on the lot. Impound records will only be returned on an NIQ if the date of impound is less than 60 days from the date of the query. An Export File response indicates that a vehicle has been exported out of the country, but it does not indicate if the vehicle has been returned to the country. Access to these files is for investigative purposes only.

All Files Query (NAQ)

This transaction interrogates all available NICB files with one exception, if only a partial VIN is available, the user may submit the last eight characters of the VIN. To identify the VIN as partial to NICB the user **MUST** preface the partial VIN by the word PARTIAL. For example, a partial VIN with the year 1990 would look like this: VIN/PARTIAL24657490. Note that there is no space or separator between the word PARTIAL and the eight-character VIN. When a partial VIN search is requested only the Manufacturers Shipping File will be searched.

Query NICB Files (NAQ/NIQ)

***Indicates mandatory fields**

Header Information

***Message Key (MKE) – NAQ/NIC**

Originating Agency Code (ORI)

Control Field (CTL)

Required Information

***Vehicle ID Number (VIN)**

NICB provides automated access to the following files:

- Impound File
- Export File
- Manufacturer's Shipping File
- Salvage File
- International Index File
- Auction File
- Pre-Inspection File
- Vehicle Claim File
- Rental File
- Theft File
- Theft (Recovery) File
- NCIC/CPIC Canceled File
- NICB Lien File
- NICB Key Code File

NICB and NCIC Stolen Vehicle Entries

NICB has a mirror image of NCIC's stolen vehicle file. Every stolen vehicle entered on NCIC will be passed to NICB by NCIC. NICB will enter this record on their file and interrogate Impound (last 60 days entries), Export, Auction, and International Index Files.

Manufacturer's Shipping File

Shipping responses indicate to whom, when and where a vehicle has been shipped.

Salvage File

Salvage responses indicate that the vehicle has been damaged (cause of loss) and what the cash value is of the vehicle prior to the loss, the received value, and the appraised value.

International Index Salvage

NICB maintains records of stolen or salvaged vehicles for Canada, Germany, France, and Sweden. NAQ queries will check this index and return any hits. Users should contact NICB if a hit is obtained on these records.

Auction File

Auction responses include those records that are processed through auction houses prior to the sale and sent to NICB.

Pre-Inspection File

Pre-inspection responses occur when vehicles are run through an authorized inspection center in several states and pictures are taken of the vehicle including the VIN plate. The photos are then sent to a specific company for examination and then run through the NICB's VINASSIST program. If they do not pass this edit, these records are put into the NICB system.

Vehicle Claims File

Vehicle claim responses contain information on physical damage to a vehicle. After the insurance adjuster or appraiser files his/her report, he/she sends a copy to a vendor used specifically for physical damage estimates. The adjuster or appraiser will process the claim and forward it to NICB. By doing this, it will raise a red flag to the appraiser if a claim has been duplicated.

Rental File

Several rental car agencies provide and maintain a complete inventory on the NICB system. When impounds or exports are processed, they are automatically checked against this file. To qualify for entry on the NICB file, the vehicle must be added to a fleet, missing, never returned, located, or taken out of a fleet.

NICB Theft Record/Recovery

NICB receives approximately 400,000 theft records from its member companies. While NCIC and CPIC active theft records are not available to law enforcement through NICB, member company thefts, both active and inactive, are displayed when querying NICB by VIN. This allows an agency to deal directly with the member company when appropriate.

NICB Lien Record

The NICB Lien record indicates that a finance company that is an associate member of NICB has an interest in a VIN. The Lien record will return a match containing the name of the lienholder that has an active lien on record with NICB.

NICB Key Code File

The NICB Key Code record will return a match in which a key code and/or an immobilizer reset has been requested of the vehicle manufacturer, by a registered locksmith or dealer service center. The NICB Key Code Record match will contain the date of occurrence, original equipment manufacturer type and a transaction type. The three transaction types are: Key Code Request,

Immobilizer Reset Request, or Key Code and Immobilizer Reset Request. Non-original equipment manufacturer transactions will also contain a Transaction ID number and a Locksmith ID number.

NCIC/CPIC Canceled Record

NICB maintains NCIC canceled records online dating back to 1972. NICB provides an immediate response, unlike NCIC where an offline search is required to search historical data. Canadian Police Information Centre (CPIC) canceled records search back to 1996.

Commercial Vehicle Information

The Performance and Registration Information Systems Management file (PRISM) provides access to safety information on motor carriers and the vehicles that are assigned to those motor carriers. The Safety and Fitness Electronic Records (SAFER) System provides the capability to query licensing and insurance data. The Federal Motor Carrier Safety Administration of the U.S. Department of Transportation has developed the SAFER and PRISM Systems. These files contain information on all motor carriers who have been assigned a US Department of Transportation Number (DOT Number). For more information: <https://ai.fmcsa.dot.gov/PRISM>

Nlets users can access the PRISM Target File and SAFER system through a Nlets Carrier Status Query (ACQ) or a Nlets Vehicle Status Query (AVQ). For more information: <https://safer.fmcsa.dot.gov/CompanySnapshot.aspx>

FMCSA's Performance and Registration Information Systems Management (PRISM) is a Federal partnership with FMCSA, State commercial motor vehicle (CMV) registration offices and law enforcement that improve highway safety by identifying and immobilizing interstate commercial motor carriers that are prohibited from operating due to a Federal Out-of-Service (OOS) order.

PRISM processes alert State systems when a CMV carrier with a Federal OOS order attempts to register or renew a vehicle registration. The State registration office can then deny, suspend, or revoke the CMV registration. State law enforcement may also use PRISM tools to identify and immobilize OOS vehicles at roadside. PRISM's goal is to immobilize and prohibit carriers with serious safety deficiencies from driving on our roads and potentially prevent crashes, injuries, or fatalities.

International Fuel Tax Association

The purpose of the International Fuel Tax Association (IFTA) transaction is to identify companies severely delinquent in paying their fuel taxes. The query will search the IFTA database and return exact matches based upon the Federal Identification Number. This application allows Nlets users who are responsible for roadside enforcement of fuel tax laws to identify those companies that are severely negligent in paying their fuel taxes. <https://www.iftach.org/>

International Fuel Tax Association Query (FQC)

***Indicates mandatory fields**

Header Information

Originating Agency Code (ORI)
Control Field (CTL)

Company Information

***Federal ID Number (FEI)**

Use transaction FQC to inquire the International Fuel Tax Index. This resource provides the roadside enforcement officer with access to information regarding the status of carrier fuel tax payments based on the IFTA Federal Identification Number.

Agencies can request information from the IFTA File by the Federal Identification Number. IFTA will search its index. Multiple responses could occur if more than one state or province has entered a company in the file. When a hit is made, the system will access the contact information for the state or province that entered the record and provide the following information:

- Company Name
- Federal ID Number
- DOT Number
- Date of Entry
- Contact Name
- Contact Phone Number
- Alternate Phone Number
- FAX Number
- Text Message Advice

Aircraft Registration

The Aircraft Registration Query is an inquiry capability that provides information to Nlets users about commercial and private aircraft registered with FAA. Nlets hosts a local version of the FAA Releasable Aircraft Database that it will use to run the query. The database will be updated once every 24 hours (excluding weekends and holidays).

Parole, Probation, Corrections Transactions

Nlets Query Parole, Probation, Corrections (PAQ), provides standardized access regarding to out-of-state Parole, Probation, and Corrections Query. Only criminal justice agencies authorized to access criminal records will be allowed to submit to Nlets. Some states treat this type of information as criminal history, and some do not. Therefore, inclusion of the purpose code and attention fields is optional. Some states may not support so Nlets will reject the query.

Using the Destination code of NL (Nlets) will send a query to ALL states that support the PAQ message key. Nlets then collects all relevant responses to this query, merges them together while suppressing the no hit responses, and sends them onto the querying user as a single response. These responses will also contain summary data indicating which states this query was sent to, which states responded with hits, which responded with no hits, and which states did not respond at all.

MKE	Description
PPQ	Used to access parole information from a state
PBQ	Used to access probation information from a state
PCQ	Used to access corrections information from a state
PAQ	Used to interrogate all three of these files within a state: PPQ, PCQ, PBQ

Immigration Alien Transaction

The Immigration Alien Query (IAQ) provides timely information on aliens suspected of criminal activity and status information of aliens under arrest. A query transaction searches multiple databases, NCIC and the Interstate Identification Index. The Law Enforcement Support Center (LESC) staff responds to the requesting law enforcement agency.

The information can be used for the following purposes:

- assist with investigations
- provide identification and background data on subjects for correctional departments
- notify ICE of a subject's incarceration or placement on probation

The LESC operates on a 24-hour, seven day a week basis. For additional information, direct requests to:

Law Enforcement Support Center
188 Harvest Lane
Williston, VT 05495

ORI: VTINS07S0
Phone: 802-872-6000
FAX: 802-288-1222

Due to the sensitive nature of the information to be provided by the LESC, only agencies authorized to request criminal record information over Nlets will be authorized to access the LESC.

All queries sent to the LESC must contain the required fields of information. Any additional information supplied in the query will increase the probability of finding a positive record and enable a more informative response to be returned. Response times will vary depending upon the return of individual state criminal histories and the extensiveness of the query. Immediately upon receipt of a query, a computer-generated message acknowledging receipt will be automatically returned to the ORI.

Law Enforcement Support Center Files

The Law Enforcement Support Center (LESC) searches multiple files after receiving a query via Nlets.

Central Index System

Central Index System (CIS) is a centralized, computer-based information system that serves as the heart of the United States Citizenship and Immigration Services (USCIS) mission support, both in areas of service benefits and law enforcement. The Central Index System contains data on the following:

- Lawful Permanent Residents
- Naturalized Citizens
- Violators of Immigration Laws
- Aliens with Employment Authorization Document (EAD) Information
- Others for whom the Service has opened alien files or in whom it has a special interest

CIS provides several major capabilities, including searching the alien database by multiple criteria and displays summary level data on the alien.

The major search keys include the alien registration number and subject's name. Variations of the name search are provided by allowing a direct search using exact name or a sounds-like (Soundex) search using a similar sounding name of an alias name. In addition, the name searches allow other identifying information as secondary search criteria such as: date of birth and country of birth. Date of birth is the most often used secondary search criterion.

Computer Linked Application Information Management System

Computer Linked Application Information Management System (CLAIMS), is an application processing system that provides information concerning the receipt, adjudication and notification processes for applicants and petitioners of the United States Citizenship and Immigration Services (USCIS) benefits, such as employment authorization documents, permanent residency, etc. The current CLAIMS implementation combines several systems that support these processing requirements. This system also provides information on the status of a pending application of the USCIS benefits.

Arrival Departure Information System

Arrival Departure Information System (ADIS) provides information gathered from Advanced Passenger Information System (APIS), United States Visitor and Immigrant Status Indicator Technology Automated Biometric Identification System (US-Visit IDENT), US Visit Exit processing, SEVIS, CLAIMS and CCD (Consular Consolidated Database). Under the basic search option using a name and DOB we can gather arrival and departure information for travelers entering or leaving the United States.

Enforce Alien Removal Module

Enforce Alien Removal Module EARM/EABM (ENFORCE), provides information on the status and disposition of deportation cases, and on the statistics and summary data representing cases by status type and other activities:

- Captures deportable data
- Tracks aliens who are arrested, detained, or formally removed from the country
- Produces deportation forms and reports
- Makes the information accessible online to deportation officers and other ICE users
- Maintains information on aliens detained by the service and reports on this activity

Treasury Enforcement Communications System

Treasury Enforcement Communications System (TECS SQ94), contains arrival, departure and additional information pertaining to nonimmigrant aliens entering the United States:

- Contains data on an individual's status
- Identifies individuals who may have over-stayed
- Provides statistical information to ICE managers
- Provides for queries based on biographical, classification and citizenship data

Student and Exchange Visitor Information System

Student and Exchange Visitor Information System (SEVIS), is the primary vehicle for identifying, locating, and determining the status or benefits eligibility of non-immigrant students and their dependents. It also contains information for non-immigrant exchange visitors. Data is captured from forms relevant to foreign students and are available for query. This data includes requests for extensions, change of status, transfers, and employment authorization. SEVIS also maintains records on approved schools, school officials and current or past violations.

Enterprise Citizenship and Immigration Services Centralized Operational Repository

Enterprise Citizenship and Immigration Services Centralized Operational Repository (eCISCOR (CLAIMS4)), is a casework management system that tracks the naturalization process of aliens seeking United States citizenship. The data is captured from forms and applications submitted by aliens. The data includes general biographical background information, addresses, processing dates, interview dates and the disposition or status of the application for US citizenship.

Refugee, Asylum and Parole System

Refugee, Asylum and Parole System (RAPS) is a comprehensive case management system that tracks the refugee, asylum, and parole process of aliens in the United States. The information contained in the RAPS is obtained from forms, applications, and interviews with the alien. The case status is tracked throughout the cycle, showing the status of the alien at time of entry and the completion of the process. The data includes general biographical background information, addresses, processing dates, interview dates and information regarding the outcome of hearings.

Person Centric Query Service

Person Centric Query Service (PCQS) provides CIS status verifiers with the ability to submit a single query for all transactions involving an immigrant across several connected systems. PCQS returns a consolidated response of the immigrant's past interactions with the federal government as he/she passed through the U.S. immigration system. PCQS does not store data but serves as a conduit for the delivery of data stored in the connected systems.

Automated Targeting System

Automated Targeting System (ATS) are operated by the Department of Homeland Security and Customs and Border Protection. As a decision support tool, ATS compares traveler, cargo and conveyance information against law enforcement, intelligence and other enforcement data using risk-based targeting scenarios and assessments. Automated Targeting System/Passenger (ATS-P). is a web-based tool used to collect, analyze, and disseminate information for the identification of potential terrorists, transnational criminals and in some cases, other persons who pose a higher risk of violating US law. Automated Targeting System/Land (ATS-L) evaluates previous crossing records as well as internal and external data sources for targeting at the land border. ATS-L stores vehicle registration as well as registered owner data for U.S. plated vehicles and biographical information on the occupants of the vehicle collected through vehicle primary processing at land border ports of entry.

United States Visitor and Immigrant Status Indicator Technology

United States Visitor and Immigrant Status Indicator Technology (US-Visit) was established in accordance with several Congressional mandates requiring that the Department of Homeland Security create an integrated, automated entry-exit system. The system records the arrival and departure of aliens, deploys equipment at all ports of entry to allow for the verification of alien identities and the authentication of their travel documents through the comparison of biometric identifiers. It utilizes an entry-exit system that records alien arrival and departure information from these biometrically authenticated documents.

Law Enforcement Support Center Help

The LESC, maintains a HELP file to provide additional information and may be accessed by sending an administrative message (AM) to AXADMHELP. Assistance is also available through an administrative message (AM) sent to AX.

TCIC Continuity of Care Query

In compliance with the Texas Health and Safety Code Chapter 614, the Department of State Health Services (DSHS) requires all Local Mental Health Authorities (LMHA) and Local Behavioral Health Authorities to exchange data with local and county criminal justice systems on individuals who also have a history of state mental health care within the DSHS funded system.

The Department of State Health Services (DSHS) developed this data-exchange process in collaboration with the Texas Correctional Office on Offenders with Medical or Mental Impairments (TCOOMMI), the Texas Commission on Jail Standards (TCJS) and the Texas Department of Public Safety (DPS) to ensure continuity of care for individuals with mental illness who are involved with the criminal justice system, and to provide local post-booking jail diversion opportunities.

The data is exchanged electronically between the criminal justice system and the local authority. The type of information that is routinely exchanged includes, but is not limited to, the individual's name, date of birth, social security number, sex, ethnicity, diagnoses, local authority, or State Mental Health Facility (SMHF) service provider identifier and the dates of most recent service by a community center or SMHF.

Texas Health and Safety Code Section 614.013

Continuity of Care for Offenders with Mental Impairments

- a. The Texas Department of Criminal Justice, the Department of State Health Services, the bureau of identification and records of the Department of Public Safety, representatives of local mental health or intellectual and developmental disability authorities appointed by the commissioner of the Department of State Health Services, and the directors of Community Supervision and Corrections Departments shall adopt a memorandum of understanding that establishes their respective responsibilities to institute a continuity of care and service program for offenders with mental impairments in the criminal justice system. The office shall coordinate and monitor the development and implementation of the memorandum of understanding.
- b. The memorandum of understanding must establish methods for:
 1. identifying offenders with mental impairments in the criminal justice system and collecting and reporting prevalence rate data to the office.
 2. developing interagency rules, policies, procedures, and standards for the coordination of care and the exchange of information on offenders with mental impairments by local and state criminal justice agencies, the Department of State Health Services and the Department of Aging and Disability Services, local mental health or intellectual and developmental disability authorities, the Commission on Jail Standards, and local jails.
 3. identifying the services needed by offenders with mental impairments to reenter the community successfully; and
 4. establishing a process to report implementation activities to the office.

b-1. Subject to available resources, and to the extent feasible, the methods established under Subsection (b) must ensure that each offender with a mental impairment is identified and qualified for the continuity of care system and serve adults with severe and persistent mental illness who are experiencing significant functional impairment due to a mental health disorder that is defined by the Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), including:

1. major depressive disorder, including single episode or recurrent major depressive disorder.
 2. post-traumatic stress disorder.
 3. schizoaffective disorder, including bipolar and depressive types.
 4. psychotic disorder.
 5. anxiety disorder.
 6. delusional disorder; or
 7. any other diagnosed mental health disorder that is severe or persistent in nature.
- c. The Texas Department of Criminal Justice, the Department of State Health Services, local mental health or intellectual and developmental disability authorities, and Community Supervision and Corrections Departments shall:
1. operate the continuity of care and service program for offenders with mental impairments in the criminal justice system with funds appropriated for that purpose; and
 2. actively seek federal grants or funds to operate and expand the program.
- d. Local and state criminal justice agencies shall, whenever possible, contract with local mental health or intellectual and developmental disability authorities to maximize Medicaid funding and improve on the continuity of care and service program for offenders with mental impairments in the criminal justice system.
- e. The office, in coordination with each state agency identified in Subsection (b)(2), shall develop a standardized process for collecting and reporting the memorandum of understanding implementation outcomes by local and state criminal justice agencies and local and state mental health or intellectual and developmental disability authorities. The findings of these reports shall be submitted to the office by September 1 of each even-numbered year and shall be included in recommendations to the board in the office's biennial report under Section 614.009.

Continuity of Care Authorized Agencies

- Only local and county jails operating under the authority of the Texas Commission on Jail Standards are authorized to utilize the Continuity of Care inquiry.
- The data obtained from a Continuity of Care inquiry may only be used by the jail to provide continuity of care for the subject within their custody.
- This information may not be further disseminated or used for other purposes.

Continuity of Care Inquiry Users are authorized to:

- Receive information relating to a special needs offender for the purposes of continuity of care, regardless of whether other state laws make that information confidential.
- Disclose the offender's identity, medical and mental health history, needs, treatment, supervision status, compliance with supervision, etc. if the disclosure is related to continuity of care services.

Continuity Of Care Misuse

A person commits a Class B misdemeanor offense if that person releases or discloses confidential information obtained through this process for the purposes other than continuity of care and services, except as authorized by other law or by the consent of the person to whom the information relates.

Continuity of Care Procedures

- During the booking process, every subject should be checked against the DSHS client database.
- All LMHA are required by law to exchange information with those local and county jails supervised by the Texas Commission on Jail Standards.
- Jails authorized to perform the Continuity of Care transactions should collaborate with their LMHA and agree on the exact protocols to be used when an offender is identified in the TLETS response.
- When a TLETS inquiry results in a positive match, DSHS generates a notification to the LMHA of the TLETS inquiry and the results through the DSHS system.
- It is important that the requestor analyze the information carefully for a match.
- The LMHA and jail must follow a specific communication plan so that a continuity of care decision can be clearly expressed by the LMHA, and appropriate action can be taken by the jail.

Continuity of Care Match Types

1. Exact - All the mandatory and non-mandatory person data submitted with an exact match on all the data
2. Possible - A match on some of the person data submitted
3. No match found - Neither a possible match nor an exact match was found.

The response may contain multiple potential matches. Typically, only one “exact” match will be listed in the matches. Multiple possible matches could be displayed, especially in cases where a common name is involved.

Continuity of Care Exact Match

An Exact Match indicates the inquiry data matches on all the following:

- Last Name
- First Name
- Date of Birth
- Sex
- Social Security Number
- Ethnicity

Continuity of Care Possible Match

A possible match indicates that the inquiry data matches on one of the following:

- Last Name, First Initial, Date of Birth and Sex
- Last Name, First Initial, Birth Year, Sex and Social Security Number
- First 3 letters of the Last Name, First Initial, Year and Month of Birth, Sex OR Social Security Number
- Last Name matches to any found, First Initial matches to any found, Age is within 5 years, Sex and Social Security matches to others found

Continuity of Care No Match

No Match indicates the inquiry data submitted did not meet the criteria for an EXACT match or a POSSIBLE match.

Retention of Continuity of Care Data

- The information disclosed as a part of this process can only be used for the purpose of continuity of care or services.
- After the information is used for that purpose, it must either be destroyed or stored in a secure environment, available only authorized personnel as determined by the local agency administrator.
- The local agency must have written guidelines for securing the information in a secure area with limitation of access.

State Warrant Transaction

State Warrant Transaction query (SWQ) provides access to State Warrant information on a subject from all states that participate and returns a single merged response. These responses will also contain summary data indicating which states this query was sent to, which states responded with a hit, which responded with a no hit, and which state did not respond at all.

Sex Offender Registration

Nlets Query Sex Offender Registration (SOQ) allows access to out-of-state Sex Offender Registration. The SOQ message type will interrogate the destination state database and return with information on the subject or a notification of NO RECORD.

A Sex Offender transaction with a Destination code of NL (Nlets), will send a query to ALL states that support the SOQ message key. Nlets then collects all relevant responses to this query, merges them together while suppressing the no hit responses, and sends them onto the querying user as a single response. These responses will also contain summary data indicating which states this query was sent to, which states responded with hits, which responded with no hits, and which states did not respond at all.

Sex Offender Registration Notification

The Sex Offender Registration Notification (SON) serves as a formal method for an agency to communicate with another agency regarding the relocation of a sex offender. Although the sending agency may have additional information, this notification is meant to alert the agency to which the registrant is relocating. This agency is encouraged to contact the sending agency if additional information on the subject is needed.

Communicating with Canada

Nlets supports a computer-to-computer interface with Canada for the purpose of exchanging criminal justice and criminal justice related information. It is important to understand that Canadian information is provided from several sources. The Canadian Police Information Centre (CPIC), a system somewhat like FBI/NCIC, is providing hot file and vehicle registration and driver license status information for the provinces and territories. Records are maintained by the individual provinces and territories to be shared through CPIC. However, driver license information comes directly from CPIC when it pertains to criminal charges and Canada Motor Vehicle Registration: Road Motor Vehicles (RMV) would provide status.

As a part of this interface, users within Canada also will be obtaining information from users in the United States. Since requests from Canada will conform to formats currently in use, states must be able to accept and send to Canadian ORIs.

Information from Canada Policy for Use

The CPIC has both confidentiality and dissemination policies regarding the use of the information they provide. Within both the CPIC Policy Manual and Memorandum of Cooperation between the Royal Canadian Mounted Police (RCMP) and the FBI it states: Information is entrusted to the CPIC system for the purpose of communicating and sharing with the law enforcement and criminal justice community. Understanding that personal information is to be provided, received, and used only in accordance with domestic and international law applicable to the United States and Canada for criminal justice purposes to facilitate police and public safety by preservation of the peace and protection of the public.

There is a collective responsibility to ensure this information is safeguarded from improper and unauthorized access, use, disclosure, and dissemination. All information contributed to or retrieved from the CPIC system and NCIC/III systems is supplied in confidence and should be protected against disclosure to unauthorized agencies or individuals. Disclosure refers to the intentional or unintentional act of making known any data or information from the CPIC system including, but not limited to any investigation, individual or situation, and includes the act of dissemination. Dissemination refers to the intentional or unintentional disclosure of CPIC system information to one or many people. This includes, but not limited to, the disclosure of CPIC system information by one agency to other agencies or organizations.

Canadian privacy laws and CPIC policy require that users of CPIC data establish the accuracy and validity of the CPIC record prior to its use. Any record placed on the CPIC system is the subject of a police file maintained by the originator of the record if the record is on CPIC. A Canadian agency will be able to confirm its CPIC records promptly, 24 hours a day, seven days a week. Therefore, all information obtained from CPIC by U.S. law enforcement which is intended for use or to be acted upon, should be confirmed first by contacting the contributing Canadian agency to confirm accuracy and relevancy.

Reason Code

Every query directed to Canada, must have a reason code (RSN) indicating the general purpose of the request.

Reason for Request	Code
Narcotics	N
Fraud (includes counterfeit documents)	F
Violent crimes (includes robbery, murder, rape, bombing, etc.)	V
Traffic Violations	T
Theft	S
Humanitarian	H

Person/Property in Sight

Every query directed to Canada, must indicate whether the subject of the message is present (PPS) or in sight. The user will indicate in sight by entering a Y in this field. If the query is for investigative purposes or the subject of the message is not present or available place an N in this field.

Canadian Person File

Canadian Person Query (WQ) includes a variety of records, some not normally available from their United States counterpart, NCIC. Associated records such as vehicles, articles, guns, securities, or boats could be appended to the person record.

Take no official action on any response from the Canadian Person File without obtaining specific instructions from Washington D.C., INTERPOL. This information is provided for officer safety and is to be used only in conjunction with other information the inquiring officer may have at his or her disposal at the time of query.

Types of Information from CPIC Persons File

Wanted	A person who is arrestable and/or for whom a warrant has been issued. Persons wanted by Provincial, Canada-wide, and extraditable warrants are recorded.
Accused	A person against whom legal proceedings have commenced in relation to a criminal code offense or an offense under a federal statute, who is waiting final disposition, including any appeal, and for whom a warrant to arrest is not in force for that offense.
Prohibited	A person against whom an Order of Prohibition is in effect regarding liquor, firearms, vehicle driving (and boat operation), hunting or any other court or statute-imposed prohibition.
Parole	A person who has been convicted of a criminal offense and released on: • Parole/Day Parole/Life Parole • Mandatory Supervision • Temporary absence over 24 hours from a federal penitentiary • Electronic Monitoring
Court Action	A person who has been convicted or found guilty of an offense and: • Has been given a suspended sentence or conditional discharge under section 736 (1) CC • Has been released on probation • Has been placed on peace bond, recognizance or restraining order • Is a young offender who is in open custody
Refused	Meets the requirements of the Firearms Legislation of the Criminal Code. A person who: • Has been refused the issuance of a Firearm Acquisition Certificate (FAC) • Has been refused the issuance of a Firearm Registration Certificate (FRC) • Had an FRC revoked
Special Interest to Police	A person who is reported to being under observation, take no action based on this information and do not divulge the existence to any non-criminal justice personnel. Includes a person who is: • Suspected of committing criminal offenses and enough information is not available to prosecute • Known to be dangerous to himself/herself or to others • Involved in a serious criminal investigation and confidential information as to his or her whereabouts is required Only observation records containing information about an individual that may pose a danger to an officer will be returned. Other types of observed records that are kept merely for surveillance purposes will not be provided. There may be instances where a silent hit occurs. This means that the agency that entered the record will be notified that your agency inquired on his record, but your agency will receive a no-hit message.

Types of Information from CPIC Persons File

Missing	A person: • Reported missing • Who has been admitted/committed to a mental institution or hospital psychiatric ward and has left without permission or formal discharge • For whom a police agency has undertaken to assist in locating on compassionate grounds

Canadian Vehicle File

Canadian Vehicle Query (VQ) will include a variety of records, some not normally available from their United States counterpart, FBI/NCIC. On all inquiries to Canada, the user must include the reason code (RSN) indicating the reason for the query and the person/property in-sight code (PPS) indicating whether the person or property is in-sight of the officer making the query or requesting the information.

Once it has been confirmed that the vehicle is the correct vehicle reported to be in question and the status of such vehicle, as reported by the CPIC system, is current and correct, it can be detained and/or impounded pending specific instructions from Washington INTERPOL and/or the Canadian agency that entered the vehicle into the CPIC system. The locating agency should immediately contact Washington INTERPOL for further instructions regarding the vehicle.

Types of Information from CPIC Vehicle File

Stolen	A vehicle that has been stolen or taken from its rightful owner by the commission of a crime (a vehicle purchased from a dealer under false pretenses).
Surveillance	In the event a vehicle is reported as being under observation, absolutely no action is to be taken by the inquiring officer. This information is provided solely for officer safety. Subjects present or associated with the vehicle must not be notified that the vehicle is reported under observation by the CPIC system. The inquiring agency should contact Washington INTERPOL for further instructions regarding the vehicle and/or occupants of such vehicle. There may be instances where a "silent hit" occurs. This means that the agency that entered the record will be notified that you inquired on his record, but you will receive a "no hit" message. In some instances, the agency may contact you in regard to this inquiry.
Crime	Crime vehicles are those vehicles known to be connected to the commission of a crime, (e.g., hit and run, murder, robbery, etc.). They are entered on the system by an agency wishing to examine the vehicle for possible evidence such as fingerprints, paint samples, bloodstains, disguises, empty shells, etc.
Seized	A vehicle that comes into its possession through abandonment, seizure or impounding by other means.
Pointer	A vehicle records whose function is only to point to a prime record in the system. For example, an individual wanted for a specific offense is entered into the system as a wanted person record. He is known to drive a particular car. The vehicles are entered on the system as a PNTRV record to point to the prime wanted person record should a query be received concerning the vehicle only.
To Be Seized	This category allows agency to record a vehicle which is to be seized as per court order or statute.

Canadian Vehicle Registration File

Canadian Vehicle Registration Query (XQ) will result in a check of the province/territory registration file AND CPIC's Vehicle file. The user may search on either LIC or VIN. LIY and LIT are not used for Canadian vehicle registration inquiries. Only six provinces in Canada house their automated vehicle registration files. They are:

- Quebec
- Ontario
- Alberta
- British Columbia
- New Brunswick
- Saskatchewan

On all inquiries to Canada, the user must include the reason code (RSN) indicating the reason for the query and the person/property in-sight code (PPS) indicating whether the person or property is in-sight of the officer making the query or requesting the information.

Canadian Driver License Files

Canadian Driver License query (UQ) provides information on driver license and will result in a check of the Person file located on the CPIC system. As a result of a single UQ query user will receive responses from the provinces/territories and CPIC Person file. Inquiries to Canada, must include the reason code (RSN) indicating the reason for the query and the person/property in sight code (PPS) indicating whether the person or property is in-sight of the officer making the query or requesting the information.

The response will include suspended or prohibited driver status information for all province/territories except British Columbia who will provide the information from their own file. For those provinces that provide their own registration information, a message following a short line of asterisks will indicate that the query is being processed.

Take no official action on any response from the Canadian Person File without obtaining specific instructions from Washington D.C., INTERPOL. This information is provided for officer safety and is to be used only in conjunction with other information the inquiring officer may have at his or her disposal at the time of query. In the event a person is reported as being under observation, take no action based on this information and do not disclose the existence of this information to any non-criminal justice personnel.

Query Driver License (UQ)

Driver License Files - Canadian Provinces

Only six provinces in Canada have automated driver license files. These provinces also provide a search of either NAM and DOB or OLN depending on whether the inquirer includes the OLN in their query. They are:

- Quebec
- Ontario
- Alberta
- British Columbia
- New Brunswick
- Saskatchewan

When sending a Driver License Query (UQ), to a non-automated province or a territory, the user will receive:

- Person file check (includes notification of driver license prohibition)
- Driver License Response (UR), message indicating that the province is non-automated and, if information OTHER THAN STATUS is needed, send an AM message directly to the province/territory for a manual check. The message will also contain the address of the province or territory as well as a copy of the query that was sent.

Below is a list of the provinces/territories and the ORIs to which the manual requests should be forwarded:

Province/Territory	ORI	Hours of Service	2-Character Code

Canadian Article File

Canadian Article query (CAQ) may be associated with other records on the CPIC system. These will be returned as a part of the initial response. Once the user has confirmed that the article is the correct article reported to be in question, and the status of such article, as reported by the CPIC system, is current and correct, it can be impounded pending specific instructions from the Canadian agency that entered the article into the CPIC system. The locating agency can contact Washington INTERPOL for assistance regarding disposition of the article.

On all inquiries to Canada, the user must include the reason code (RSN) indicating the reason for the query and the person/property in-sight code (PPS) indicating whether the person or property is in-sight of the officer making or requesting the information.

Canadian Gun File

Canadian Gun query (CGQ) are records that may be linked with other records on the CPIC system. These will be returned as a part of the initial response. Each query will cross search both the stolen gun file as well as the Canadian gun registration file. A gun is defined as any barreled weapon that can discharge a bullet or other missile, or any imitation of such a weapon.

The types of weapons include:

- Revolver or pistol
- Rifle
- Shotgun
- Flint/cap/matchlock muzzleloader
- Automatic weapons, machine guns/pistols
- Signal flare, rocket or gas guns
- Air guns (rifle or pistol)

Once the user has confirmed that the gun is the correct gun reported to be in question and the status of such gun, as reported by the CPIC system, is current and correct, it can be impounded pending specific instructions from the Canadian agency that entered the gun into the CPIC system. Locating agencies may contact Washington INTERPOL for assistance regarding disposition of the gun.

Canadian Securities File

Canadian Securities query (CSQ), records may be linked with other records on the CPIC system and will be returned as a part of the initial response. Once the user has confirmed that the security is the correct security reported to be in question and the status of such security, as reported by the CPIC system, is current and correct, it can be impounded pending specific instructions from the Canadian agency that entered the security into the CPIC system. The locating agency can contact INTERPOL Washington for assistance regarding disposition of the security.

On all inquiries to Canada the user must include the reason code (RSN) indicating the reason for the query and the person/property in-sight code (PPS) indicating whether the person or property is in-sight of the officer making the query or requesting the information.

The serial number field will accept 23 characters but only 16 characters are stored on the CPIC file. When inquiring with more than 16 characters, the CPIC system will search on only the last 16 characters submitted, not the first 16.

Following are the different types of securities information that are available to United States users from the CPIC file. They are:

- Stolen
- Lost or Missing
- Pawned or loaned
- Counterfeit
- Fraudulent and recovered securities such as bonds, currency, credit cards, ID's traveler's checks, and passports.

Code	Type of Security
BD	Corporate bonds and debentures issued by corporations, including banks, trust companies, charitable/religious groups, credit unions and co-operatives

Canadian Boat File

Canadian Boat query (CBQ) includes boat registration information and stolen motors. The query is made by serial number with an optional type code. A boat is defined as a watercraft, which may be a small open vessel, a large vessel, or ship, propelled by oars, sails or engine.

Once a user has confirmed that the boat is the correct boat reported to be in question and the status of such boat, as reported by the CPIC system, is current and correct, it can be impounded pending specific instructions from the Canadian agency that entered the boat into the CPIC system. The locating agency can contact INTERPOL in Washington DC for assistance regarding disposition of the boat.

On all inquiries to Canada the user must include the reason code (RSN), indicating the reason for the query and the person/property in-sight code (PPS) indicating whether the person or property is in-sight of the officer making or requesting the information.

Canadian Criminal History Files

Canadian Criminal History is the process for accessing Canadian criminal history records from the Royal Canadian Mounted Police (RCMP) is the same as accessing criminal records from individual state repositories in the United States, IQ/FQ/AQ. Canada has an optional field to access additional records when multiple hits on name inquiries are received.

The IQ-CAN is utilized when the agency does not have the FPS Canadian identification number. The FPS number is Canada's version of the FBI number; a unique number assigned to each criminal record and backed up by fingerprints. Response to this type of query will provide personal identification information of one or multiple individuals.

Once the identification record(s) have been returned it is at the option of the inquirer to select the individual the user is interested in and submit an FQ-CAN to retrieve the full criminal record. This works very much like NCIC's QH/QR or Nlets interstate IQ/FQ procedures.

CHRI Identity Query

NLETS Query Identity (IQ-CAN), provides criminal history record identification information on a subject. Response(s) will be returned, and the requester will select the desired record and submit a Full Record Query (FQ-CAN) with the FPS number.

Administrative Messages to Canadian Agencies

Nlets users can send administrative messages to up to five destinations on the CPIC network. These messages are generally for investigative reasons of a broad nature, to request driver license information from non-automated provinces or to send broadcast messages of international interest. These messages will be reviewed by the U.S. National Central Bureau of INTERPOL in Washington, DC and must contain the reason for the request and the requester's name.

To broadcast an administrative message, it must be addressed to CN for a country-wide broadcast. Only narrative messages dealing with urgent operational police matters will be considered for nationwide broadcast in Canada.

Canadian ORI File

Canada has added records for their agencies to the NCIC ORI file. All Canadian ORIs are seven characters but two zeroes must be added to the end to make them nine-character ORIs.

INTERPOL Transactions

The International Criminal Police Organization (INTERPOL) is an international organization whose mission is to facilitate the exchange of police information and promote cooperation and assistance between law enforcement authorities of its 194 member countries, including the United States. Each member country establishes a domestic entity called the National Central Bureau (NCB), whereby authorized law enforcement authorities are given access to the databases and resources of INTERPOL.

Title 22 USC, Section §263a names the US Attorney General as the United States representative to INTERPOL. Title 28 CFR Section §0.34a establishes the United States National Central Bureau (USNCB), as the point of contact for coordination between U.S. officials and INTERPOL, which is headquartered in Lyon, France. The USNCB is part of the US Department of Justice, and they determine which U.S. law enforcement entities are authorized to have access to INTERPOL databases.

Access to INTERPOL records via Nlets, provides information on international wanted person, stolen vehicles, and stolen travel documents. Initial queries are performed to which Interpol responds with a list of any potential matches. A secondary full query may be run on the specific records of interest. A Full Person response may include one or more images with full binary data if present in Interpol's linked files for that record.

Initial Query	Full Report
• IPQ Wanted Person Query	• FPQ Wanted Person Query
• IVQ Stolen Vehicle Query	• FVQ Stolen Vehicle Query
• ITQ Stolen Travel Document Query	• FTQ Stolen Travel Document Query

All transactions to Interpol must have a destination of IP. Each message key set has an initial query and a full query. The proper procedure is to submit the initial query using the identifiers. INTERPOL will respond with a list of possible matches. Each member of the list of possible matches will have an entity identifier (EID) number. The EID number is then submitted on the associated full query to obtain more detail on the record.

Each positive match on the full record query will generate an alarm to the record-holding country and to the USNCB. The record-holding country may, at any time, inquire as to the reason the subject-record was searched. The country may contact the USNCB, which will then request this information from the inquiring agency. For this reason, the USNCB requires that INTERPOL queries be logged and tracked.

When a positive match is found, it is important to understand that no arrest may be made based solely on the result of an INTERPOL query. Under U.S. Law, the existence of charges in another country alone does not authorize the subject's arrest in the United States. Foreign charges and/or the present circumstances may provide a basis under the laws and regulations applicable to your jurisdiction to detain the subject, at least temporarily, to obtain additional information.

When contacting the USNCB following a positive match, the USNCB may provide additional details such as the complete INTERPOL record and possibly a contact for the record holding country's National Central Bureau (NCB) for follow up.

When contacting USNCB at ORI/DCINTER00 following a positive match, be prepared to provide:

- Identifying information on the subject
- Reason for the request
- Investigation type
- Status of the subject (in custody, under investigation, etc.)
- Any available information concerning the subject's itinerary, including the address of the subject's destination, home address, etc.
- Information on whether the subject will be detained at your agency and for what duration

Questions regarding INTERPOL queries should be directed to:

INTERPOL ORI: DCINTER00

Phone: 202-616-3900

Name Information

Name of person that is the subject of query must include last and first name in the following format: Last, First Middle. Multiple last names, with or without spaces in between, are combined into the entered last name. Apostrophes are not entered. For last names conjugated by the letter y replace the y with a hyphen and join the names together. A single comma is required after the last name. Hyphens are permitted in the last name only; if a first or middle name is hyphenated, replace the hyphen with a space. If that creates more names than permitted, remove the space so the two formerly hyphenated names become one.

The usage of surnames from different countries can often be confusing. For example, Hispanics generally use both their fathers and mothers last name, giving them a double last name. The first name of this double last name is generally the most important name for record check purposes. If one does not know how to place these names in the name fields on inquiries, misses could occur.

Hispanic First Names

Many Spanish first names consist of more than one word, for example, Maria de Los Angeles, Maria de la Luz, and Maria Del Carmen. When written with a prepositional phrase, the name should be treated as one first name. If the name is not recorded with a prepositional phrase, for example, Maria Luz or Maria Carmen, it should be considered first and middle names.

Hispanic Surnames

Spanish and Hispanic persons customarily use the surnames of both parents. This double surname is derived from the first surname of the father and the first surname of the mother. Neither name is considered a middle name. The surname of the father precedes that of the mother. The two surnames may be connected by the word y, which means and. For example, Juan Gomez y Conde has Juan as a first name, Gomez as the surname of the father, and Conde as the surname of the mother. For recording purposes, all double last names are listed with the father's surname followed by the mother's surname. Juan Gomez y Conde would be recorded as Juan Gomez Conde.

The nationals of some South American countries do not, as a rule, use both last names. If the subject comes from a country that uses both last names, but the subject only uses one, and it is his mother's surname, this will often indicate that the subject's parents were not married.

Hispanic Married Names for Women

When she marries, a woman commonly drops the surname of her mother and adds the first surname of her husband, preceded by the preposition *de*. This indicates she is the *wife of* that man. Maria Gomez Garcia, when married to Juan Martinez Ramirez, would become Maria Gomez de Martinez, and will be recorded as Gomez de Martinez, Maria. Note that according to traditional Hispanic usage the woman's surname never changes. After admission to the United States, however, some women have adopted the American custom of using the husband's surname as their own. Maria Gomez de Martinez may begin to give her name as Martinez, Maria Gomez.

Middle Eastern Names

When a sequence of two, three or four names appear, no part of which can be recognized as the first name, middle name or surname, the last part only is identified as the surname and the first part used as the first name.

Name	Surname
Mohammed Ali Jafir	Jafir

When a surname is preceded by an article such as El or Al, it is part of the surname.

Name	Surname
Yousef Ben El Gazar	El Gazar

Asian (Chinese) Names

When a sequence of two, three or four names appears, no part of which can be recognized as the first name, middle name, or surname, the first part only is identified as the surname and the next parts used as the first name and middle name. When one or more names follow the surname, use only the first as the surname. Sometimes the surname will be in capital letters and the other names will be connected by a hyphen. In such cases the user may find the surname written either before or after the other names.

Name	Surname
Low Tai Yat	Low
Harry Yat Bun Sing	Yat
Soong Mei Ling	Soong

Name Query format: LAST, FIRST MIDDLE OTHER

Additional Examples:

Subject has another name	Inquire using:
Mr. Reginald Charles Hogworthy III	HOGWORTHY, REGINALD CHARLES III

Subject's last name is hyphenated, or the letter y conjugates last names:	Inquire using:
Natalie Spencer-Windsor	SPENCER-WINDSOR, NATALIE
Jennifer M. Gomez y Garcia	GOMEZ-GARCIA, JENNIFER M
John Franklin al-Muhammad y Jones Jr.	AL-MUHAMMAD-JONES, JOHN FRANKLIN JR
Dr. Jeffrey Jay van de Muhammad Al-Akbariah	VANDEMUHAMMADAL-AKBARIAH, JEFFREY JAY

The last name is a compound name without a hyphen or the letter y:	Inquire using:
James F. FitzMaurice III	FITZMAURICE, JAMES F III
Mrs. Alice Fay McDonahue	MCDONAHUE, ALICE FAY
Jean Pierre Michael d'Lessandro	DLESSANDRO, JEAN PIERRE MICHAEL
Mr. Anthony Mark Van de Swelte	VANDESWELTE, ANTHONY MARK
Ms. Christina Michelle Jones O'Connor	JONESOCONNOR, CHRISTINA MICHELLE

The first name is compound:	Inquire using:
Billy Jack Harry Coe	COE, BILLY JACK HARRY
Velda-Mae Cook	COOK, VELDA MAE
Mary-Jo Ashley Heather McMahan	MCMAHAN, MARYJO ASHLEY HEATHER
Joanne Hurt	HURT, JOANNE
Jo Ann Okilahoe	OKILAHOE, JO ANN

The first or middle name is an initial:	Inquire using:
Mr. T. S. Elliot	ELLIOT, T S
Dr. Thornton M. Cogswell	COGSWELL, THORNTON M

National Drug Pointer Index System

National Drug Pointer Index System (NDPIX) is a nationwide, multi-jurisdictional automated information sharing system emphasizing increased cooperation among law enforcement agencies. Queries/Entries into NDPIX also checks against the National Virtual Pointer System (NVPS). NDPIX is managed by the Drug Enforcement Agency (DEA) and operates at the Department of Justice computer center in Rockville, Maryland via a secure communication connection to the Nlets network and is available 24 hours per day (less end-of-day maintenance), seven days per week.

NDPIX provides automated response Point of Contact (POC) information on active cases to state, local and Federal law enforcement agencies. Records are kept in the database for 180 days and then purged unless updated or renewed. Entry makers have the option of requesting lists of their records in the database.

To participate in this program a law enforcement agency signs a participation agreement with DEA and, in return, DEA assigns NDPIX user IDs and passwords.

Processing of NDPIX transactions includes the following basic operations:

- A law enforcement agency submits an entry on a target that is under active investigation for violation of drug laws. The law enforcement agency can later update or renew the entry.
- The National Drug Pointer Index System (NDPIX) then:
 - Validates the record to assure that the transaction contains an authorized ORI, User ID, and Password.
 - Validates the record to assure that it contains at least the mandatory fields of data and that the data fields are valid.
 - Notifies the entry maker of any errors found in the entry, update, or renewal.
 - Adds the valid entry to the database or updates an earlier entry.
 - Searches the database for matches to the entry, update, or renewal.
 - Sends POC information to the entry maker on up to 50 matchers and indicates when no matches had been found.
 - Sends the POC of the entry or update to owners of matching records.

Administrative Messages

An Administrative Message (AM) and an Administrative Message with Image (AMI) are:

- A criminal justice related point-to-point free form message.
- Different from other Nlets traffic in that it is free form.
- May be used for practically any type of information transmission not associated with a specific message type.
- May ask for information or assistance.
- May be in response to a request from another agency.
- NOT to be used for hit confirmation or responses.

An Administrative Message Law Enforcement Only (AML) is:

- Law enforcement only related point-to-point free form message.
- May be used for practically any type of law enforcement only information transmission not associated with a specific message type.
- May ask for information or assistance.
- May be in response to a request from another agency.
- Nlets will insert the caveat FOR LAW ENFORCEMENT DISSEMINATION ONLY within the body of the message prior to sending.

General guidelines for statewide, regional or all points messages:

- To request a statewide, regional or all points message, Nlets members must use an administrative message (AM/AML).
- Users should confine broadcast type messages to individual states, regions, or community of interest states.
- State broadcasts may be sent to up to five states.
- Regional broadcast codes and two-character state codes may be intermixed in the destination fields.
- The general use of all points messages is discouraged.

Prior to the transmission of a message, agencies should consider the following questions:

- Why is this event/incident/crime worthy of a broadcast?
- Will it really enlist the aid of other agencies?
- How much information must be transmitted to clearly describe the situation?
- Who is likely to be interested in the subject matter, everyone or just the agencies in my own geographic area?
- What better methods could be used to inform those agencies that really need to know of this situation: Phone calls? Emails? Directed messages?

Message Format

Message format is an established form of sending information from one agency to another or from one person to another. Use of the proper message format in administrative messages is necessary to provide a standardized method for exchanging law enforcement and criminal justice information between the many agencies on the TLETS and Nlets systems.

Messages can be used for the following:

- Requests for information
- Replies with information
- Information broadcast to groups of agencies

Block form is used in message formatting with each part beginning at the left margin. Messages transmitted on the system will have single line spacing between each part of the message.

An administrative message contains five distinct parts:

1. Preamble
2. Address
3. Reference
4. Text
5. Signature

Preamble

The preamble consists of the agency's message number, name of agency. The message number is used for reference and filing purposes. The second part includes the name of the agency and the state (required for out-of-state).

Example Preamble

12345 OSAGE CO SO, OK

1011 GUN BARREL CITY PD, TX

Address

The address is the name of the agency and may be directed to a specific person or division within an agency to route it to the addressee faster.

Example Address

OSAGE CO SO ATTENTION: SGT SMITH

GUN BARREL CITY PD ATTENTION: HOMICIDE DIVISION

Reference

The reference line may be used to identify the subject or topic of the text, such as: runaway, missing person, attempt to locate, or bank robbery. Messages requesting information do not necessarily contain a reference since it usually is the first message. The reference can indicate when there has been previous information on the same subject matter.

Example Reference

RUNAWAY 16 YO FEMALE

BANK ROBBERY AUSTIN

Text

The text is the main part of an administrative message and should be kept as brief as possible without sacrificing clarity and accuracy. Messages must be restricted to matters pertaining to valid law enforcement, criminal justice, and other official police business. Short and easily understood words, phrases and common abbreviations should be used.

DO NOT USE:

- Words and phrases that convey no information, such as "BOLO," "PICK UP AND HOLD," "NOTIFY THIS AUTHORITY IF APPREHENDED OR LOCATED," "DETAIN FOR THIS DEPARTMENT," etc.
- Courtesy phrases such as: "THANK YOU IN ADVANCE," "PLEASE," "ALL HELP APPRECIATED," etc.
- Fancy borders, underlines and other symbols and extraneous characters such as: "*****", "!!!!!!", "////////\\\\\\\\", etc.

- Repeated statements such as: "RUNAWAY-RUNAWAY-RUNAWAY-RUNAWAY," "WANTED WANTED WANTED."
- Ten codes and other local abbreviations or terms.
- Slang or racial/ethnic terms.

Text Example

OUR AGENCY IS UNABLE TO LOCATE RUNAWAY JANE DOE AT 1515 MAIN ST
WHICH IS A VACANT BUSINESS BUILDING

SUSPECT JANE WF 504 LAST SEEN WEARING GRN SHIRT BLU SHORTS
POSSIBLY AT 1234 6TH STREET POSSIBLY ARMED WITH A KNIFE IF
LOCATED NOTIFY HOMICIDE AT 512-123-4567

Signature/Authority

The signature/authority consists of the city/county, type of agency and operator service. Operator service consists of the last name or initials of the operator. A name and title or a specific division may be used as the first line of the signature to indicate where to send replies.

Signature/Authority Example

DENVER CITY PD BT

DEAF SMITH CO SO JC

Request Example:

Order of Description

There is a standardized order when describing vehicles and persons in administrative messages. When information is not known, omit without comment.

Vehicle Description

Vehicles should be described by color, year, make, model, body style, additional descriptors, license plate (include year and state) and VIN.

Person Description

Persons should be described by name, race, sex, DOB, height, weight, hair color, eye color, skin tone (complexion), physical imperfections, clothing (described from top to bottom) and other pertinent information (such as habits, weapons, or traits that might help identify the individual).

Message Types

Crime Messages

This type of message is used to immediately advise surrounding agencies of information. To avoid false arrest or seizure of property, a complaint should be signed, and warrants issued prior to sending a message. This message can be directed to agencies that surround the area in which the offense occurred. After the initial investigation has been conducted and more information has been obtained, the originating agency should direct any additional information in a message to the geographic region/areas of concern.

The administrative message on a crime can include the following information:

1. Type of offense
2. Time and place of occurrence
3. Warrant number and extradition information (extradition information is necessary if the message is to be directed out-of-state)
4. Name and description of wanted person(s) (if more than one suspect, each should be listed as 1, 2, etc.)
5. Mode and direction of travel
6. Other pertinent information

Crime Message Example

155 ROTAN PD, TX	PREAMBLE
ALL REGION 6	ADDRESS
BANK ROBBERY IN ROTAN 20XX0101 12:00 AM	REFERENCE

ROTAN PD, TX JB	SIGNATURE/AUTHORITY

Runaway Messages

A runaway in Texas is an individual seventeen years old or younger who is missing and not considered endangered or involuntary. Persons eighteen years of age and over are considered missing persons.

Messages on runaways can be handled with a local broadcast message or directed to the area in which the runaway is believed to be going. Missing persons should also be entered into NCIC when applicable. The messages can contain the following information:

1. Name and age
2. Physical description
3. Mode and direction of travel, (if unknown, omit)
4. Any other pertinent information that could be used to locate subject
5. Disposition of runaway if apprehended such as, "parent will pick-up" or "hold for juvenile officer", etc.

Runaway Message Example

LAKEWAY PD JD	SIGNATURE/AUTHORITY

Missing Person Messages

A missing person message may be used for any of the following reasons:

- Missing an extended period without reason.
- Evidence of foul play.
- Person missing is mentally or physically incapable.

This type of broadcast should normally be confined to the area where the person is reported missing. The missing person should also be entered into NCIC if qualified. This type of message may be used for any of the following reasons:

Missing person messages can contain the following information:

1. Date, time, and location last seen.
2. Detailed description of the person.
3. Include any vehicle information.
4. Summary of circumstances surrounding disappearance.

Missing Person Message Example

202401-88 BAYTOWN PD	PREAMBLE
DPS REGION 2	ADDRESS
MISSING ENDANGERED	REFERENCE
JANIE DOE HF 01051978 506 185 BLK/BRO PREGNANT SUBJECT IS VICTIM IN A DOMESTIC VIOLENCE INCIDENT ON 11072023 LAST SEEN IN BAYTOWN WEARING GRAY/BLK UNDER ARMOR SWEATSHIRT, JEANS, PURPLE NIKE SHOES SUSPECT JOHN DOE DRIVING BLK 2010 FORD F150 PK TX AAA2145 BROKEN BACK WINDOW WITH BLACK TAPE CONTACT TOWN PD AT 555-432-6767	TEXT
BAYTOWN PD RR	SIGNATURE/AUTHORITY

Attempt to Locate Messages

This message may be used for any of the following reasons:

- Death or serious illness in the immediate family
- Delivery of emergency message
- Urgent police business, example: locating a witness to a crime or other events or an officer in a private vehicle or to locate a witness
- Overdue travelers/separated motorist considered a welfare concern (consider time and distance involved)

This type of message is used for public service, meaning the person is not: wanted, missing or a runaway. This type of message is normally self-canceling three days after originating time unless conditions warrant otherwise.

Attempt to locate messages should contain the following information:

1. Nature or reason of emergency
2. Name of person(s) to be contacted
3. Mode of travel
4. General area of concern
5. Message to be delivered

Attempt To Locate Message Example

13 CRANE PD, TX	PREAMBLE
ODESSA PD, TX	ADDRESS
DEATH NOTIFICATION	REFERENCE
REQUEST TO CONTACT JON DOE LOCATED AT 2299 STREET DRIVE, ODESSA TX IF LOCATED ADVISE HIS MOTHER JANE DOE IS DECEASED CONTACT DETECTIVE JOHN AT 555-999-9898 FOR QUESTIONS	TEXT
CRANE PD, TX OE	SIGNATURE/AUTHORITY

Added Information Messages

This type of message is used to update previous messages with additional pertinent information as it becomes available. Always refer to the previous message(s) in the reference part of the formal message format.

Added Information Message Example

202401-97 BAYTOWN PD	PREAMBLE
DPS REGION 2	ADDRESS
ADDED INFORMATION MISSING ENDANGERED	REFERENCE
ADDED SUSPECT JOHN DOE COULD ALSO BE DRIVING RED 2017 NIS ALT PC TX BBB2145	TEXT
BAYTOWN PD, TX RR	SIGNATURE/AUTHORITY

Cancellation Messages

Cancellations are used to cancel any message. The information in a cancellation should include only specific parts of the original message. Cancellations must be directed to the same agencies as the original message. These specific parts must include:

1. Preamble of the original message
2. Names of persons included
3. License number or identification numbers of vehicle involved
4. A brief statement about the reason for cancellation. The brief statement could be one of the following depending on the type of the original message:
 - Apprehended
 - No Longer Wanted
 - Returned Home
 - Located

Cancellation Message Example

155 ROTAN PD, TX	PREAMBLE
ALL REGION 6	ADDRESS
CANCEL 155 ROTAN PD, TX	REFERENCE

ROTAN PD, TX JB	SIGNATURE/AUTHORITY

Correction Messages

Correction messages are used to correct typing errors or other incorrect data sent in a previous message. If an error is made in a message, do not correct the mistake, and resend the entire message. Always refer to the previous message in the reference line and identify it as a correction message.

Correction Message Example

201 BAYTOWN PD	PREAMBLE
DPS REGION 2	ADDRESS
CORRECTION RUNAWAY	REFERENCE
JANIE DOE CORRECTED INFORMATION HF 09071990 504 115 BLD/BRO	TEXT
BAYTOWN PD JD	SIGNATURE/AUTHORITY

TLETS/Nlets Broadcast Code Procedures

TLETS users can broadcast an administrative message to areas in Texas, as well as other states, using a combination of five destinations, seven device mnemonics, and three broadcast groups in a single transmission. (See Appendix A)

Destination (5)	ORIs, State Codes, Nlets Region Codes, Canadian Province Codes
Device Mnemonics (7)	(Texas Only) Individual Terminal Mnemonic
Broadcast Group (3)	(Texas Only) Broadcast Mnemonics
Distance Field	(Texas Only) Only on terminals with identified latitude and longitude

Before transmitting any message using one or more of the Broadcast Codes. Messages of concern or interest to ten or less agencies should not use Broadcast Codes. If the content of the message is of such importance that it necessitates re-broadcast, then it should be placed on the APB Summary in accordance with procedure. Messages that do not pertain to valid law enforcement/criminal justice or copies of the same message to the same area in a short period of time is strictly prohibited.

TLETS All-Points Bulletin

The All-Points Bulletin (APB) will automatically direct a message to all law enforcement and criminal justice agencies in Texas that have a terminal. The broadcast mnemonic address APB, statewide broadcast of messages can also be accomplished by other methods. APB using a message to REG1, REG2, REG3, REG4, REG5, REG6 and REG7 also disseminates it statewide. However, the use of the APB or other coding methods for an immediate statewide broadcast should be restricted to urgent items regarding the safety of lives and/or apprehension of dangerous felons.

Messages in the following categories are prohibited from statewide broadcast. These type messages should be directed to only the area/region(s) of concern, not to exceed three geographical areas/regions.

- Missing Persons
- Runaways
- Attempt to Locates
- Stolen Vehicles

TLETS Daily APB Summary

DPS Austin Communication will generate the Daily APB summary to all terminals daily at 6:00 a.m. and 6:00 p.m. to provide efficient yet effective means of disseminating information of concern and interest to all agencies and conserve system transmission time. Agencies with non-urgent information that is of statewide interest should send it to the mnemonic address 67X1, addressed to DPS AUSTIN Communications and request it be included on the Daily APB Summary.

The summary will include a list of:

- Routine Criminal Matters of Statewide Interest
- School and Seminars of Statewide Interest (If Adequate Seating is Available)
- Death and/or Funeral Announcements of Law Enforcement and Criminal Justice Personnel
- Messages of Statewide Interest Received from Other States
- TLETS System Changes and Notifications
- Miscellaneous

FBI National Threat Operations Center (NTOC)

The mission of the FBI's National Threat Operations Center (NTOC) is to protect the nation by serving as the primary communication channel through which the public provides tips to the FBI. These messages allow the NTOC to push non-emergent state, local, and tribal matters directly to agencies in a timely manner. To support the FBI's mission, NTOC is providing tip information directly to respective agencies via Nlets Administrative Messages.

The NTOC pushes information via Nlets' existing Administrative Message infrastructure in real time for any action deemed appropriate by the receiving agencies. The AM can be sent to a local agency, as a state message, or to an FBI Field Office. The recipient of the message is determined by the information provided by the public. The information provided in the AM is informational nature, will need to be vetted and confirmed by the receiving agency, and is to be used at the discretion of the receiving agency.

Information Sharing Parameters:

NTOC will not send a duplication of what is already sent to fusion centers as part of the dual route Threat to Life initiative.

Tips are informational in nature and may be actioned by state/local law enforcement at their discretion.

Tips containing urgent matters have other processes in place to be shared with the appropriate agencies.

Nlets Broadcasts

Nlets State Broadcasts

State broadcasts are an administrative message (AM/AML) sent to a state control terminal requesting a state to send an APB within the state. Information related to officer safety (e.g., "armed and dangerous") should be placed at the front of the message on its own line to highlight it.

Nlets Regional Broadcasts

Regional broadcasts provide Nlets users with the ability to send selected types of messages to the control terminal in a group(s) of predefined states and agencies located in a geographical area. The state control terminal will handle further dissemination at its discretion.

Regional Broadcast Messages will be transmitted to points-of-entry only once. For example, if a message is addressed to two regions, the FBI and Dept. Of Treasury (TECS) would receive only one copy of the message, not two. To assist control terminals in further disseminating administrative type regional requests, the sender may include a request such as: "Deliver to State Crime Lab" or "Deliver to Major Cities".

Nlets All-Points Broadcast

All-points broadcasts provide Nlets users with the ability to send administrative type messages (AM/AML) to each state and Federal member terminal. A destination code of AP will result in the message being directed to all state and Federal control terminals. Regarding the content and use of AP, users are urged to carefully consider whether there is a necessity to send the message to all states. If the message pertains to a geographical area of the United States (i.e., East Coast, Sunbelt) the user should seriously consider the use of a regional broadcast that will more narrowly focus on the states that could provide assistance.

TLETS/Nlets Restrictions

For TLETS/Nlets broadcasts, the following restrictions have been developed to control the quality of the messages sent from our state.

- No Personal Communications
- No Social Announcements (Holiday Messages or Retirements)
- No Messages Relating to the Advertisement or Sale of Equipment.
- No Recruitment of Personnel
- No Messages Relating to Requests for Information Concerning Salary, Uniforms, Personnel or Related Items Which Can Be Routinely Obtained by Correspondence or Means Other Than Nlets
- No Messages Supportive of or In Opposition to Labor Management Issues or Announcements Relative to Such Issues
- No Messages Supportive of or In Opposition to Political Issues or Announcements of Meetings Relative to Such Issues
- No Messages Supportive of or In Opposition to Legislative Bills
- No Attempts to Locate Vehicle (Breach of Trust) Without Warrant
- No Messages in Which the Complainant Is Interested Only in Recovery of Property
- No Reply Only If Records (ROIRS)
- No Reply Only If Wanted (ROIWS)
- No Messages That Do Not Pertain to Valid Law Enforcement/Criminal Justice Matters
- No medical information protected by Health Insurance Portability and Accountability Act of 1996 (HIPAA)

Nlets All Points Broadcast Restrictions

For Nlets All Points broadcast, the following restrictions have been developed to control the quality of the messages sent nationwide.

- All TLETS/Nlets broadcast restrictions
- No training messages that include the name of the company that is providing the training unless the company is not-for-profit and is providing a direct service to law enforcement.
- No solicitation of funds
- No excessively long messages
- No attempt to locate messages
- No messages regarding wanted subjects or vehicles if they can be entered into NCIC

Attempted Child Abductions

The Texas Code of Criminal Procedure was amended to require the Texas Missing Person Clearinghouse to collect information on attempted child abductions. Reporting requirements for law enforcement agencies are defined in CCP Article 63.0041 as, a law enforcement officer or local law enforcement agency reporting an attempted child abduction to the clearinghouse shall make the report by use of the TLETS or a successor system of telecommunication used by law enforcement agencies and operated by the Department of Public Safety.

Upon receiving a report of attempted child abduction, an agency shall immediately, but not to exceed eight hours after receiving the report, submit the information to the Texas Missing Person Clearinghouse. TLETS has created a specific administrative message format designed for this reporting requirement. However, agencies can submit an administrative message to the clearinghouse for this purpose if all required information is included in the message. This administrative message shall be sent to the TLETS group MPCA, which will be distributed to devices within the Texas Missing Persons Clearinghouse (MPCP) and Texas Fusion Center (CASP).

LEO Flying Armed

The Law Enforcement Officer Flying Armed (LEOFA), is used for federal, state, local, territorial, tribal, and approved railroad law enforcement officers who meet the requirements to fly armed on commercial aircraft nationwide. To qualify to fly armed, unless otherwise authorized by TSA, federal regulation states that a law enforcement officer must meet all the following requirements:

- Be a federal law enforcement officer or a full-time municipal, county, state, tribal or territorial law enforcement officer who is a direct government agency employee.
- Be sworn and commissioned to enforce criminal or immigration statutes.
- Be authorized by the employing agency to have the weapon in connection with assigned duties.
- Have completed the TSA Law Enforcement Officer Flying Armed Training Course. LEOFA training material/course is found at: <https://www.tsa.gov/travel/law-enforcement>.

In addition to the above requirements, municipal, county, state, tribal, or territorial officers must present an operational need to have the weapon accessible from the time he or she would otherwise check the weapon, until the time it would be claimed after deplaning. The need to have the weapon accessible aboard the aircraft must be determined by the employing agency and based on one of the following:

- Assigned to a protective duty as a principal or advance team, or on travel required to be prepared to engage in a protective function.
- Conducting a hazardous surveillance operation.
- On official travel with a requirement to report to another location armed and prepared for duty immediately upon landing.
- Control of a prisoner, or on a round trip ticket returning from escorting or traveling to pick up a prisoner.
- Employed as a federal law enforcement officer, whether on official travel, and traveling armed in accordance with the policies or directives of the employing agency.

Additional information can be found at <https://www.tsa.gov/travel/law-enforcement>.

The agency must submit a National Law Enforcement Telecommunications System message at least 24 hours prior to travel to the Federal Air Marshal Service (ORI/VAFAM0199). A message with a unique alphanumeric identifier will be returned from Transportation Security Administration (TSA) to the employing agency. This identifier shall then be verified at the airport on the day of travel. In addition to the unique alphanumeric identifier, the officer must present the Nlets message to the TSA agent. Failure to provide the unique alphanumeric identifier could result in delays due to the additional verification requirements.

If you have questions or comments regarding the LEOFA Program or experience difficulties with submission of LEOFA identifier request messages via Nlets, please contact the Federal Air Marshal Service, Flight Operations Division, Liaison Section at LEOFA@tsa.dhs.gov or by calling 1-855-FLY-LEOS and follow the prompts.

G1	Region G	Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas, Utah
H1	Region H	Alaska, California, Hawaii, Idaho, Nevada, Oregon, Washington

TCIC/TLETS Operation Manual - Part 3

Record Responsibility

NCIC records must be kept accurate and up to date. Agencies that enter records in the NCIC System are responsible for their accuracy, timeliness, and completeness. To facilitate compliance with hit confirmation requirements, the entering agency must be available 24 hours a day to confirm its record entries. Nonterminal agencies must sign an Interagency Agreement with a 24-hour agency outlining the responsibility for hit confirmation. Originating agencies that are not available 24 hours must place instructions for after-hour hit confirmation, e.g., a 24-hour contact telephone number or an Originating Agency Identifier (ORI) in the Miscellaneous Field.

Accuracy

Stringent administrative procedures and controls to ensure that accurate data are entered in computerized criminal justice information systems are important. The accuracy of NCIC records is an integral part of the NCIC System. The accuracy of a record must be double-checked by a second party. The verification of a record should include assuring all available cross checks were made and that the data in the NCIC record match the data in the investigative report. All records should be entered using the agency's primary ORI.

Timeliness

To ensure maximum system effectiveness, NCIC records must be entered immediately when the conditions for entry are met, not to exceed three days, upon receipt (electronic or hard copy format) by the entering agency. The only exceptions to immediate entry are when otherwise prescribed by federal or state law or when documentation exists to support delayed entry.

Wanted Person File

Entry is made immediately after the decision to arrest or authorize arrest has been made. Before entering a wanted person record in NCIC, the entering agency must attempt to determine, to the maximum extent possible, if extradition will be authorized when the individual is in another state. In situations where an agency is certain that the wanted person will not be extradited, the individual's record may be entered in NCIC indicating no extradition using the EXL Field.

For NCIC purposes, extradition is the surrender by one state to another of an individual charged with or convicted of an offense outside its own territory and within the territorial jurisdiction of the other. Agencies entering warrants that do not meet the NCIC definition of extradition (intrastate only) must code the EXL (Extradition Limitations) Field as 4 (NO EXTRADITION – IN-STATE PICK UP ONLY. SEE MIS FIELD FOR TRANSPORTATION LIMITATION) for felony warrants or D (NO EXTRADITION – IN-STATE PICK UP ONLY. SEE MIS FIELD FOR TRANSPORTATION LIMITATION) for misdemeanor warrants. Additional details regarding intrastate limitations may be placed in the MIS Field.

If there is a limitation concerning extradition of the wanted person, such information should be entered using the appropriate code in the EXL Field. In instances where an ORI will not honor the extradition of an individual, the entering agency must modify the record to update the extradition limitation appropriately. Although all records may be entered into the NCIC Wanted Person File, extradition must be addressed prior to entry so that appropriate extradition information can be included in the record.

Missing Person File

Entry is made as soon as possible once the minimum data required for entry (i.e., all mandatory fields) and the appropriate record documentation is available. For missing persons under age 21, an NCIC Missing Person File record **should be entered within 2 hours** of receiving the minimum data required for entry (Suzanne's Law).

Texas Code of Criminal Procedure Article 63.009 requires that local law enforcement agencies, on receiving a report of any missing person, **shall immediately, but not later than two hours** after receiving the report, enter into the NCIC Missing Person File.

Protection Order File

On receipt of an original or modified protective order from the clerk of the issuing court, or on receipt of information pertaining to the date of confinement or imprisonment or date of release of a person subject to the protective order, a law enforcement agency shall **immediately, but not later than the next business day** after the date the order or information is received, enter the information required by Section 411.042(b)(6), Government Code, into the statewide law enforcement information system maintained by the Department of Public Safety.

Property Files

Entry is made as soon as possible once the minimum data required for entry (i.e., all mandatory fields) and the record documentation are available. Information for stolen license plates and vehicles should be verified through the appropriate motor vehicle registration files prior to record entry if possible. However, if motor vehicle registration files are not accessible, the record should be entered into NCIC, and verification should be completed when the registration files become available.

All Other Files

Entry is made as soon as possible once the minimum data required for entry (i.e., all mandatory fields) and the appropriate record documentation are available.

Timely Modification of a record is that which occurs as soon as possible following the detection of erroneous data in an existing record and as soon as possible following the receipt of data not already stored in the record.

Timely Inquiry requires that the inquiry is initiated before an officer begins writing an arrest or citation document of any kind; inquiries are stored when NCIC is not available and submitted at once when the system returns, regardless of whether the subject is still in custody; inquiry is made

prior to release of a person who has been incarcerated; and inquiry is made upon those who appear at a custodial facility to visit inmates.

Timely Entry of a Locate is that which occurs as soon as reasonably possible once the record in question has been confirmed with the entering agency.

Timely Removal from the file requires immediate removal of the record once the entering agency has documentation that the fugitive has been arrested or is no longer wanted unless being detained.

Completeness

Complete records include all critical information that was available on the person or property at the time of entry. Critical information is defined as data fields that will:

- Increase the likelihood of a positive hit on the subject or property and aid in the identification of a subject or property.
- Assist in compliance with applicable laws and requirements.

Validation should include a review of whether additional information missing from the original entry that could be added has become available for inclusion in the record. Complete inquiries on persons include numeric identifiers such as, Social Security number, passport, vehicle identification number, license plate, driver license, etc., that could be indexed in the record. Inquiries should be made on all names/aliases used by the suspect. Complete vehicle queries include vehicle identification number and license plate numbers.

Maintaining the Integrity of NCIC Records

Agencies that enter records in NCIC are responsible for their accuracy, timeliness, and completeness. The FBI, as manager of the NCIC System, helps maintain the integrity of the system through:

- Automatic computer edits which reject certain common types of errors in data
- Automatic purging of records after they are in a file for a prescribed period
- Quality control checks by FBI personnel and distribution of records to be validated

Automatic Computer Edits

The TCIC/NCIC systems have software that detect certain logical errors and prevent records from being incorrectly entered or modified. Users will receive a reject message when entering a record containing an error in an edited field. This ensures the uniformity of the system, as well as detect certain errors.

Quality Control Checks

FBI CJIS personnel periodically check records entered into NCIC for accuracy. Errors discovered in records are classified and this will determine the type of action that is taken by FBI CJIS. In the case of serious errors, FBI CJIS will cancel the record and transmit a \$.E administrative message to the entering agency. The \$.E message provides the entire canceled record and a detailed explanation of the reason for cancellation.

Serious Errors

1. Wanted Person File records indicating the subject is wanted for questioning only.
2. Records entered for cashier's checks, bank drafts, bank officer's checks, certified checks, checks issued to card holders by credit card companies, company checks, government checks (local, state, and federal), personal checks, personal notes, and promissory notes.
3. Records entered for stolen credit cards.
4. A missing person, wanted person, license plate or vehicle record containing inaccurate vehicle and/or license data that has been verified as inaccurate by the Department of Motor Vehicles (DMV) where the vehicle is registered or by comparison with VIN (Vehicle Identification Number) specifications obtained from the manufacturer.
5. Records entered in the wrong file.
6. Property records entered with a non-unique number such as a stock number, model number, an owner applied number in the SER Field, a non-unique boat hull number or boat registration number, etc.
7. Property records entered with generic codes which do not have the manufacturer's name or other identifiable data in the record.

Errors

TCIC Operations reviews all records entered into NCIC/TCIC and will notify an entering agency of possible errors through an administrative message. Entering agencies are given 24-hours to review the record, make corrections or cancel the record and then notify TCIC Operations of their actions. In instances where the entering agency feels that the records are correct as entered, contact TCIC Operations at Mnemonic CRDP or tcic.operations@dps.texas.gov.

Automatic Purging of Records

Each TCIC/NCIC record has been assigned a specific retention period and they will be purged from the system after they are on file for a prescribed period. Once a record reaches the retention period, it is automatically retired. The purpose of the automatic purge is to remove records that may become unreliable due to the age of information entered. Agencies are not notified on all retention purges.

\$.P. Purge Notification

A \$.P. Purge Notification will be sent to the entering agency when a record has been retired because of one of the following conditions:

- A felony vehicle record on file for 90 days.
- A vehicle record on file for 90 days that does not contain either a VIN or OAN.
- A boat record on file for 90 days that does not contain a BHN, CGD, or OAN.
- A person record that contains only one numeric identifier and the numeric identifier expires.
- A temporary felony want record on file for 48 hours.
- A wanted person or wanted juvenile record in a locate status for five days from the date of the locate transaction.
- An article, boat, gun, securities, and vehicle record that has been in a locate status for ten days later than the date in the DOR Field.
- A gang or terrorist record has reached the date in the DOP Field.
- A detained wanted person record has reached the date in the DSE Field.
- An article record has passed its retention period and TYP is equal to IBADGE or ICREDEN.
- An identity theft record has reached the date in the DOP Field.

\$.P. Purge Notification

\$.P. MD1012600 THE FOLLOWING RECORD HAS BEEN PURGED BY THE FBI
COMPUTER DUE TO EXPIRATION OF THE RETENTION PERIOD.
MKE/STOLEN BOAT ORI/TX1234567 REG/TX123456 RES/DC REY/1996
HUL/WD BYR/20XX PRO/OB BMA/LBC BTY/RUN BLE/17 BCO/RED

EDT DLU/20XX0822 0000 EDT

For Protection Order File records, the entering agency will receive a \$.P Purge Notification administrative message five days before the record is to expire. This \$.P administrative message alerts the agency that if the court changed the Protection Order's expiration date (EXP), the record should be modified.

Record Retention Chart

File	Retention Period
Article	Year of Entry plus 1 Year
Boat - Abandoned/Stored	One Year from Date of Entry
Boat - with BHN	Year of Entry plus 4 Years
Boat - without BHN	90 Days
Boat/Vehicle Part	Year of Entry plus 4 Years
Child Safety Check Alert	One Year from Date of Entry
Gun – Recovered	Year of Entry plus 2 Years
Gun - Stolen/Lost/Felony	Indefinitely
Identity Theft	5 Years (unless designated less by ORI)
Threat Screening Center File	Indefinitely
License Plate – Expiring & Non-Expiring	Year of Entry plus 4 Years
Missing Person	Indefinitely
National Sex Offender Registry	Date of Expiration (remains in system indefinitely)
NCIC Gang Member File	5 Years
NICS Denied Transaction File	Indefinitely
Protective Interest	Indefinitely
Protective Order	Date of Expiration (remains in system 5 years after expiration)
Security - Except Money Orders/Travelers Checks	Year of Entry plus 4 Years
Security - Money Orders/Travelers Checks	Year of Entry plus 2 Years
Supervised Release	Indefinitely
Threat Against Peace or Detention Officer	Indefinitely
TXGang	5 years adult (date of determination) 2 years juvenile (date of determination)
Unidentified Person	Indefinitely
Vehicle - Abandoned/Stored	One Year from Date of Entry
Vehicle – Felony	90 Days
Vehicle - with VIN	Year of Entry plus 4 Years
Vehicle - without VIN	90 Days
Violent Person	Indefinitely
Want - Temporary Felony	48 Hours
Wanted Person	Indefinitely

V	Vehicle
B	Boat
G	Gun
A	Article
S	Security
W	Wanted Person
M	Missing Person
U	Unidentified Person

Record Entry

The purpose of an entry message is to place a new record in a file or to append supplemental records to those already on file. The person or property of the record should be queried prior to entry into any TCIC/NCIC file. The entering agency will receive a response from NCIC and/or TCIC when a record is entered into that system. The response will include the NIC or TIC number for the record.

Record Entry Response from TCIC

OCA/123456789
THIS RESPONSE IS FROM THE NCIC SYSTEM.

Record Modification

The purpose of a modification message is to add, delete, or change a portion of data which are part of a record. A record may be modified only by the agency that entered the record if the record is in an active status. The entering agency will receive a response from NCIC and/or TCIC when a record in that system is modified. The response will include the NIC or TIC number for the record.

Record Modification Response from NCIC

TL01M304
TX0000032
MODIFY NIC/ V123456789
THIS RESPONSE IS FROM THE NCIC SYSTEM.

Record Cancellation

The purpose of a cancellation message is to remove an entire record or supplemental record(s) from any file. When a record is canceled, all supplemental records appended to it are also automatically canceled. A record may be canceled only by the agency that entered the record; however, the FBI Data Integrity Staff may cancel a record when a serious error is detected. A \$.E administrative message will be sent to the entering agency. A record should be canceled when it is determined to be invalid; for example, the warrant which was the basis for the record has been dismissed or the record is the result of a fictitious theft report.

The entering agency will receive a response from NCIC and/or TCIC when a record in that system is canceled. The response will include the NIC and TIC numbers for the record.

Record Cancellation Response from TCIC

Record Cancellation Response from NCIC

TL01M111
TX1234567
CANCEL NIC/V123456789
THIS RESPONSE IS FROM THE NCIC SYSTEM.

Record Locate

The purpose of a locate message is to indicate (until the entering agency clears the record) the wanted person has been apprehended or the property has been located. If the locating agency intends to hold the individual on local charges, the locate transaction should indicate detention by placing DETN in the Extradition Field. In the Missing Person File, a locate message indicates the whereabouts of the missing person has been determined and retires the record from the file.

A locate message must be transmitted when an agency other than the entering agency of the record finds the missing person, apprehends the wanted person or recovers the property on file in NCIC. The only exceptions to placing a locate message occur when the hit contains a no extradition indication or an extradition limitation indication and the agency finding the person is outside the geographical area of extradition. In such a case, the record should not be located. All records on file for the found missing person, apprehended wanted person or recovered property must be located to ensure that they are in the correct status.

A locate message cannot be used by the agency that entered the record in NCIC unless the apprehending agency incorrectly places a locate or fails to place a locate on a wanted person record. In that case, the entering agency may place a locate on its own record with the requirement that they place a detainer on the record.

The entering agency will receive a response from NCIC and/or TCIC when a record in that system is located. The response will include the NIC or TIC number for the record.

Record Locate Response from TCIC

LOCATE NIC/ V123456789
THIS RESPONSE IS FROM THE NCIC SYSTEM.

Clear Record

The purpose of a clear message is to indicate location of a missing person, apprehension of a wanted person, if not detained or recovery of property on file in NCIC. A clear transaction causes a protection order record to be placed in an inactive status for the remainder of the year plus five years and causes a sex offender record to be placed in an inactive status until the record is canceled. For all other files, a clear removes the record from the active files and places it in retired file status where it can be retrieved only by an Offline search. A record may be cleared only by the agency that entered the record in file.

The entering agency will receive a response from NCIC and/or TCIC when a record is cleared from that system. The response will include the NIC or TIC numbers for the record.

NCIC/TCIC Vehicle File

NCIC defines a vehicle is any motor-driven conveyance (except a boat) designed to carry its operator. In addition to conveyances meeting this definition, aircraft and trailers are also to be entered in the Vehicle File. A part is defined as any serially numbered component from a vehicle or boat, and ownership documentation for a vehicle or boat.

Criteria for Entry

- A stolen vehicle may be entered if a theft report has been made. The entering agency must maintain the entry in an up-to-date status. The agency holding the theft report should enter the record. An agency in the state of registry may enter a record for a vehicle stolen in another state only after an inquiry, conducted after a reasonable period, discloses no record has been entered in NCIC by the agency holding the theft report. In this instance, the agency in the state of registry must enter the identity of the agency holding the theft report in the Miscellaneous (MIS) Field.
- A loaned, rented, or leased vehicle that has not been returned may not be entered in the file unless an official police theft report is made or a filed complaint results in the issuance of a warrant charging embezzlement, theft, etc.
- A felony vehicle may be entered on file immediately providing the whereabouts of the vehicle is unknown.
- A vehicle subject to seizure may be entered based on a federally issued court order.
- Agencies must have documentation (electronic or hard copy) on file to support a vehicle entry. All NCIC entries should only be made by the agency holding the theft report and having primary jurisdiction over the place of actual theft. An exception to this occurs when a criminal justice agency or regional dispatch center acts as holder of a record for another agency that has no telecommunications equipment. Only when there is a written agreement between the two agencies which delineates the legal responsibility for the record can the agency holding the record place its own Originating Agency Identifier (ORI) in the ORI Field when the entry is made.
- In addition, data of investigative interest pertaining to stolen vehicles, or related vehicles stolen abroad and transported into the United States may be entered by an agency having sufficient documentation to be responsible for the record.
- Stolen vehicles with no license plate should be entered using the VIN as the numeric identifier. Do not enter TONLY (title only) in the license plate field. This is not a true license plate and cannot be entered into any NCIC files.

Record Retention Period

- If a stolen vehicle record remains on file for 90 days and it does not contain a VIN or OAN, the record is retired. If a felony vehicle or vehicle subject to seizure record remains on file for 90 days, the record is retired. A \$.P purge notification will be sent to the entering agency.
- Stolen vehicles which contain a VIN or OAN will remain on file for the balance of the year entered plus four.
- Other exceptions to the record retention period will occur in the event a serious error is detected in the record on file.
- Vehicle records in the located status will remain in the system for ten days. The entering agency will be notified that the record has been retired by a \$.L administrative message

Image Type (IMT)

Image Number (IMN)

Miscellaneous Information (MIS)

Vehicle Data Entry Transaction - Felony (EF)

A felony vehicle may be entered on file immediately providing the whereabouts of the vehicle is unknown.

Message Key/Caution Codes

- If the occupant(s) of the vehicle in question is known to be armed, -A should be entered as part of the MKE. For example, EV-A would translate as STOLEN VEHICLE - OCCUPANT(S) ARMED and EF-A would translate as FELONY VEHICLE - OCCUPANT(S) ARMED.
- If it is desired that a stolen or felony vehicle or stolen part be held for latent fingerprint examination, -P should be entered as part of the MKE. For example, EV-P would translate as STOLEN VEHICLE - HOLD FOR LATENTS, EF-P would translate as FELONY VEHICLE - HOLD FOR LATENTS and EP-P would translate as STOLEN PART - HOLD FOR LATENTS.
- If a stolen or felony vehicle is to be held for latent fingerprint examination and the occupant(s) of the vehicle is known to be armed, -F should be entered as part of the MKE. For example, EV-F would translate as STOLEN VEHICLE - OCCUPANT(S) ARMED/HOLD FOR LATENTS or EF-F would translate as FELONY VEHICLE- OCCUPANT(S) ARMED/HOLD FOR LATENTS.

OPT Type Field

The OPT Field is used to indicate whether a record should be made available for public dissemination. Entering an IN will indicate that the record should be made available for public dissemination. Entering an OUT will indicate that the record should not be made available for public dissemination. If an agency enters a date in the OPT Field, the record will not be made available for public dissemination until that date. All vehicle record entries that do not contain an OPT value will automatically be defaulted to OUT.

Vehicle Identification Number (VIN)

- The complete identification number of the vehicle should be placed in the VIN Field.
- When entering a vehicle with a nonconforming 17-character VIN in the VIN Field, contact TCIC Operations for authorization before placing the word SVIN as the first item in the MIS Field.
- When entering a trailer with a nonconforming 17-character VIN in the VIN Field, place the word SVIN as the first item in the MIS Field.

Notify Originating Agency

When the entering agency believes that notification each time its record is hit will provide investigative leads, regardless of whether the location of the vehicle is known, Y should be entered into the NOA Field. If the NOA is blank, the field will default to N. The NOA Field will be returned in record responses when the inquiring agency ORI matches the entering agency ORI and in unsolicited notifications (\$. messages) to the ORI of record.

Miscellaneous Data

- When entering a nonconforming 17-character VIN in the VIN Field, place the word SVIN as the first item in the MIS Field. See VIN field requirements for additional information.
- License plate numbers exceeding ten characters must be shown completely in the MIS Field. The first ten characters of the plate number must be entered in the LIC Field.
- VINs exceeding 20 characters must be shown completely in the MIS Field. The last 20 characters must be entered in the VIN Field.
- Regarding a felony vehicle record, a brief description of the felony should appear in the MIS Field.
- In instances where a vehicle is not registered and the VYR is unknown, such as for a minibike or homemade vehicle, the VYR should be estimated and VYR-ESTIMATED should be placed in the MIS Field.

TCIC Stored/Abandoned Vehicle File - TCIC Only

The Stored/Abandoned Vehicle file should be used when an agency stores a vehicle on police property or in a licensed storage facility or when an agency is notified by a licensed storage facility that they have received a vehicle for storage. Entry of a vehicle into this file should only be used after a vehicle inquiry produces no records and the registered owner of the vehicle cannot be contacted.

Record Retention Period

- Stored/Abandoned Vehicle file records remain in TCIC one year from the date of entry.
- Agencies are not notified when the records are purged from the file.

Miscellaneous Information (MIS)

Miscellaneous Data

When entering vehicles stored in the state-licensed vehicle storage facilities (VSF), the VSF license number issued by the Texas Department Licensing and Regulation (TDLR) for that facility should be placed in the first nine characters of the Miscellaneous Field (MIS). Storage facilities owned by a law enforcement agency are not required to have a VSF number.

Cancel Stored/Abandoned Vehicle Record (XRV)

When canceling an Stored/Abandoned Vehicle record from TCIC, users are expected to enter the Reason for Property Record Removal (RPP). Valid values are AUCTION, TITLE TRANSFERRED, OWNER CLAIMED, or OTHER MEANS.

NCIC/TCIC License Plate File

NCIC defines a regular license plate as a standard 6" x 12" plate issued for use on a passenger automobile and containing no embossed wording, abbreviations, and/or symbols to indicate that the license plate is a special issue. All plates other than regular passenger automobile plates are classified as special plates. Examples of special plates are the following: aircraft, antique, bus, commercial, dune buggy, farm vehicle, motorcycle, trailer, truck, and U.S. Government vehicles.

Criteria for Entry

- A uniquely numbered stolen license plate can be entered only if a theft report has been made.
- In a two-plate state where only one plate is reported stolen, the entering agency can make an entry only after getting the complainant's assurance that the remaining plate will not be used on a vehicle.

Record Retention Period

- License plate records will remain on file for the balance of the year of entry plus an additional four years.
- Serious errors will affect the retention period of a record. A serious error in this file occurs when a record contains inaccurate license plate data. A state Department of Motor Vehicles (DMV) where the plates are issued may compare license plate data with records contained in their files. If inaccuracies are detected, the state of registry notifies the entering agency so the inaccurate data can be corrected. If the error is not corrected, the state of registry should notify NCIC. Upon notification from the state of registry, NCIC will cancel the record and transmit a \$.E administrative message to the entering agency. The message provides the entire canceled record and a detailed explanation for the cancellation.
- A license plate record is retired 10 days after it is located, and the entering agency is notified with a \$.P administrative message. The ORI of record will be notified that the record has been located by a \$.L administrative message.

Miscellaneous Information (MIS)

Miscellaneous Data

- When only one plate is stolen or missing, some type of notation must be entered in the MIS Field to explain this fact; for example, 1 PLATE STOLEN.
- When both license plates are stolen, enter BOTH PLATES STOLEN, in the MIS field.
- When the license plate number exceeds ten characters, only the first ten digits in the LIC Field should be entered. The full plate number must be entered in the MIS Field.
- When the license plate sticker, windshield sticker or embossed numbers on the plate are missing, the highest year in which the license plate is valid as indicated on the registration document must be entered in the LIY Field.

Stolen Vehicle/Boat Part File

NCIC defines a part as any serially numbered component from a vehicle or boat, and ownership documentation for a vehicle or boat.

Criteria for Entry

A stolen vehicle identification number (VIN) plate, certificate of origin/certificate of title (blank or associated with a vehicle), or a serially numbered backhoe, hay baler, engine, transmission, battery, carburetor, door, bumper, hubcap, etc., may be entered in the Vehicle/Boat Part File as stolen if a theft report is on file. AM/FM/CB radios, tape players, and other entertainment devices should not be entered in the Vehicle/Boat Part File but may be entered in the Article File.

Record Retention Period

- Stolen Vehicle/Boat Part File records which contain a SER or OAN will remain on file for the balance of the year entered plus four years. Following this retention period, the records in the Vehicle/Boat Part File are retired.
- Vehicle/boat part records in the located status will remain in the system for ten days before they are retired.

Miscellaneous Data

If a stolen vehicle/boat part entry contains either the code PART, ENGN, or TRMN in the BRA Field, the manufacturer's complete name must be entered in the MIS Field. A brief description of the part must also appear in the MIS Field as shown in the examples below: • CAR RECOVERED VIN PLATE MISSING • ONLY VIN PLATE STOLEN • POWERGLIDE AUTOMATIC MISSING • CERTIFICATE OF TITLE STOLEN

NCIC/TCIC Boat File

NCIC defines a boat as a vessel for transport by water, constructed to provide buoyancy by excluding water and shaped to give stability and permit propulsion.

Criteria for Entry

Any stolen boat which has a registration number (REG), Coast Guard document number (CGD), permanently attached hull serial number (BHN) or owner-applied number (OAN) may only be entered in the file if a theft report has been made. Commercial vessels and certain motor yachts over five tons are documented as vessels of U.S. registration under navigation laws administered by the U.S. Coast Guard.

Loaned, rented, or leased boats not returned may be entered by an authorized agency if an official police theft report is made or a filed complaint results in the issuance of a warrant charging embezzlement or theft.

In instances in which a boat, trailer, and any accessories have been stolen, a record(s) should be entered by the following method:

- The agency entering the records should make separate entries in the appropriate files for the stolen boat and any accessories taken with it; that is, the boat must be entered in the Boat File (MKE/EB), its outboard motor must be entered in the Vehicle/Boat Part File (MKE/EP), and the boat trailer must be entered in the Vehicle File (MKE/EV).

Record Retention Period

- Stolen boat records which contain a BHN, CGD, or an OAN are retained in file for the balance of the year entered plus four years. Following this retention period, the records in the Boat File are retired.
- If a record remains on file 90 days and it does not contain a BHN, CGD or OAN, the record is retired.
- Boat records in the located status will remain in the system for ten days before they are retired.

Boat Hull Number (BHN)

The complete hull number, including any alphabetic character(s), must be entered in the BHN Field. Any spaces, hyphens, or special characters which may appear as part of the hull number should be omitted from the BHN Field. If the hull number exceeds 20 characters, the first 20 characters must be entered in the BHN Field. The complete BHN must be entered in the MIS Field.

Miscellaneous Data

If an item(s) associated with the stolen boat is entered in another NCIC file(s), each separate entry should be cross-referenced to the other(s) by entering the NIC of the other related record(s) in the MIS Field of each entry.

TCIC Stored/Abandoned Boat File – TCIC Only

Criteria for Entry

The Stored/Abandoned Boat file should be used when an agency stores a boat on police property or in a licensed storage facility or when an agency is notified by a licensed storage facility, they have received a boat for storage. Entry of a boat into this file should only be used after a QB inquiry produces no hits and the registered owner of the boat cannot be contacted. Registered owner information may be obtained from the Nlets Boat Registration Inquiry (BQ).

Record Retention Period

Stored/Abandoned Boat file records remain in TCIC for one year from the date of entry. Agencies are not notified when the records are purged from the file.

Enter Stored/Abandoned Boat Record (ERB)

*Year of Manufacture (BYR)	

Miscellaneous Information (MIS)

When entering boats stored in state-licensed facilities, the license number issued by the Texas Department Licensing and Regulation (TDLR) for that facility should be placed in the first nine characters of the miscellaneous field (MIS), for example, 50000VSF. Boat trailers that are recovered in conjunction with a boat should be entered in the Stored/Abandoned Vehicle File and the NIC numbers cross referenced in the MIS field.

Cancel Stored/Abandoned Boat Record (XRB)

When canceling an Stored/Abandoned Boat record from TCIC, users are expected to enter the Reason for Property Record Removal (RPP). Valid values are AUCTION, TITLE TRANSFERRED, OWNER CLAIMED, or OTHER MEANS.

NCIC Gun File

NCIC defines a gun as any weapon, including a starter gun, which is designed to or may be readily converted to expel a projectile by air, carbon dioxide, or the action of an explosive. Included in this definition are antique guns; cannons; machine guns; pistols; rifles; shotguns; the frame or receiver of any such weapon; any firearm muffler or firearm silencer; destructive devices such as grenades, mines, missiles, and rockets; and disguised guns such as knife guns, pen guns, belt buckles, and cane guns. BB guns are excluded and must be entered in the Article File because the manufacturers of BB guns are not bound by the same statutes as are the manufacturers of the above-mentioned weapons.

NCIC defines a recovered gun as an abandoned, seized, or found weapon for which no stolen or lost report is on file. A record for a lost or missing gun might be traceable to a crime and may assist in the identification of a recovered gun.

Criteria for Entry

- Records for serially numbered weapons that are stolen may be entered into the file if a theft report has been made.
- A record for a recovered (abandoned, seized, or found) weapon for which no stolen, lost, or felony report is on file may be entered in NCIC. The weapon must remain in the possession of the entering agency or be readily available for examination if the record is in NCIC. If the entering agency loses custody of the recovered gun, the recovered gun record must be canceled.
- A record for a lost or missing weapon may be entered in NCIC if the entering agency has supporting documentation.
- A record may be entered for a weapon believed to have been used in the commission of a felony if this fact is documented in the case file and the location of the weapon is unknown.

Record Retention Period

- Stolen, lost, and felony gun records will remain on file until action is taken by the originating agency to clear or cancel the record.
- Recovered gun records will remain on file for the remainder of the year entered plus two years.
- Gun records in the located status will remain in the system for ten days before they are retired.

Model (MOD)

Notify Originating Agency (NOA)

Linkage Agency ORI (LKI)

Linkage Agency Case Number (LKA)

Miscellaneous Information (MIS)

Enter Felony Gun Transaction (EFG/EFGP)

A record may be entered for a weapon believed to have been used in the commission of a felony if the felony is documented in the case file and the location of the weapon is unknown.

Enter Lost Gun Transaction (ELG)

A record for a lost or missing weapon may be entered in NCIC if the entering agency has supporting documentation.

Enter Recovered Gun Transaction (ERG)

A record for a recovered (abandoned, seized, or found) weapon for which no stolen, lost or felony report is on file may be entered in NCIC. The weapon must remain in the possession of the entering agency or be readily available for examination if the record is in NCIC. If the entering agency loses custody of the recovered gun, the recovered gun record must be canceled.

Make Field

For NCIC purposes, the make of the firearm must be taken from the frame or receiver only, except for U.S. military-issue weapons. NCIC allows for the entry of free text in positions 4 through 23 of the MAK Field.

If the make code is not listed in Gun Data Codes, the *NCIC Code Manual*, the code ZZZ must be placed in the MAK Field, and the manufacture of the firearm must be entered in positions 4

through 23 or as the first item in the MIS Field. If the MAK code is ZZZ and positions 4 through 23 are blank, the MAK field will be translated as MAK/UNKNOWN in the message response. If there is any data in positions 4 through 23, they will be included in the response as entered.

Serial Number Data

Serial numbers must be entered omitting spaces, hyphens, and symbols. If the serial number exceeds 20 characters, the last 20 characters should be entered in the SER Field and the full serial number must be entered in the MIS Field.

Alphabetic characters that are part of the serial number must be included in the entry. Alphabetic characters appearing between numeric characters (embedded alphabetic characters) in a serial number are not considered for matching purposes since some agencies formerly placed records on file after deleting the embedded alphabetic characters.

Thus, an entry of a record with the serial number 369J257 may receive a response of records already on file with serial numbers 369257, 369M257, 36925K7, and 369J257. Letters appearing as a prefix or suffix to the numeric in a serial number are considered in the matching process and, therefore, are not affected by the rule applicable to embedded alphabetic characters. In the event more than one number appears on the firearm, the frame or receiver number must be entered in the SER Field, and other number(s) must be entered in the MIS Field.

Miscellaneous Field

- When the gun make is not listed and code ZZZ is entered in the MAK Field, the manufacturer's name must be placed in the MIS Field.
- If the serial number exceeds 20 characters, the last 20 characters must be entered in the SER Field, and the complete serial number must be listed in the MIS Field.
- If the barrel length is available, it must be entered and expressed in inches and/or fractions of an inch. Barrel length may be in exact or closely approximated dimensions, depending on available data. A slash must separate numerator and denominator of fractions of an inch, for example, 2½-inch barrel would be entered as BBL21/2 and a 4-inch barrel as BBL4.
- Cartridge capacity must be expressed as maximum capacity. Those firearms fed from a clip magazine, or a tubular magazine must be indicated as CLIP or TUBL rather than by cartridge capacity, for example: 6SHOT, 5SHOT, CLIP, or TUBL MAG.
- When a gun is inscribed with a name, monogram, date, etc., the code INSC followed by a dash and the exact or abbreviated inscription must be listed. For example: INSC-MDM (MDM represents a person's initials) INSC-US PROP INSC-TOM 120592 (Name and date represented)
- If the silencer length is available, it must be entered and expressed in inches and/or fractions of an inch.
- The MIS Field must also be used to show alphabetic and numeric characters, for example, Social Security number, driver's license number, etc., that have been engraved on the gun as the result of a theft prevention program.

NCIC Securities File

NCIC defines securities as currency, Federal Reserve Notes, Silver Certificates, US Notes, Canadian Notes and other foreign currency, those documents or certificates that are generally considered to be evidence of debt (Treasury-issued bills, bonds, and notes; municipal and corporate bonds; debentures; other non-personal notes; etc.) or ownership of property (common or preferred stock); excluding vehicle and boat ownership documents; documents which represent subscription rights (stock warrants, stock rights); other types traded in securities exchanges in the United States, except for commodities futures; postal and other types of money orders; traveler's checks; warehouse receipts; savings certificates and interest coupons on stocks and bonds.

Items which do not meet the definition for entry in any NCIC file are personal notes, bank drafts, cashier's checks, bank officer's checks, certified checks, personal checks, company checks, US Treasury checks and other types of government checks (state and local); lost or stolen credit cards, gold or silver coins, gift certificates and savings and checking account passbooks. Serialized food coupons (stamps and books), ingots, lottery tickets and medals do not qualify as securities for NCIC purposes but may be entered in the NCIC Article File.

Criteria for Entry

Serially numbered identifiable securities that have been stolen, embezzled, used for ransom, or counterfeited may be entered into the file if a theft report has been made.

Record Retention Period

- Records for ransom securities have unlimited retention.
- Stolen, embezzled or counterfeited securities records, except traveler's checks and money orders, are retained in the NCIC Securities File for the balance of the year entered plus an additional four years.
- Traveler's checks and money orders are retained in file for the balance of the year entered plus two years.
- Security records in the located status will remain in the system for ten days before they are retired.

Miscellaneous Information (MIS)

Securities Data Entry Transaction – Consecutively Serialized (ESS)

No more than 100 consecutively serialized securities can be entered as one group. If more than 100 securities are to be entered, additional group entries must be made. When a group of consecutively serialized stolen securities is entered, NCIC automatically generates one NIC for the group record.

Denomination Field

- The amount of money represented by a security as indicated in the DEN field. An amount which does not include a fraction of a dollar must be entered omitting the cents position (\$37.00 would be entered as 37). When the amount includes a fraction of a dollar, a hyphen must be used in place of a decimal (\$35.75 would be entered as 35-75).
- The denomination of money orders stolen or embezzled before they were issued by an appropriate authority and before amounts were indicated thereon must be entered as BLANK to indicate that the amount to be paid was not stated on the money order.
- Since warehouse receipts do not represent a value and may be issued for numerous types of warehouse items, the alphabetic characters WR are to be entered in the DEN.

Ransom Money Indicator

The RMI Field can have the value of B (Bait Money), C (Counterfeit) or R (Ransom). The entry of one of these codes in the RMI Field will result in a code translation following the message key translation in a hit response. The entry of R in the RMI Field also results in the unlimited retention of the record. The entry of C in the RMI Field will cause the edits on the SER, DEN, ISS, OWN and SDT to be bypassed.

The codes used in the RMI Field negate the need to enter the words COUNTERFEIT or BAIT MONEY as the first item in the MIS Field.

Miscellaneous

- When counterfeit U.S. currency is entered, if the face plate number and the back plate number appear on the currency, they should be entered in the MIS Field.
- A MIS Field entry for a counterfeit currency might read: COUNTERFEIT A123 BP 345

NCIC Article File

Criteria for Entry

Records for stolen articles can be entered into the Article File if a theft report has been made and the following circumstances are met:

- A record for any item in the theft report which is valued at \$500 or more and has a unique manufacturer-assigned serial number and/or an owner-applied number may be entered. Office equipment, television sets and bicycles may be entered regardless of value.
- If the combined value of property taken in one theft exceeds \$5,000, a record for any item in the theft report, regardless of value, having a unique manufacturer-assigned serial number and/or an owner-applied number may be entered.
- A record for any item in the theft report, regardless of value, having a unique manufacturer-assigned serial number and/or an owner-applied number may be entered if:
 - The circumstances of the theft indicate that there is a probability of interstate movement. Or
 - The seriousness of the crime dictates that an entry should be made for investigative purposes.
- A record for a lost Public Safety, Homeland Security or Critical Infrastructure item of identification (category Q) or equipment (category Z) may be entered in NCIC if the entering agency has supporting documentation.
- A record for stolen toxic or hazardous article (category T) may be entered in NCIC if the entering agency has supporting documentation.

Stolen or lost credit cards, bank drafts, Automated Teller Machine (ATM) cards and checks, including cashier, certified, company, government (local, state, and federal), bank officer, personal and US Treasury, are not to be entered in the NCIC Article File or any other NCIC file. Lost articles of identification, not associated with Public Safety, Homeland Security or Critical Infrastructure may not be entered in the NCIC Article File or any other NCIC file.

Record Retention Period

- An article record containing a TYP Field code beginning with Q, T or Z will be retained in the NCIC Article File until it is cleared or canceled by the originating agency.
- All other article records are retained for the balance of the year entered plus an additional year. Following expiration of this retention period, the record is automatically retired.
- Article records in the located status will remain in the system for ten days before they are retired.

Lost Article of Identification Entry Transaction (ELA)

A record for a lost Public Safety, Homeland Security, or Critical Infrastructure item of identification (category Q) may be entered in NCIC if the entering agency has supporting documentation.

Article Data Entry Transaction – Consecutively Serialized (EAA)

No more than 100 consecutively serialized articles can be entered as one group. If more than 100 articles are to be entered, additional group entries must be made. When a group of consecutively serialized stolen or lost articles is entered, NCIC automatically generates one NIC for the group record.

Lost Article of Identification Entry Transaction - Consecutively Serialized (ELAA)

No more than 100 consecutively serialized lost articles of identification can be entered as one group. If more than 100 articles are to be entered, additional group entries must be made. When a group of consecutively serialized stolen or lost articles is entered, NCIC automatically generates one NIC for the group record.

Type Field

The code used in the TYP Field must be at least four characters with no punctuation or spaces between characters. The TYP Field is divided into two parts:

- Category Code - A unique alphabetic character assigned to each of the major classifications of articles listed in Article Data Codes, *NCIC Code Manual*.
- Article Name Code - The Article Name Dictionary, included in the *NCIC Code Manual*, Article Data Codes, should be used for Article File entries and inquiries.

The article name code follows immediately after the category code best classifying the article with no space between the category code and the article name code. If an article is not published in the Article Name Directory, it must be entered with category code Y and the following procedures apply:

- The complete name of the article must be used if possible. If the article name is one word of more than six letters, the first six letters in the article name must be used.
- An article name which is two words must be treated as one word.
- If an article name is three words, the initials of the first two words and the first four letters of the last word must be used.
- The entry will be rejected if the TYP code begins with an alphabetic character other than Y and is not a code listed in the Article Name Dictionary.

Brand Name Field

The BRA Field must contain a minimum of two alphanumeric characters and cannot contain more than six. A hyphen is the only special character allowed in this field. The words AND, COMPANY, CORPORATION, INCORPORATED, LIMITED and the ampersand are not considered part of the actual brand name. If the brand name is not listed in the *NCIC Code Manual*, the following instructions apply if the brand name consists of:

- A single word, the first six letters of the name must be used.
- Two words, the first letter of the first word followed by a space and then the first four letters of the second word should be entered.
- Three words, the first letter of the first word must be used followed by a space, then the first letter of the second word followed by a space and then the first two letters of the last word.
- An initial and one word, the initial followed by a space and the first four letters of the word must be used.
- Two initials and one word, the first initial followed by a space, then the second initial followed by a space and then the brand name must be used.
- Initials are to be entered omitting spaces and periods.

When stolen property does not have a brand name or if the brand name is unknown, the code NO BRA must be entered in the BRA Field. A complete description of the stolen article should be placed in the MIS Field when this code is used.

Miscellaneous

- Describe the location of the serial number and/or owner-applied number on an item of property. This information should be entered in easily readable, abbreviated language. For example:
OAN ENGRAVED ON BACK RADIO OAN IS OP ID NO SER TAG ON LEFT EAR
- Description of the stolen article when the code NO BRA (No Brand) is used in the BRA Field.
- If the serial number exceeds 20 characters in which case the rightmost 20 characters should be entered in the SER Field, and the complete serial number should be entered in the MIS Field.
- If the model number contains more than nine characters in which the last nine have been entered in the MOD Field, with the complete model number in the Misc. field.
- If the model name if it contains more than nine characters in which the first nine have been entered in the MOD Field, with the complete model's name in the Misc. field.

NCIC/TCIC Wanted Person File

Criteria for Entry

An entry in the Wanted Person File must be made immediately after:

1. the decision to arrest or authorize arrest has been made, and
2. a decision has been made regarding extradition, and
3. a warrant is on file (electronic or hard copy) to support the entry.

Adult (EW)

- An individual (including a juvenile who will be tried as an adult) for whom a federal warrant is outstanding. Federal fugitives are persons who:
 - Are being sought because they have been charged with one or more federal crimes,
 - Have failed to appear for a required court action or for deportation, or
 - Have escaped from federal custody.
- An individual (including a juvenile who will be tried as an adult) for whom a felony or misdemeanor warrant, including class C, is outstanding. If the purpose of the warrant is collection of fines, entry into NCIC is not permitted.
- Probation and parole violators meeting the criteria above.

Juvenile (EWJ)

Juvenile status is determined by the laws of the state of residence of the parent, guardian, person, or agency entitled to legal custody of such juvenile. Texas considers a juvenile to be an individual aged 17 or younger at the time of the offense.

The criteria for entry are the following:

- A juvenile who has been adjudged delinquent and is subject to the jurisdiction of the court making such adjudication or to the jurisdiction or supervision of an agency or institution pursuant to an order of such court, and
 - Who has escaped from an institution or agency vested with the legal custody or supervision of such juvenile, or
 - Who has absconded while on probation or parole
- Entry of a record in this category must be supported by a copy of the judgment, formal adjudication or order of commitment which subjects such a delinquent to probation or parole or to the legal custody of the institution or agency concerned. Specifically excluded from this category are status offenders, i.e., children who commit noncriminal but legally proscribed acts, included but not limited to truancy, disobedience to parents, running away or violating curfew.
- A juvenile who has been charged with the commission of a delinquent act that would be a crime if committed by an adult and who has fled from the state where the act was committed.

Temporary Felon (ET)

A temporary felony want record, message key (MKE) ET, may be entered to establish a want entry when a law enforcement agency needs to take prompt action to apprehend a person (including a juvenile) who has committed, or the officer has reasonable grounds to believe has committed, a felony. This individual may seek refuge by fleeing across jurisdictional boundaries while circumstances prevent the immediate acquisition of a warrant.

A warrant for the arrest of the individual must be obtained as soon as possible and, thereafter, the temporary felony want record must be either canceled and a permanent wanted person record (MKE/EW) must be entered or the MKE must be modified to the permanent wanted person record MKE/EW.

Record Retention Period for a Wanted Person Record

- Wanted person records have an unlimited retention period.
- A record with the MKE/EW or MKE/EWJ to which one locate is appended indicating that the subject will be extradited (EXTR) or detained (DETN) will be retired 5 days from the date of the locate transaction. The originating agency will be notified by a \$.P message.
- If a second or subsequent locate indicating that the subject will be extradited (EXTR) or detained (DETN) is received within those 5 days, the retirement date will be reset to 5 days from the date of the second locate transaction.
- A record with MKE/EW or MKE/EWJ to which one locate message has been appended indicating that the subject will not be extradited (NOEX) will be retired immediately upon receipt of a second locate message with NOEX. The ORI of the record will be notified that the record has been retired.
- Records for juveniles will not be retired when the juvenile reaches the age of emancipation. Once the individual has been emancipated, NCIC will notify the entering agency with a \$.J message and change the MKE translation to include a caveat to the record indicating that the juvenile has reached the age of emancipation.
- Data in the License Plate Number (LIC), License Plate Year of Expiration (LIY), and License Plate Type (LIT) Fields will remain in a wanted person base record or supplemental record for the year of entry plus four years from the date of entry of the base record regardless of when the license plate data is entered. Entering agencies are not notified of records from which expired license data are retired. If the purged license plate is the only searchable identifier in the Wanted Person File record, the entire record will be removed, and the originating agency will not be notified.

Retention Period for a Temporary Felony Want Record

Temporary felony want records have a 48-hour retention period. A temporary felony want record will be retired at the end of 48 hours and a \$.P administrative message will be sent to the originating agency.

Street Name (SNA)	County of Address (COU)

Miscellaneous Information(MIS)

Caution Codes

To enhance officer safety, the use of caution codes must be considered. The presence of a caution provides situational awareness to Peace Officers concerning persons and property. There is only one caution indicator for person files: C – Caution; followed by the appropriate Caution Medical Condition (CMC).

Caution and Medical Conditions

When a wanted person record is entered with a caution indicator (the MKE ends with -C), the CMC Field must contain a valid caution and medical code. The allowable CMC codes and their translations are the following:

Alcoholic (55)	International Flight Risk (40)
Allergies (60)	Known to Abuse Drugs (20)
Armed and Dangerous (00)	Martial Arts Expert (10)
Diabetic (90)	Medication Required (80)
Epilepsy (65)	Other (01) – Identify in the MISC field
Escape Risk (25)	Sexually Violent Predator (30) – Contact
Explosive Expertise (15)	ORI for Detailed Information
Heart Condition (50)	Suicidal (70)Violent Tendencies (05)
Hemophiliac (85)	

Date of Birth

All records must be entered with a complete DOB when available. When the complete date is not available, zeros can be used for the unknown month or day. If a DOB is the only searchable numeric identifier, it must be complete, including year, month, and day.

Scars Marks and Tattoos

Wanted Person records must be packed with all available personal descriptors such as the following:

Scars	Medical	Other Physical
Artificial Body Parts	Conditions/Diseases	Characteristics
Deafness	Medical Devices/Implants	Healed Fractured Bones
Deformities	Missing Body Parts	Skin Discolorations
Drugs of Abuse	Moles	Tattoos
Eye Disorders	Needle Track Marks	Therapeutic Drugs
Fractured Bones		
Removed Tattoos		

Extradition

Before entering a wanted person in NCIC, the entering agency must attempt to determine, to the maximum extent possible, if extradition will be authorized when the individual is located in another state. For NCIC purposes, extradition is the surrender by one state to another of an individual charged with or convicted of an offense outside its own territory and within the territorial jurisdiction of the other. Agencies entering warrants that do not meet the NCIC definition of extradition (intrastate only) must code the EXL (Extradition Limitations) Field as 4 (NO EXTRADITION – IN-STATE PICK UP ONLY. SEE MIS FIELD FOR TRANSPORTATION LIMITATION) for felony warrants or D (NO EXTRADITION – IN-STATE PICK UP ONLY. SEE MIS FIELD FOR TRANSPORTATION LIMITATION) for misdemeanor warrants. Additional details regarding intrastate limitations may be placed in the MIS Field.

In situations where an agency is certain that the wanted person will not be extradited, the individual's record may be entered in NCIC using the appropriate code in the EXL Field.

At the time of entry, if there is a limitation concerning extradition of the wanted person, such information must be entered using the appropriate code in the Extradition Limitation Field with any specific limitations placed in the MIS Field of the record.

- EXTR ADJACENT STATES ONLY
- EXTR WEST OF MISS ONLY
- EXTR WITHIN 1000 MILES ONLY
- NOEX

In many instances, however, no forecast of extradition can be made at the time the wanted person is entered on file because extradition is not a law enforcement decision. In such cases, use the codes 6 or F in the Extradition Limitation (EXL) Field to indicate PENDING EXTRADITION DETERMINATION. If at some future time, the entering agency learns that the individual will not be extradited, the NCIC record must be modified using the appropriate code in the EXL Field.

Extradition Codes

1	Felony - Full Extradition
2	Felony - Limited Extradition (see MIS field, MIS required)
3	Felony - Extradition – Surrounding States Only
4	Felony - No Extradition – Instate Pick Up Only (see MIS field for limits)
5	Felony - Extradition Arrangements Pending (see MIS field, MIS required)
6	Felony – Pending Extradition Determination
A	Misdemeanor - Full Extradition
B	Misdemeanor - Limited Extradition See MIS Field
C	Misdemeanor - Extradition – Surrounding States Only
D	Misdemeanor - No Extradition
E	Misdemeanor - Extradition Arrangements Pending (see MIS field, MIS required)
F	Misdemeanor - Pending Extradition Determination

Miscellaneous

- For NCIC wanted person entries with a code of 2 or B (LIMITED EXTRADITION SEE MIS FIELD) in the EXL Field, the MIS Field must contain details regarding the extradition authorized; with the code of 5 or E (EXTRADITION ARRANGEMENTS PENDING SEE MIS FIELD) in the EXL Field, the MIS Field must contain the location from where the extradition is pending.
- Agencies entering warrants that do not meet the NCIC definition of extradition (e.g., intrastate only) must use the codes 4 (felony warrants) or D (misdemeanor warrants) in the Extradition Limitation (EXL) Field to indicate NO EXTRADITION – IN-STATE PICK UP ONLY. SEE MIS FIELD FOR LIMITS. Additional details regarding intrastate limitations may be placed in the MIS Field.
- If Blue Alert is entered in the MIS Field, the following caveat will be displayed immediately below the MKE translation on the record response: BLUE ALERT WARNING. USE EXTREME CAUTION IN APPROACHING THIS INDIVIDUAL.
- When a warrant issued for a subject contains multiple charges, the entering agency must enter the code for the more serious charge in the Offense Code (OFF) Field with the additional charge(s) shown in the MIS Field. Two separate entries by an ORI for the same person should not be made. It is only necessary for an ORI to enter one record on a person, no matter how many separate charges are lodged against him/her.
- The Additional Offense Field (ADO) must be used to indicate that multiple warrants exist for the same individual by the same ORI. Additional offenses should be listed in the MIS Field.
- Include description of Scars, Marks, and Tattoos (SMT), details of Caution Medical Conditions (CMC) and cross-reference related NCIC records.

Enter Supplemental Data (EN)

A wanted person supplemental record must be utilized when additional identifiers, including but not limited to aliases, scars, marks, tattoos, and other characteristics need to be added to a wanted person record. The supplemental record may only be made by the agency that entered the wanted person record. A maximum of nine additional identifiers of various kinds may be entered in one supplemental record entry message. Single nicknames should be entered as alias names using the following format: NICKNAME,X

NCIC Image File

Images are associated with NCIC records to assist in identifying a person or property. Several types of images can be stored in NCIC. Images can be stored for a person, property, or as a reference.

The types of images that can be stored for a person are mug shot, signature, and identifying images. Identifying images can also be stored to help identify property. Articles, guns, parts, boats, and vehicles can be associated with an identifying image. Images stored as references are referred to as generic images. The Securities File does not have image capability.

Record Retention Period

Images that are associated with records are subjected to the same retention periods as those records.

Image Data size and Resolution

To reduce the time required to transmit an image, image data are compressed before transmission. Image processing software must be included in the workstation software. NCIC images have the following characteristics: MUGSHOTS, SIGNATURES, AND IDENTIFYING IMAGES

Number of Images Allowed

- Only one Mugshot and one Signature image can be associated with a person record.
- No more than ten identifying images (such as scars, marks, and tattoos) can be associated with a person record.
- Only one identifying image can be associated with a vehicle, boat, vehicle/boat part, article, or gun record.
- Generic images are the only images which can be linked to multiple base records.

Image Entry Transaction – Mugshot, Signature and Identifying (EIM)

*Indicates mandatory fields

Header Information

*Originating Agency Identifier (ORI)
Control Field (CTL)

Required Information

*NCIC Number (NIC)
*Image Type (IMT)
Date of Image (DOI)

Image Data

*Image (IMG)

Miscellaneous Information (MIS)

Date of Image (DOI)

The date of the image is the date the photograph, or signature was taken, or the date represented by an age-progressed image. If the year is known, but the actual date the image was taken is unknown, 0000 should be used for the month and day, and the year the image was taken should be used for the year. When an image being entered is an age-progressed image, the date the image was created should not be used. Instead, the month and the day of the individual's birthday should be used, and the year for the date of image should represent the time at which the subject's appearance should match that of the image.

Miscellaneous Information (MIS)

The Miscellaneous (MIS) Field contains information regarding images that could not be entered in the already established fields. This field enables agencies to provide information such as the approximate date of the image, if the image is age progressed, who provided the image, and any other information that may be beneficial in the investigation.

NCIC/TCIC Identity Theft File

The Identity Theft File serves as a means for law enforcement to flag stolen identities and identify the imposter when encountered by law enforcement. In accordance with Texas Government Code 411.0421, a procedure has been established to assist law enforcement agencies in verifying that an individual's identification has been used by another person.

Criteria for Entry

An entry in the Identity Theft File must be supported by an official complaint (electronic or hard copy) recorded by and on file at a law enforcement agency. Documentation for the identity theft complaint must meet the following criteria before an entry can be made into the Identity Theft File:

- Someone is using a means of identification of the victim (denoted in the Identity Theft and Assumption Deterrence Act of 1998 as any name or number that may be used, alone or in conjunction with any other information, to identify a specific individual).
- The identity of the victim is being used without the victim's permission.
- The victim's identity is being used or intended to be used to commit an unlawful activity.
- The victim must sign a *Declaration of Identity Misuse/Theft & Consent Document* prior to the information being entered into the Identity Theft File.
- Information on deceased persons may be entered into the file if the victim's information has been stolen.
- If the identity of the thief is known and an arrest warrant has been issued, the agency should enter the victim information in the S/F Fields in the Wanted Person File.
- The DOT represents the date the victim's identity was stolen or the date the police report was filed if the date of incident is unknown.

Record Retention Period

An identity theft record will remain active until the entering agency cancels it or until the Date of Purge (DOP) (date of entry plus 5 years) is equal to the current date. When the DOP is reached, a \$.P administrative message will be sent to the originating agency. The maximum retention period for an identity theft record is five years.

Identity Theft Procedures for Texas Agencies

When an identity theft victim becomes aware that his/her identity has been stolen and reports the incident to law enforcement, the agency investigating the identity theft case should complete an incident report and collect fingerprints from the victim.

Once the investigating agency has determined that an individual's identity has been misused the *Declaration of Identity Misuse/Theft & Consent Document* is completed. The declaration must be signed by the complainant, prosecutor and sheriff and contain the individual's personal identifiers and a unique password which is specified by the complainant.

The record can now be entered into the NCIC Identity Theft file (EID) with the declaration and fingerprints mailed to the DPS Error Resolution Unit.

Texas Department of Public Safety
Crime Records Division
Attn: Error Resolution
P.O. Box 4143
Austin, TX 78765-4143

Once processed, the Error Resolution Unit will forward the information to TCIC Operations for verification and return the original declaration and fingerprint card to the entering agency. For additional information, contact Crime Records Division Error Resolution Unit at 512-424-7256 or error.resolution@dps.texas.gov.

During a subsequent encounter by law enforcement, including routine traffic stops, a person query into NCIC will automatically search the Identity Theft File and, if positive, generate a response to the inquiring agency. The officer will receive a response listing the victim profile, including the password, thereby providing the officer with the information necessary to verify that the person encountered is the victim or that the person **may** be using a false identity.

Texas Government Code Sec. 411.0421.

Information Regarding Fraudulent Use of Identification

A. The department shall create a record of each individual who:

1. in conjunction with the attorney representing the state in the prosecution of felonies in the county in which the individual resides and the sheriff of that county or, if the individual is not a resident of a county in this state, the attorney and sheriff in a county that the individual frequents, signs a declaration that the individual's identity has been used by another person to frustrate proper law enforcement without the individual's consent; and
2. file the declaration with the department.

B. A declaration filed under this section must include:

1. the individual's name, social security number, driver's license number, date of birth, and other identifying data requested by the department;
2. a statement that the individual's name, social security number, driver's license number, date of birth, or other data has been used by another person to frustrate proper law enforcement; and
3. a name, word, number, letter, or combination of 30 or fewer characters designated by the individual as a unique password to verify the individual's identity. (NCIC allows up to 20-character passwords.)

C. On receipt of a declaration under this section, the department shall create a record of the individual's identity, including a record of the individual's unique password, in the criminal history record information maintained by the department under Subchapter F. The department shall ensure that this record, including the unique password, is available online to any entity authorized to receive information from the department under Subchapter F.

ID # (if applicable)	ID State	
AKA's (or Other Supplemental Data)		

By signing this document, I hereby provide permission for law enforcement officials to enter my personal data into the Texas Department of Public Safety's (TXDPS) Automated Fingerprint Identification System (AFIS) and both the TXDPS and the Federal Bureau of Investigation's (FBI) Identity Theft files. This information may include, but is not limited to, physical descriptors and identifying information I have provided for future identification verification purposes. I am also providing permission to enter my photograph and fingerprints into this file when/where that capability is available. I understand that the information will be available to entities having access to the TXDPS Crime Information Center and FBI's National Crime Information Center (TCIC/NCIC respectively) files for any authorized purposes. I am providing this data voluntarily as a means to memorialize my claim of identity theft and to designate a unique password to be used for future identity verification purposes.

I understand that the FBI intends to remove this information from the active files no later than five years from the date of entry. I understand that I may at any time submit a written request to the entering agency to have this information removed from the active identity theft file at an earlier date. I further understand that information removed from the active file will not thereafter be accessible via TCIC/NCIC terminals, but it will be retained as a permanent record in the TXDPS

AFIS and the FBI as a record of the entries until such time as its deletion may be authorized by the National Archives and Records Administration (NARA).

I understand that this is a legally binding document reflecting my intent to have personal data entered into the TXDPS's AFIS and the TXDPS's and FBI's Identity Theft files. I declare under penalty of perjury that the foregoing is true and correct. (See 28 U.S.C. § 1746)

Complainant Signature

Name (NAM)
Originating Agency Case Number (OCA)

The Privacy Act of 1974 (5 United States Code § 552a) requires that Federal, state, or local agencies inform individuals whose social security number is being requested whether such disclosure is mandatory or voluntary, the basis of authority for such solicitation, and the uses which will be made of it. Accordingly, disclosure of your social security number is voluntary; it is being requested pursuant to 28 U.S.C. § 534 and Texas Government Code, Section § 411.0421 for the purposes described herein. The social security number will be used as an identification tool; consequently, failure to provide the number may result in a reduced ability to make such identifications or provide future identity verifications.

This Identity Theft Declaration and Consent Form is filed, in conjunction with 28 U.S.C. § 534 and Texas Government Code, Section §411.0421 as a result of the named individual's identity being used by another person to frustrate proper law enforcement without their consent.

NCIC Violent Person File

The Violent Person File (VPF) was designed to alert law enforcement officers that an individual they are encountering may have a tendency for violence against law enforcement.

Criteria for Entry

An entry into the VPF should be made when at least one of the following criteria has been met:

- Offender has been convicted for assault or murder/homicide of a law enforcement officer, fleeing, resisting arrest or any such statute which involves violence against law enforcement.
- Offender has been convicted of a violent offense against a person to include homicide and attempted homicide.
- Offender has been convicted of a violent offense against a person where a firearm or weapon was used.
- A law enforcement agency, based on its official investigatory duties, reasonably believes that the individual has seriously expressed his or her intent to commit an act of unlawful violence against a member of the law enforcement or criminal justice community.

Texas Administrative Code Title 37 Rule 5.32 states, in addition to making an entry into the Threat Against Peace Officer to comply with this subchapter, agencies with threat information that meet the requirement for entry into the NCIC Violent Person File shall make an entry into the NCIC Violent Person File to facilitate a nationwide alert to law enforcement that may encounter the individual.

Record Retention Period

- VPF records have an unlimited retention period.
- A VPF record will remain on file indefinitely or until action is taken by the entering agency to cancel the record.
- Data in the License Plate Number (LIC), License Plate Year of Expiration (LIY), and License Plate Type (LIT) Fields will remain in a VPF record or supplemental record for the year of entry plus four years from the date of entry of the base record regardless of when the license plate data is entered. Entering agencies are not notified of records from which expired license data are retired. If the purged license plate is the only searchable identifier in the VPF record, the entire record will be removed, and the originating agency will not be notified.

Miscellaneous

- If Blue Alert is entered in the MIS Field, the following caveat will be displayed immediately below the MKE translation on the record response:

WARNING-A SUBJECT IN THIS RESPONSE HAS BEEN IDENTIFIED AS A VIOLENT OFFENDER OR A SERIOUS THREAT TO LAW ENFORCEMENT OFFICERS. REVIEW THIS RESPONSE IN ITS ENTIRETY TO OBTAIN ADDITIONAL INFORMATION ON THIS SUBJECT. USE EXTREME CAUTION IN APPROACHING THIS INDIVIDUAL.

TCIC Threat Against Peace or Detention Officer File

This file was created under Texas Government Code 411.048 to establish a database for the collection of threat information. It is intended to help protect peace officers/detention officers and to provide rapid, statewide access to information about threats made against peace officers/detention officers. Positive returns are alerts for any officer(s) at risk due to a recorded threat by a known individual.

A record entered in this file indicates a potentially dangerous individual, not necessarily a wanted person. An officer or agency may only use an officer threat alert to take reasonable action to protect the officer or citizens.

Criteria for Entry

A person who threatens a Peace or Detention Officer can be entered into this file at the discretion of the entering agency only if both of the following criteria have been met:

- The threat consists of an individual's expression of intent to inflict serious bodily injury or death on a Peace or Detention Officer, and
- The threat is not from an anonymous source.

This file does not apply to every threat or offense targeting an officer or threats made by a group rather than an individual. Agencies may not submit an entry without proper criminal predicate directly related to the threat information supporting the record entry. The individual need not have been arrested for the threat being investigated or any other crime, as a predicate for submitting an entry into this file.

Texas Administrative Code Title 37 Rule 5.32 states, in addition to making an entry into the Threat Against Peace Officer to comply with this subchapter, agencies with threat information that meet the requirement for entry into the NCIC Violent Person File shall make an entry into the NCIC Violent Person File to facilitate a nationwide alert to law enforcement that may encounter the individual.

Record Retention Period

Records entered into this file will remain in TCIC indefinitely or until action is taken by the entering agency to remove the record.

Record Validation

Agencies that enter Threat Against Peace or Detention Officer records are required to validate their entry within a five-year review period.

Supplemental Data

TLETS member agencies may add supplemental data to a Threat Against Peace or Detention Officer record using transaction codes ENTO or ENTA depending upon the type of additional identifier being added. Before a supplemental field may be entered for the subject who threatened the Peace or Detention Officer, data must exist in that field of the existing base record.

If that field was not filled upon entry, a modification message (transaction code MOT) must be used to add that field information to the base record before supplemental data can be added. Supplemental data cannot be modified. If there is an error in the supplemental data added to a base record, the supplemental data must be canceled and re-entered. Texas TLETS direct users cancel supplemental data using transaction codes XNTO and XNTA depending upon the type of additional identifier being canceled.

NCIC/TCIC Protection Order File

The Protection Order File (POF) contains court orders that are issued to prevent acts of domestic violence against a person or to prevent a person from stalking, intimidating, or harassing another person. Orders are issued by both civil and criminal state courts. The types of protection orders issued, and the information contained in them vary from state to state.

Additional information can be found in the TCIC Protection Order Manual on Nextest Launch Pad CJIS Training. Sign on with a valid TLETS username and password.

Criteria for Entry

Each record in the POF **must** be supported by a protection order (electronic or hard copy).

Texas Administrative Code Title 37, Part 1, Chapter 27, Subchapter F, Rule 27.72.

Reporting of Information Related to the Protective Order File

(b) The clerk of the court issuing an original or modified protective order under Texas Family Code, Chapter 71, including a dismissal of such order, shall send a copy of the order and related information to: the chief of police of the city where the member of the family or household protected by the order resides, if the person resides in a city with a police department, or to the sheriff of the county where the person resides, if the person does not reside in a city with a police department.

(d) The protective order and related information shall be sent in a manner which will allow the data to be entered into the Protective Order File by the chief or sheriff immediately thereafter.

Texas Family Code Chapter 86.0011.

DUTY TO ENTER INFORMATION INTO STATEWIDE LAW ENFORCEMENT INFORMATION SYSTEM.

- a) On receipt of an original or modified protective order from the clerk of the issuing court, or on receipt of information pertaining to the date of confinement or imprisonment or date of release of a person subject to the protective order, a law enforcement agency shall **immediately, but not later than the next business day** after the date the order or information is received, enter the information required by Section 411.042(b)(6), Government Code, into the statewide law enforcement information system maintained by the Department of Public Safety.
- b) In this section, "business day" means a day other than a Saturday, Sunday, or state or national holiday.

Protection orders must meet the following criteria before an entry can be made into the file:

The protection order includes:

- any injunction, restraining order or any other order issued by a civil or criminal court for the purpose of preventing violent or threatening acts or harassment against, sexual violence or contact or communication with or physical proximity to another person including any temporary and final orders issued by civil or criminal courts whether obtained by filing an independent action.
- any support, child custody or visitation provisions, orders, remedies, or relief issued as part of a protection order, restraining order or stay away injunction pursuant to local, state, tribal or

territorial law authorizing the issuance of protection orders, restraining orders or injunctions for the protection of victims of domestic violence, dating violence, sexual assault, or stalking.

Additionally, reasonable notice and opportunity to be heard must be given to the person against whom the order is sought (respondent); **or**, in the case of *Ex Parte* orders, notice and opportunity to be heard must be provided within the time required by state laws and, in any event within reasonable time after the order is issued, sufficient to protect the respondent's due process rights. *Ex Parte* orders should be entered as **temporary** protection order records.

Ex Parte--Done or made for the benefit of one party only, and without notice to, or argument by, any person adversely interested; of or relating to court action taken by one party without notice to the other, usually for temporary or emergency relief. (*Black's Law Dictionary*, 8th ed. 2004)

Military Protective Order

A Military Protective Order that serves the same general purpose of a court-issued protection order issued in a civilian court qualifies for entry. A Military Protective Order is issued by a commissioned officer as a lawful order under Title 10, United States Code (U.S.C), Article 90, Assaulting or willfully disobeying superior commissioned officer, of the Uniform Code of Military Justice (UCMJ [10 U.S.C. Chapter 47]). Military Protective Orders can only be entered by military law enforcement agencies.

When a military law enforcement agency enters a POF record with a Military Protective Order, protection order condition 08 will be used with the following mandatory caveat in the MIS Field: THIS IS A MILITARY PROTECTIVE ORDER AND MAY NOT BE ENFORCEABLE BY NON-MILITARY AUTHORITIES. IF SUBJECT IS IN POSSIBLE VIOLATION OF THE ORDER, ADVISE THE ENTERING AGENCY (MILITARY LAW ENFORCEMENT).

For Military Protective Orders hit confirmation would not be required, as NCIC policy only requires hit confirmation when taking official action based on the order. However, local, state, federal and tribal authorities would be aware of the military protective order which would enhance officer safety and could then notify the entering agency (military law enforcement) that would take appropriate action.

Record Retention Period

- A POF record (EPO or ETO) will remain active until it is canceled or cleared by the entering agency or until the order expires. Five days prior to an order's expiration date, an unsolicited \$.P administrative message will be sent to the ORI of record. This message will serve to notify the agency of the order's impending expiration date (EXP). It also serves to remind the agency that the record will have to be modified if the EXP is changed by the court.
- If no action is taken by the entering agency to modify the EXP, the record will expire after the fifth day. Inactive records (cleared or expired) will be maintained online for the remainder of the year plus five years. At the end of that time, NCIC will not notify the ORI of record. Records that are in inactive status cannot be modified or cleared; however, inactive records can be canceled.
- Non-expiring Records: Records for protection orders that have no expiration are referred to as non-expiring records (NONEXP). These records will remain active until cleared or canceled by the entering agency.
- Inactive Records: Inactive records (expired or cleared) will be accessible, via the QPO message, for the remainder of the year in which the record was cleared or expired plus five years.
- Protective orders are effective for the period stated in the order, not to exceed two years; or if a period is not stated in the order, until the second anniversary of the date the order was issued. (Texas Family Code 85.025)
- If a person who is the subject of a protective order is confined or imprisoned on the date the protective order would expire or the protective order would expire not later than the first anniversary of the date the person is released from confinement or imprisonment, the period for which the order is effective is extended. (Texas Family Code 85.025)

05 - Child	12 - Other family member	19 - Hate Crime
06 - Grandparent	13 - Roommate	
07 - Grandchild	14 - Foster Parent	

Protection Order Conditions

The terms and conditions of the protection order are indicated in the PCO Field. An additional eight conditions may be added by entering a supplemental record. Specific details of terms and conditions are placed in the MIS Field. PCO codes are the following:

1. The subject is restrained from assaulting, threatening, abusing, harassing, following, interfering, or stalking the protected person and/or the child of the protected person.
2. The Subject may not threaten a member of the protected person's family or household.
3. The protected person is granted exclusive possession of the residence or household.
4. Subject is required to stay away from the residence, property, school, or place of employment of the protected person or other family or household member.
5. The subject is restrained from making any communication with the protected person, including but not limited to, personal, written or telephone contact, or their employers, fellow worker or other whom the communication would be likely to cause annoyance or alarm the victim.
6. Subject has visitation or custody rights for the children named.
7. Subject is prohibited from possessing and/or purchasing a firearm or other weapons as identified in the miscellaneous field.
8. See the Miscellaneous field for the comments regarding the specific terms and conditions of the order.
9. The protected person is awarded temporary exclusive custody of the children named.

Brady Record Indicator

Protection orders meeting certain criteria disqualify an individual from possessing, purchasing, or receiving a firearm per Federal Law 18, USC §922. An order that restrains an individual from harassing, stalking, threatening, or engaging in other conduct that would place an intimate partner in reasonable fear of bodily injury to the partner or a child of the partner disqualifies that individual from possessing, purchasing, or receiving a firearm providing that the order:

- Was issued after a hearing, of which the subject received actual notice, and at which time such person had an opportunity to participate, and;
- Includes a finding that the subject represents a credible threat to the physical safety of an intimate partner or child, and;
- Explicitly prohibits the use, attempted use or threatened use of physical force against an intimate partner or child that would reasonably be expected to cause bodily injury.

If the criteria are met and the subject is considered Brady disqualified, Y should be entered in the BRD Field. This will cause a caveat to be generated as part of a response to an NCIC inquiry. Only a final protection order record (MKE/EPO or EPOC) can contain a Brady indicator of Y or U (unknown). Emergency or temporary orders (MKE/ETO or ETOC) issued ex parte do not meet the criteria specified by law, and, therefore, N must be entered in the field.

Intimate Partner is defined as the spouse of the person, a former spouse of the person, an individual who is a parent of a child of the person, and an individual who cohabit or has cohabited with the person.

Cohabitation is defined as a live-in relationship (or former live-in relationship) between two individuals (can be same sex) which, in essence, is a sexual/romantic relationship, NOT merely a roommate. The following chart contains relationships frequently encountered on protection orders and the corresponding value for the BRD Field.

Brady Record Indicator Relationship to Protected Person Chart

Protected Person	Respondent	BRD
Spouse	Spouse	Y
Former Spouse	Former Spouse	Y
Unmarried Child in Common	Unmarried Child in Common	Y
Unmarried Currently or Formerly Living Together Unless Documentation of Cohabitation Exists	Unmarried Currently or Formerly Living Together Unless Documentation of Cohabitation Exists	U
Child	Parent	Y
Stepchild	Stepparent	Y
Currently or Formerly Cohabiting	Currently or Formerly Cohabiting	Y
Parent	Child	N
Nephew/Niece	Uncle/Aunt	N
Uncle/Aunt	Nephew/Niece	N
Grandchild	Grandparent	N
Grandparent	Grandchild	N

Stepparent	Stepchild	N
Boyfriend/Girlfriend w/out Cohabitation	Boyfriend/Girlfriend w/out Cohabitation	N
Same Sex Cohabiting, Intimate Relationship	Same Sex, Cohabiting, Intimate Relationship	Y
Stranger	Stranger	N

Protection Order Number

A unique number assigned by the court. A hyphen is permitted in addition to alpha-numeric characters.

Name of Protected Person

Texas Code of Criminal Procedures Article 58.102 allows for a victim to choose a pseudonym to be used instead of the victim's name in all public files and records concerning the offense. The victim must complete a Pseudonym for Family Violence Worksheet that includes the protected person's real name and the pseudonym they have chosen. The completed worksheet must be maintained in a manner that protects the confidentiality of the information contained on the form.

Pseudonym forms are located: <https://www.texasattorneygeneral.gov/crime-victims/services-crime-victims/pseudonym-forms-crime-victims>

Address of Protected Person

Texas Family Code Chapter §85.007 states the court may strike the information from the public record of the court and maintain a confidential record for use only by the court or a law enforcement agency for purposes of entering the information into the statewide law enforcement information system maintained by the Department of Public Safety.

Texas Family Code Chapter 85.007.

CONFIDENTIALITY OF CERTAIN INFORMATION.

- a) On request by a person protected by an order or member of the family or household of a person protected by an order, the court may exclude from a protective order
 - 1) the address, county of residence, and telephone number of a person protected by the order; or
 - 2) the address and telephone of:
 - A. place of employment or business of a person protected by the order; or
 - B. the child-care facility or school a child protected by the order attends or in which the child resides.
- b) On granting a request for confidentiality under this section, the court shall order the clerk to:
 - 1) strike the information described by Subsection (a) from the public records of the court; and
 - 2) maintain a confidential record of the information for use only by:
 - A. the court; or
 - B. a law enforcement agency for purposes of entering the information required by Section 411.042(b)(6), Government Code, into the statewide law enforcement information system maintained by the Department of Public Safety.

Texas Family Code Sec. 82.011.

CONFIDENTIALITY OF CERTAIN INFORMATION.

On request by an applicant, the court may protect the applicant's mailing address and county of residence by rendering an order:

- 1) requiring the applicant to:
 - A. disclose the applicant's mailing address and county of residence to the court;
 - B. designate a person to receive on behalf of the applicant any notice or documents filed with the court related to the application; and
 - C. disclose the designated person's mailing address to the court;
- 2) requiring the court clerk to:
 - A. strike the applicant's mailing address and county of residence from the public records of the court, if applicable; and
 - B. maintain a confidential record of the applicant's mailing address and county of residence for use only by the court; and
- 3) prohibiting the release of the information to the respondent.

Texas Family Code Sec. 82.022 B.

REQUIREMENTS OF ORDER APPLYING TO PERSON WHO COMMITTED FAMILY VIOLENCE.

- b. In a protective order, the court may prohibit the person found to have committed family violence from:
 - 1. committing family violence;
 - 2. communicating:
 - A. directly with a person protected by an order or a member of the family or household of a person protected by an order, in a threatening or harassing manner;
 - B. a threat through any person to a person protected by an order or a member of the family or household of a person protected by an order; and
 - C. if the court finds good cause, in any manner with a person protected by an order or a member of the family or household of a person protected by an order, except through the party's attorney or a person appointed by the court;
 - 3. going to or near the residence or place of employment or business of a person protected by an order or a member of the family or household of a person protected by an order;
 - 4. going to or near the residence, child-care facility, or school a child protected under the order normally attends or in which the child normally resides;
 - 5. engaging in conduct directed specifically toward a person who is a person protected by an order or a member of the family or household of a person protected by an order, including following the person, that is reasonably likely to harass, annoy, alarm, abuse, torment, or embarrass the person;
 - 6. possessing a firearm, unless the person is a peace officer, as defined by Section 1.07, Penal Code, actively engaged in employment as a sworn, full-time paid employee of a state agency or political subdivision;
 - 7. harming, threatening, or interfering with the care, custody, or control of a pet, companion animal, or assistance animal, as defined by Section 121.002, Human Resources Code, that is possessed by or is in the actual or constructive care of a person protected by an order or by a member of the family or household of a person protected by an order; and
 - 8. tracking or monitoring personal property or a motor vehicle in the possession of a person protected by an order or of a member of the family or household of a person protected by an order, without the person's effective consent, including by:
 - A. using a tracking application on a personal electronic device in the possession of the person or the family or household member or using a tracking device; or
 - B. physically following the person or the family or household member or causing another to physically follow the person or member.
- c. In an order under Subsection (b)(3) or (4), the court shall specifically describe each prohibited location and the minimum distances from the location, if any, that the party must maintain. This subsection does not apply to an order in which Section 85.007 applies.
- d. In a protective order, the court shall suspend a license to carry a handgun issued under Subchapter H, Chapter 411, Government Code, that is held by a person found to have committed family violence.

Miscellaneous

The miscellaneous field is a 500-character field and should be used to clarify information entered in the order.

- PCO/8 would require the specific terms or conditions of the order be included.
- If the order includes PCO 4, and a distance is stipulated, the following would be entered in the MIS Field – PCO/4 Respondent is ordered to stay X number of feet away from the protected person.
- PCO/7 requires the identification of any other prohibited weapon in the MIS Field.
- If any addresses are included in the order, but listed as confidential, it must be listed as CONFIDENTIAL ADDRESS.
- Visitation, if available/allowed should be included.
- Any other information including but not limited to harming pets, disconnecting, or transferring of phones/utilities, encumbering, or disposing of mutually owned property, removing children from the Protected Person or the jurisdiction of the court, etc.
- Any information regarding tracking or monitoring personal property or a motor vehicle in the possession of a person protected by an order or of a member of the family or household of a person protected by an order, without the person's effective consent.
- If at the time of entry, the DOB of the protected children is unknown, the children may be listed with the DOB as unknown.

Enter Supplemental Data - Protective Order (ENPO)

A supplemental record should be utilized when additional protected persons and/or additional identifiers, including but not limited to aliases, scars, marks, tattoos, and other characteristics need to be added to an existing record. The supplemental record may only be made by the agency that entered the original record. A maximum of nine additional identifiers of various kinds may be entered in one supplemental record entry message.

TCIC Conditions of Bond

Criteria for Entry

Bond conditions are court-imposed requirements that a defendant (adult or juvenile) on pre-trial release must follow until their case is resolved. A judge signs an order setting conditions of bond for release. Additional records may be into Condition of Bond file for the same offender if there are separate case numbers for each record entered.

Record Retention Period

Bond condition records are retained until the date of expiration or records with no expiration will remain active until cleared or canceled by the entering agency.

Timely Entry

Texas Code of Criminal Procedure Article. 17.50.

ENTRY INTO TEXAS CRIME INFORMATION CENTER OF CERTAIN INFORMATION IN CASES INVOLVING VIOLENT OFFENSES OR STALKING; DUTIES OF MAGISTRATES, SHERIFFS, AND DEPARTMENT OF PUBLIC SAFETY.

- b) As soon as practicable but not later than the next day after the date a magistrate issues an order imposing a condition of bond on a defendant under this chapter for a violent offense or an offense under Section 42.072, Penal Code, the magistrate shall notify the sheriff of the condition and provide to the sheriff the following information:
 - 1) the information listed in Section 411.042(b)(6), Government Code, as that information relates to an order described by this subsection;
 - 2) the name and address of any named person the condition of bond is intended to protect, and if different and applicable, the name and address of the victim of the alleged offense;
 - 3) the date the order releasing the defendant on bond was issued; and
 - 4) the court that issued the order releasing the defendant on bond.
- c) As soon as practicable but not later than the next day after the date a magistrate, in a case described by Subsection (b), revokes a bond that contains a condition, modifies the terms of or removes a condition of bond, or disposes of the underlying criminal charges, the magistrate shall notify the sheriff and provide the sheriff with information that is sufficient to enable the sheriff to modify or remove the appropriate record in the database.
- d) As soon as practicable but not later than the next business day after the date the sheriff receives the information:
 - 1) described by Subsection (b), the sheriff shall:
 - (A) enter the information into the database; and
 - (B) make a good faith effort to notify by telephone any named person the condition of bond is intended to protect, and if different and applicable, the victim of the alleged offense that the defendant to whom the order is directed has been released on bond; and
 - 2) described by Subsection (c), the sheriff shall modify or remove the appropriate record in the database.

Texas Code of Criminal Procedure Article. 17.51.

NOTICE OF CONDITIONS.

- (a) As soon as practicable but not later than the next business day after the date a magistrate issues an order imposing a condition of release on bond for a defendant or modifying or removing a condition previously imposed, the clerk of the court shall send a copy of the order to:
- (1) the appropriate attorney representing the state; and
 - (2) the sheriff of the county where the defendant resides.

Texas Code of Criminal Procedure Article. 17.52.

REPORTING OF CONDITIONS.

A chief of police or sheriff who receives a copy of an order described by Article 17.51(a), or the chief's or sheriff's designee, shall, as soon as practicable but not later than the 10th day after the date the copy is received, enter information relating to the condition of release into the appropriate database of the statewide law enforcement information system maintained by the Department of Public Safety or modify or remove information, as appropriate.

Bond Condition

The following are examples of bond condition that are available in TCIC. Bond conditions not listed can be entered by indicating “Other” and entering the information in the Bond Remarks field.

1. Ignition Interlock Device
2. GPS Monitor
3. Alcohol Monitor
4. Curfew (See Bond Condition Remarks)
5. Home Confinement
6. No Communication with Protected Person
7. Prohibited from Protected Person/Child Residence, School, Day-Care Facility (See Bond Condition Remarks)
8. Supervised Access to Victim (See Bond Condition Remarks)
9. No Family Violence or Assault
10. No Direct or Indirect Threatening or Harassment of Protected Person, Family or Pets
11. No Contact Except through Attorney or Court-Appointed Person
12. No Firearm Possession
13. Stay Away “Stalking” (See Bond Condition Remarks)
14. Other (See Bond Condition Remarks)

Bond Amount

The bond amount should be entered rounded up to the nearest US dollar.

Bond Type

C – Cash Bond
P – Personal Bond
S – Surety Bond

Bond Condition Remarks

The Bond Condition Remarks field becomes mandatory with Condition code 4, 7, 8, 13 or 14.

Date of Expiration

A record will remain active until the condition of bond expires. Records for conditions of bond that have no expiration (NONEXP) will remain active until cleared or canceled by the entering agency.

Enter Supplemental Data – Condition of Bond (ENBN)

A supplemental record should be utilized when additional protected persons and/or additional identifiers, including but not limited to aliases, scars, marks, tattoos, and other characteristics need to be added to an existing record. The supplemental record may only be made by the agency that entered the original record. A maximum of nine additional identifiers of various kinds may be entered in one supplemental record entry message

NCIC/TCIC Missing Person File

Criteria for Entry

Agencies must have a missing person report (electronic or hard copy) on file to support a missing person entry. A missing person record may be entered using one of the following categories:

1. Disability (MKE/EMD): a person of any age who is missing and under proven physical/mental disability or is senile, thereby subjecting him/ herself or others to personal and immediate danger.
2. Endangered (MKE/EME): a person of any age who is missing under circumstances indicating that his/her physical safety may be in danger.
3. Involuntary (MKE/EMI): a person of any age who is missing under circumstances indicating that the disappearance may not have been voluntary, for example, abduction or kidnapping.
4. Juvenile (MKE/EMJ): a person who is missing and not declared emancipated as defined by the laws of his/her state of residence and does not meet any of the entry criteria set forth in 1, 2, 3 or 5.
5. Catastrophe Victim (MKE/EMV): a person of any age who is missing after a catastrophe.
6. Other (MKE/EMO): a person not meeting the criteria for entry in any other category who is missing and for whom there is a reasonable concern for his/her safety or a person who is under age 21 and declared emancipated by the laws of his/her state of residence. In accordance with Title 42, United States code (U.S.C.), Section 5779(a), agencies are required to enter records into the NCIC Missing Person File for missing individuals under the age of 21.

NCIC Entry of a Missing Emancipated Person (Adult) Record

Agencies must have a missing person report (electronic or hard copy) on file to support a missing person entry. A record for a missing person who is the age of 18 and over may be entered in the Missing Person File provided the entering agency has signed documentation in its possession supporting the stated conditions under which the person is declared missing. This documentation (electronic or hard copy) will aid in the protection of the individual's right to privacy.

In the absence of documentation from a parent, legal guardian, next of kin, physician, or other authoritative source, including friend or neighbor in unusual circumstances, or when such documentation is not reasonably attainable, a signed report by the investigating officer will suffice.

NCIC Entry of a Missing Juvenile Record

A record for a missing person who is under the age of 18 should be entered into NCIC using one of the appropriate categories (Disability, Endangered, Involuntary, Juvenile, Catastrophe Victim or Other) within 2 hours of receipt of the minimum data required to enter an NCIC record. A missing person report filed with an agency is sufficient documentation for entering a juvenile in the NCIC Missing Person File.

TCIC Entry of a Missing Person (Adult) Record

Texas Code of Criminal Procedure Art. 63.009.

LAW ENFORCEMENT REQUIREMENTS GENERALLY.

- a) A law enforcement agency, on receiving a report of a missing person, shall:
 - 1) if the subject of the report is a person who is known by the agency to have or is reported to have chronic dementia, including Alzheimer's dementia, whether caused by illness, brain defect, or brain injury, immediately start an investigation in order to determine the present location of the person;
 - 2) if the subject of the report is a person other than a person described by Subdivision (1), start an investigation with due diligence in order to determine the present location of the person;
 - 3) immediately, but not later than two hours after receiving the report, enter the name of the person into the clearinghouse and the national crime information center missing person file if the person meets the center's criteria, and report that name to the Alzheimer's Association Safe Return emergency response center if applicable, with all available identifying features such as dental records, fingerprints, other physical characteristics, and a description of the clothing worn when last seen, and all available information describing any person reasonably believed to have taken or retained the missing person;
 - 4) not later than 48 hours after receiving the report, electronically submit to each municipal or county law enforcement agency within 200 miles the report and any information that may help determine the present location of the person;
 - 5) not later than the 60th day after the date the agency receives the report, enter the name of the person into the National Missing and Unidentified Persons System, with all available identifying features such as dental records, fingerprints, other physical characteristics, and a description of the clothing worn when last seen, and all available information describing any person reasonably believed to have taken or retained the missing person; and
 - 6) inform the person who filed the report of the missing person that the information will be:
 - A. entered into the clearinghouse, the national crime information center missing person file, and the National Missing and Unidentified Persons System;
 - B. reported to the Alzheimer's Association Safe Return emergency response center if applicable; and
 - C. submitted to each municipal or county law enforcement agency within 200 miles.

TCIC Entry of a Missing Juvenile Record

Texas Code of Criminal Procedure Art. 63.00905.

LAW ENFORCEMENT REQUIREMENTS FOR REPORT OF MISSING CHILD.

- a) Regardless of the jurisdiction in which the child went missing, a law enforcement agency, on receiving a report of a missing child, shall:
 - 1) immediately start an investigation in order to determine the present location of the child;
 - 2) immediately, but not later than two hours after receiving the report, enter the name of the child into the clearinghouse and the national crime information center missing person file if the child meets the center's criteria, with all available identifying features such as dental records, fingerprints, other physical characteristics, and a description of the clothing worn when last seen, and all available information describing any person reasonably believed to have taken or retained the missing child;
 - 3) immediately, but not later than two hours after the agency receives the report, enter the applicable information into the Texas Law Enforcement Telecommunications System or a successor system of telecommunication used by law enforcement agencies and operated by the Department of Public Safety;
 - 4) not later than 48 hours after receiving the report, electronically submit to each municipal or county law enforcement agency within 200 miles the report and any information that may help determine the present location of the child;
 - 5) not later than the 30th day after the date the agency receives the report, enter the name of the child into the National Missing and Unidentified Persons System, with all available identifying features such as dental records, fingerprints, other physical characteristics, and a description of the clothing worn when last seen, and all available information describing any person reasonably believed to have taken or retained the missing child; and
 - 6) inform the person who filed the report of the missing child that the information will be:
 - A. entered into the clearinghouse, the national crime information center missing person file, and the National Missing and Unidentified Persons System; and
 - B. submitted to each municipal or county law enforcement agency within 200 miles.
- b) A local law enforcement agency, on receiving a report of a child missing under the circumstances described by Article 63.001(3)(D) for a period of not less than 48 hours, shall immediately make a reasonable effort to locate the child and determine the well-being of the child. On determining the location of the child, if the agency has reason to believe that the child is a victim of abuse or neglect as defined by Section 261.001, Family Code, the agency:
 - 1) shall notify the Department of Family and Protective Services; and
 - 2) may take possession of the child under Subchapter B, Chapter 262, Family Code.
- c) The Department of Family and Protective Services, on receiving notice under Subsection (b), may initiate an investigation into the allegation of abuse or neglect under Section 261.301, Family Code, and take possession of the child under Chapter 262, Family Code.

- d) Information not immediately available when the original entry is made shall be entered into the clearinghouse, the national crime information center file, and the National Missing and Unidentified Persons System as a supplement to the original entry as soon as possible.
- e) If a local law enforcement agency investigating a report of a missing child obtains a warrant for the arrest of a person for taking or retaining the missing child, the local law enforcement agency shall immediately enter the name and other descriptive information of the person into the national crime information center wanted person file if the person meets the center's criteria. The local law enforcement agency shall also enter all available identifying features, including dental records, fingerprints, and other physical characteristics of the missing child. The information shall be cross-referenced with the information in the national crime information center missing person file.
- f) Immediately after the return of a missing child, the local law enforcement agency having jurisdiction of the investigation shall:
 - 1) clear the entry in the national crime information center database; and
 - 2) notify the National Missing and Unidentified Persons System.
- g) On determining the location of a child, other than a child who is subject to the continuing jurisdiction of a district court, an officer shall take possession of the child and shall deliver or arrange for the delivery of the child to a person entitled to possession of the child. If the person entitled to possession of the child is not immediately available, the law enforcement officer shall deliver the child to the Department of Family and Protective Services.

Adam Walsh Child Protection and Safety Act of 2006

The Adam Walsh Child Protection and Safety Act (2006)(Sec. 154)(a) Amends the Crime Control Act of 1990 to prohibit a state law enforcement agency from removing a missing person from its law enforcement data system or the National Crime Information Center computer database based solely on the age of such person.

Suzanne's Law

Suzanne's Law - Amends the Crime Control Act of 1990 to require each State reporting under provisions of the Act regarding missing children to ensure that no law enforcement agency within the state establishes or maintains any policy that requires the observance of any waiting period before accepting a missing youth report.

Suzanne's Law defines "missing youth" as anyone between 18 and 21 years of age whose whereabouts are unknown and who is physically or mentally disabled, who may be in the company of another person under circumstances indicating that such individual's physical safety is in danger, or whose disappearance is surrounded by circumstances that indicate that the disappearance may have been involuntary

Entry of a Catastrophe Victim Record

Catastrophe victim (MKE/EMV) records may be entered by any agency involved in identifying victims of a disaster, for example, an airplane crash. No written documentation is required for entry into this category.

Record Retention Period

- A missing person record is retained indefinitely until action is taken by the originating agency to cancel or clear the record or until a locate is placed against the record.
- When a missing person has been positively identified by partial body parts, the entering agency may maintain the NCIC record for future identification in the event additional body parts are recovered.
- A missing person record will be retired immediately upon receipt of a locate message. The ORI of the record will be notified that the record has been retired by a \$.L administrative message.
- Data in the License Plate Number (LIC), License Plate State (LIS, License Plate Year of Expiration (LIY) and License Plate Type (LIT) Fields will remain in a missing person base record or supplemental record for the year of entry plus four years from the date of entry of the base record.

Miscellaneous Information (MIS)

Missing Person MNP

The MNP Field is mandatory for all entries. If the MKE is EMD, EMJ or EMO, the MNP Field must be MP (Missing Person). If the MKE is EMV, the MNP must be DV (Disaster Victim). If the MKE is EME or EMI, the MNP must be either MP, CA (Child Abduction) or AA (Amber Alert).

If MNP is CA, the missing person's age must be less than 21 years of age. The CA is to be used in the MNP Field when there is reasonable indication or suspicion that a child has been abducted and/or is missing under circumstances suggesting foul play or a threat to his/her life. While the CA code is discretionary, every effort should be made to use the code when the criteria are met. The use of this code will give the FBI and the National Center for Missing and Exploited Children (NCMEC) notification of urgent cases and enable them to provide assistance if needed.

The MNP Field of an NCIC missing person record is entered or modified to the AA code when an AMBER Alert has been activated. Use of the AA code in NCIC does not change the procedures or protocols for activating an AMBER Alert. The AA code provides a method of alerting law enforcement to the status of the missing child and generates immediate notifications to the FBI and the NCMEC, enabling them to deploy resources, when needed, in the most serious child abduction cases.

Missing Juvenile - High Risk Factor

In addition to the entry criteria, acceptable supporting documentation must accompany the agency's case file and be made available for the TCIC auditors to review for compliance. Examples of supporting documentation are as follows: copies of previous missing person's reports, written statements from parents and/or guardians-family members, written statements from foster caregivers or the Department of Family and Protective Services or any other authoritative source with proof of prior events.

The specific supporting information will need to be listed in the miscellaneous (MIS) field:

HIGH RISK	HIGH RISK FOSTER CARE
HIGH RISK TRAFFICKING	HIGH RISK FOSTER CARE ABUSE
HIGH RISK SEXUAL ASSAULT	HIGH RISK MENTAL ILLNESS

Texas Code of Criminal Procedure Art. 63.0091.

LAW ENFORCEMENT REQUIREMENTS REGARDING REPORTS OF CERTAIN MISSING CHILDREN.

- a) The public safety director of the Department of Public Safety shall adopt rules regarding the procedures for a local law enforcement agency on receiving a report of a missing child who:
 - 1) had been reported missing on four or more occasions in the 24-month period preceding the date of the current report;
 - 2) is in foster care or in the conservatorship of the Department of Family and Protective Services and had been reported missing on two or more occasions in the 24-month period preceding the date of the current report; or
 - 3) is at a high risk of human trafficking, sexual assault, exploitation, abuse, or neglectful supervision for any reason the agency considers to be high risk, including because the missing child:
 - A. disappeared while in a dangerous environment;
 - B. has mental or behavioral health needs;
 - C. previously exhibited signs of mental illness;
 - D. has an intellectual or developmental disability; or
 - E. is known to have been last seen or in communication with an adult unknown to the child's family or legal guardian.
- b) The rules adopted under this article must require that:
 - 1) in entering information regarding the report into the national crime information center missing person file as required by Article 63.00905(a)(2) for a missing child described by Subsection (a), the local law enforcement agency shall indicate, in the manner specified in the rules, that the child is at a high risk of harm and include relevant information regarding:
 - A. any prior occasions on which the child was reported missing; and
 - B. the circumstances considered when designating the child as high risk; and
 - 2) the local law enforcement agency that receives a report of a missing child described by Subsection (a)(3) shall:
 - A. reasonably escalate the response; and
 - B. immediately, but not later than two hours after receiving the report, notify all law enforcement agencies within 100 miles, including agencies from other states, of the circumstances and high risk designation of the missing child.
- c) If, at the time the initial entry into the national crime information center missing person file is made, the local law enforcement agency has not determined that the requirements of this article apply to the report of the missing child, the information required by Subsection (b)(1) must be added to the entry promptly after the agency investigating the report or the Department of Public Safety determines that the missing child is described by Subsection (a).

Height or Weight Unknown

The height first character represents feet and the second and third characters represent inches. May be a minimum of 100 but not more than a maximum of 711 or UNK. The weight Minimum of 001 and maximum of 499 or UNK. If the HGT or WGT fields contain UNK and the FBI field is blank, the MIS field must begin with PHOTO AND/OR PRINTS AVAILABLE WITH HIT CONFIRMATION WITHIN TEN MINUTES.

FBI Number/UCN

Missing Person records that contain an FBI Number/UCN will be cross searched though the Namus Missing Persons database. The Namus website is located at www.findthemissing.org and provides an opportunity for families, law enforcement agencies and investigators to search nationwide for missing persons using a variety of powerful search features.

Miscellaneous Data

The types of information that should be included in the MIS Field are:

- Clothing description (size, color, style, laundry marks)
- Shoes (size, style, color)
- Smoker (pipe, cigar, cigarette; brand)
- Tobacco chewer (brand)
- Fingernails (polish, length, biter)
- Possible destination
- Amount of money in possession
- Medication in possession
- Left-handed
- Right-handed
- Explanation/description of scars, marks, tattoos, and physical characteristics
- Conditions under which a juvenile is listed as missing
- Child is missing under suspicious circumstances and/or child is believed to be in a life-threatening situation
- Missing Body parts recovered

State Conservatorship

Conservatorship is when a judge grants the Department of Family and Protective Services (DFPS) temporary custody of a child. This court order is valid from the time the judge signs it, regardless of whether the parents/custodians have been served. When DFPS gets conservatorship of a child and they are unable to locate the child, they will contact the local law enforcement agency who has jurisdiction and request the child or children be entered as missing persons. The parents may be added as persons with information.

The agency should request a copy of the court order for the entry's supporting documentation and the missing person and person with information entries should be treated like any other missing person entry.

Texas Family Code Section 262.102

EMERGENCY ORDER AUTHORIZING POSSESSION OF CHILD

- a) Before a court may, without prior notice and a hearing, issue a temporary order for the conservatorship of a child under Section 105.001(a)(1) or a temporary restraining order or attachment of a child authorizing a governmental entity to take possession of a child in a suit brought by a governmental entity, the court must find that:
- 1) there is an immediate danger to the physical health or safety of the child or the child has been a victim of neglect or sexual abuse;
 - 2) continuation in the home would be contrary to the child's welfare;
 - 3) there is no time, consistent with the physical health or safety of the child and the nature of the emergency, for a full adversary hearing under Subchapter C; and
 - 4) reasonable efforts, consistent with the circumstances and providing for the safety of the child, were made to prevent or eliminate the need for removal of the child.

\$.M./\$.N. Automatic Cross-Search with Unidentified Person Records

When a missing person record is entered or modified, NCIC automatically compares the data in that record against all unidentified person records in NCIC. These comparisons are performed daily on the records that were entered/modified on the previous day. The identifiers used in the comparisons are the following:

Missing Person Record Identifiers	Unidentified Person Record Identifiers
Date of Birth	Estimated Year of Birth
Sex	Sex
Race	Race
Ethnicity	Ethnicity
Height	Estimated Height
Weight	Estimated Weight
Eye Color	Eye Color
Hair Color	Hair Color
Date of Last Contact	Estimated Date of Death
Date of Last Contact	Date Body Found
Scars, Marks, Tattoos, etc.	Scars, Marks, Tattoos, etc.
Fingerprint Classification	Fingerprint Classification
Jewelry Type	Jewelry Type
Originating Agency State Code	Originating Agency State Code
Blood Type	Blood Type
Dental Characteristics	Dental Characteristics

Even though the search only compares the data as shown in the chart above, records should contain all available descriptive data to further aid in identification. Once the comparisons are made to the missing person records, the system sends \$.M administrative messages to all entering agencies. The \$.M administrative message advises an agency that a possible match has been made on its record. This message is transmitted to the ORIs of the matched records.

The message includes abbreviated records for up to 100 possible matches for the physical cross-search and 35 for the dental cross-search. If the cross-search does not produce any match, entering/updating agencies are notified through a \$.N administrative message.

\$.M. Unidentified/Missing Person Match Notification

A \$.M. administrative message is sent to the ORI initiating an entry/modification transaction that results in potentially positive hits during the missing/unidentified person comparison. It is also sent to the ORI(s) of record for the possible matches from the comparison.

Upon receipt of a \$.M. message, the inquiring agency must review all of the information in the candidate record and contact the agency that entered the record to confirm possible matches.

\$.M. Administrative Message

\$.M. L01 TX1234567

NCIC/TCIC Person with Information Record

Entry Criteria for PWI

The PWI capability may only be used when the following rules and conditions have been fully and strictly met, particularly in cases where the PWI is a parent, custodian, or legal guardian.

- PWI data may be appended to a Missing Person File (MPF) record entered using MKE/EME or EMI.
- Only the agency that entered the missing person record may append PWI data to that record.
- An MPF record may be appended with a maximum of two PWI records. Additional identifiers may be added to the PWI record as supplemental transactions.
- PWI data will require review 72 hours following entry and every 30 days thereafter.

Rules

1. When probable cause for arrest of the PWI nominee exists, a warrant must be obtained, entered into the Wanted Person File, and linked to the associated MPF record.
2. When probable cause for arrest of the PWI nominee exists, but a warrant cannot be readily obtained because of circumstances beyond the control of the investigating law enforcement agency, a Temporary Want should be entered into the Wanted Person File and linked to the MPF record.
3. If there is an active record in an unrelated matter in any person file for the PWI nominee, the record should be linked to the associated MPF record.
4. When neither 1, 2 or 3 are possible, the PWI capability may be used only when all of the conditions outlined below exist simultaneously.

Conditions

Facts and circumstances indicate that:

- The missing person was last seen under circumstances that pose a risk to the safety of that person.
- There is a substantial likelihood that the PWI has relevant information about the missing person that could result in the recovery of the missing person.
- Entering identifying information concerning the PWI into the MPF record could assist the appropriate law enforcement agency to identify and interview the PWI, and that the resulting information could assist in the recovery of the missing person.
- The PWI cannot be located, and time is of the essence.
- There is no prohibition under the investigating agency's state law on the publication of information concerning the identity of a person for whom a warrant has not been obtained.
- The identity of the PWI has been disclosed to the general public through an Amber Alert or other formal notification.

Enter Person with Information (EMP)

A person with information supplemental record may be added to an existing missing person record for the endangered or involuntary categories. The supplemental record may only be made by the agency that entered the original record.

\$.K. PWI Person with Information Follow-up Notifications

The NCIC System will send a \$.K. PWI unsolicited message to the ORI of record 72 hours after the entry of PWI data advising that, if probable cause exists, an arrest warrant should be obtained. NCIC will send subsequent \$.K. notifications to the ORI of record every 30 days until the PWI data are removed from the Missing Person File record. PWI data must be immediately removed from the Missing Person File record when/if the individual no longer meets the criteria to be considered a PWI as defined by NCIC policy.

NCIC Unidentified Person File

Criteria for Entry

Agencies must have documentation (electronic or hard copy) on file to support an unidentified person entry. Only the agency holding the unidentified person report may make an NCIC entry. An unidentified person record may be entered using one of the following categories:

- Deceased (MKE/EUD): a person who is no longer living for whom the identity cannot be determined. This category also includes recovered body parts when a body has been dismembered.
- Living (MKE/EUL): a person who is living and unable to determine his/her identity, for example, amnesia victim, infant, etc. The information on unidentified living persons should only be included if the person gives his/her consent or if they are physically or mentally unable to give consent.
- Catastrophe Victim (MKE/EUV): a person who is a victim of a catastrophe for whom the identity cannot be determined or body parts when a body has been dismembered as the result of a catastrophe.

Record Retention Period

- Unidentified Person File records will remain on file indefinitely or until action is taken by the originating agency to clear or cancel the record.

\$.K. Missing Information Notification

A \$.K. Missing Information Notification is sent to the entering agency as a result of the automated periodic quality control review of the Missing and Unidentified Person Files. The review determines if information is present in the following fields:

- Blood Type (BLT)
- Dental Characteristics (DCH)
- Fingerprint Classifications (FPC)
- Jewelry Type (JWT)
- Scars, Marks, Tattoos and Other Characteristics (SMT)
- Height (HGT) = UNK
- Weight (WGT) = UNK

If an entry date of a missing or unidentified person record is over 30 days old and any of the above fields are missing or the HGT and/or WGT contains UNK, a \$.K. message, listing the missing fields, will be sent to the originating agency via the CSA.

The message is a reminder that the entering agency has an additional 30 days to review the record and update the entry. The National Child Search Assistance Act of 1990 requires agencies to verify and update NCIC missing juvenile entries with any additional information, including medical and dental information, within 60 days after entry.

NCIC Supervised Release

Criteria for Entry

Agencies must have documentation (electronic or hard copy) on file to support a supervised release entry. Local, state, and federal supervision officers may enter records in NCIC for subjects who are put under specific restrictions during their probation, parole, supervised release sentence or pre-trial sentencing. The court shall order as an explicit condition of a sentence of probation or supervised release that the defendant not commit another local, state, or federal crime during the term of supervision (Title 28, U.S.C., Sections 3563 and 3583). Among discretionary conditions that the court may impose are the following requiring the defendant:

- Refrain from engaging in a specified occupation, business, or profession bearing a reasonable direct relationship to the conduct constituting the offense, or engage in such a specified occupation, business, or profession only to a stated degree or under stated circumstances.
- Refrain from frequenting specified kinds of places or from associating unnecessarily with specified persons.
- Refrain from excessive use of alcohol or any use of a narcotic drug or other controlled substance without a prescription by a licensed medical practitioner.
- Refrain from possessing a firearm, destructive device, or another dangerous weapon.
- Undergo available medical, psychiatric, or psychological treatment, including treatment for drug or alcohol dependency, as specified by the court, and remain in a specified institution if required for that purpose.
- Remain in the custody of the Bureau of Prisons during nights, weekends, or other intervals of time totaling no more than the lesser of one year or the term of imprisonment authorized for the offense, during the first year of the term of probation.
- Reside in a specified place or area or refrain from residing in a specific place or area.
- Remain within the jurisdiction of the court, unless granted permission to leave by the court or a probation officer.
- Notify the probation officer promptly if arrested or questioned by a law enforcement officer.

Any local, state, or federal criminal justice agency may enter information on probationers; parolees; and subjects of supervised releases, pretrial sentencing, and released on their own recognizance.

Record Retention Period

Supervised Release File records are removed once records meet the date in the Date of Probation/Parole Expiration (DPE) Field. NONEXP may be entered in the DPE Field for subjects with no expiring dates of supervision. A \$.P. Purge Notification is sent to the entering agency 30 days prior to the date the record is to expire.

An exception to record retention periods will occur in the event a serious error is detected in the record on file or in the event the record is not validated as scheduled.

NCIC Protective Interest File

Criteria for Entry

The Protective Interest File (PIF) has been designed to aid law enforcement agencies in their protective mission. Only law enforcement agencies with a protective mission as specified within municipal, state, or federal statutes, regulations, or other appropriate legal authority may enter and update records in the PIF. A record entered into the PIF will assist agencies in determining the threatener's location and may provide the record owner with information related to the threatener's criminal activity.

A record may be entered into the PIF for an individual for whom the authorized agency reasonably believes, based on its law enforcement investigation, may pose a threat to the physical safety of the protected person or their immediate family. Documentation (electronic or hard copy) must be on file to support a PIF entry.

A caution indicator should be added to the MKE/EPI when it is known that a PIF subject is armed and dangerous, has suicidal tendencies, has previously escaped custody, is a drug addict, or whatever is appropriate to the particular circumstances. The reason for the caution must be entered in the Caution and Medical Conditions (CMC) Field.

Record Retention Period

PIF records have an unlimited retention period. A PIF record will remain on file indefinitely or until action is taken by the entering agency to cancel the record. Other exceptions to the record retention periods will occur in the event a serious error is detected in the record on file.

NCIC Investigative Interest / TCIC Interested Agency

Criteria for Entry

Entry of an investigative interest supplemental record to append to a base record may be made by any valid ORI with an investigative interest to the base record.

The investigative interest supplemental record allows agencies to indicate an investigative interest in an existing NCIC record. Up to ten agencies, other than the Originating Agency Identifier (ORI) of record, may add an investigative interest supplemental record to the base record.

The following NCIC files may have an investigative interest supplemental record appended to a base record: Article, Boat, Supervised Release, Gun, Protection Order, Identity Theft, Protective Interest, Violent Person, Missing Person, Immigration Violator, Foreign Fugitive, License Plate, Extreme Risk Protection Order, Securities, Gang, Unidentified Person, Vehicle, Vehicle/Boat Part, Wanted Person, and National Sex Offender Registry.

EIA notifies the terminal with \$.I, EII notifies the inquiring agency on the return.

Record Retention Period

Investigative interest supplemental records have the same record retention period as the base record. At the end of the retention period for the base record, the Investigative Interest Agency Identifier (IIA) is notified with a \$.I. Investigative Interest Notification that the record has been purged due to record retention.

Record Validation

Record validation is important for every agency participating in the Texas and National Crime Information Center databases. The process requires that agencies ensure that the records entered into TCIC/NCIC are accurate and up to date.

Files that are included in the validation process:

Wanted, Gang, Missing, Protection Order, Supervised Release, Sex Offender, Immigration Violator, Identify Theft, Protective Interest, Violent Person, Extreme Risk Protection Order, Unidentified, Boat, License Plate, Vehicle/Boat Part, Vehicle, Gun, Securities, Articles of Identification, Threat Screening Center.

On a monthly basis, the NCIC System extracts active records on file for validation purposes. The validation includes a portion of each file and includes those records 60-90 days old. In addition, it includes any records 14-15 months old, 26-27 months old, 38-39 months old, etc. The validation schedule is as follows:

Monthly Validations	Entries Made During
January	October
February	November
March	December
April	January
May	February
June	March
July	April
August	May
September	June
October	July
November	August
December	September

Validation requires the entering agency to confirm that the record is complete, accurate and still outstanding or active. Validation is accomplished by reviewing the entry and current supporting documents and by recent consultation with any appropriate complainant, victim, prosecutor, court, nonterminal agency, or other appropriate source or individual.

In the event the entering agency is unsuccessful in its attempts to contact the victim, complainant or locate the supporting documentation, the entering agency must decide based on the best information and knowledge available whether to retain the entry in the file. If the original documentation is not accessible, it is permissible for agencies to create a new report with the notation the original was not available.

Monthly Validation Procedures

1. DPS will post a monthly *Validation Report* to each entering agency's inbox on the TCIC Validation Website.
2. Entering agencies will receive notification via email that their records have been uploaded to the TCIC Validation Website.
3. The Validation Report will list the type of records and how many you must validate. You can view from the website or download into an Excel file.
4. Downloaded files can be manipulated to effectively sort or filter using the features of Excel.
5. Information provided on the TCIC Validations Website was uploaded by DPS on a previous date and is not considered current. The TCIC Validations website will NOT update when records are modified, canceled, or cleared in NCIC or TCIC. All records listed must be run through NCIC and checked for accuracy.
6. After all records have been checked, your agency must certify that validation is complete by clicking the certify button on the website before the 15th of each month. You will receive an email from the TCIC Validation Website confirming you have certified your records for the month.

To request access to the TCIC Validation Website contact TCIC Operations at:

TCIC.Operations@dps.texas.gov

512-424-2088

Agencies should ask the following questions when performing record validations:

1. Has the validation list been compared against all active records?
2. Has all entered information been checked for accuracy?
3. Does our agency have any additional information that could be included to further pack the record?
4. Has our agency checked with the court to ensure that the court has not canceled or recalled the warrant or protective order and failed to notify law enforcement?
5. Has our agency verified with the prosecutor extradition status on a wanted person?
6. Has our agency checked with the complainant on a missing person record to assure that the subject has not returned, and they failed to notify law enforcement?
7. Has our agency checked with the vehicle owner or insurance company to ensure that the stolen vehicle was not located or returned to the owner without notification to law enforcement?
8. Has our agency checked to ensure that all records being entered are being double checked by a second party?
9. Has our agency corrected any discrepancies/errors found during the validation process?

Dollar Messages

NCIC automatically sends notification to agencies regarding certain status changes in a record. These automatic messages will begin with a dollar sign (\$) followed by a period, letter, and the agency's ORI. Below are the dollar messages that agencies might receive.

\$D. Originating Agency Duplicate Vehicle Notification

When a vehicle locate, clear or cancel transaction is processed by NCIC and there are duplicate records on file where the VIN and VMA or LIC, LIS, LIT and LIY exactly match, the \$.D. message is sent to the owners of the duplicate records.

\$.E. Serious Error Notification

FBI CJIS personnel periodically check records entered into NCIC for accuracy. Errors discovered in records are classified and this determines the type of action that is taken by FBI CJIS. In cases of serious errors, FBI CJIS will cancel the record and transmit a \$.E. administrative message to the entering agency. The \$.E. message provides the entire canceled record and a detailed explanation of the reason for cancellation. It then becomes the entering agency's responsibility to review the message and make the necessary corrections before re-entering into TCIC/NCIC.

\$.H. Delayed Inquiry Hit Notification from ORI TXDPS00Q0

The Texas Driver License System (NDLS) automatically queries the wanted person file when someone updates or modifies their driver license or identification card information. A \$.H. Delayed Hit Notification will be generated from ORI TXPDS00Q0. A delayed notification can potentially be received for up to five days after the initial modification was made. Agencies that receive one of these notifications should determine on a case-by-case basis if additional action needs to be taken; a driver license transaction can be run to verify new information.

\$.H. Delayed Inquiry Hit Notification

A \$.H. administrative message is sent to the ORI entering or modifying a record which resulted in a hit response for an inquiry made within the last five days.

\$.H. Administrative Message

LOCATE NIC/ W146203714
THIS RESPONSE IS FROM THE NCIC SYSTEM.
```

\$.M./\$.N. Automatic Cross-Search with Unidentified Person Records

When a missing person record is entered or modified, NCIC automatically compares the data in that record against all unidentified person records in NCIC. These comparisons are performed daily on the records that were entered/modified on the previous day. The identifiers used in the comparisons are the following:

Missing Person Record Identifiers	Unidentified Person Record Identifiers
Date of Birth	Estimated Year of Birth
Sex	Sex
Race	Race
Ethnicity	Ethnicity
Height	Estimated Height
Weight	Estimated Weight
Eye Color	Eye Color
Hair Color	Hair Color
Date of Last Contact	Estimated Date of Death
Date of Last Contact	Date Body Found
Scars, Marks, Tattoos, etc.	Scars, Marks, Tattoos, etc.
Fingerprint Classification	Fingerprint Classification
Jewelry Type	Jewelry Type
Originating Agency State Code	Originating Agency State Code
Blood Type	Blood Type
Dental Characteristics	Dental Characteristics

Even though the search only compares the data as shown in the chart above, records should contain all available descriptive data to further aid in identification. Once the comparisons are made to the missing person records, the system sends \$.M. administrative messages to all entering agencies. The \$.M. administrative message advises an agency that a possible match has been made on its record. This message is transmitted to the ORIs of the matched records.

The message includes abbreviated records for up to 100 possible matches for the physical cross-search and 35 for the dental cross-search. If the cross-search does not produce any match, entering/updating agencies are notified through a \$.N. administrative message.

\$.M. Unidentified/Missing Person Match Notification

A \$.M. administrative message is sent to the ORI initiating an entry/modification transaction that results in potentially positive hits during the missing/unidentified person comparison. It is also sent to the ORI(s) of record for the possible matches from the comparison.

Upon receipt of a \$.M. message, the inquiring agency must review all of the information in the candidate record and contact the agency that entered the record to confirm possible matches.

\$.M. Administrative Message
